Developing Effective Partnerships
In Reporting Student Achievement:

Making Links Between Educative
Theory and Schools’ Reporting
Practices

A thesis submitted as partial fulfilment of the
requirements for the degree of Master of Educational Administration

Massey University: Albany

DECLARATION

I declare that this thesis represents my own work, except where due acknowledgement is made, and it has not been previously included in a thesis, dissertation or report submitted to this University or any other institution for a degree or any other qualification.

Kerry Taylor
Abstract

This thesis examines how three participant schools reported the achievement of students to parents and the extent to which reporting practices reflected current educative theories and effective partnership. The understanding of parents and teachers of the process of the reporting practices, and how practice promoted or hindered educative partnerships between teachers and parents were examined. Over the past ten years, schools, in New Zealand, have spent much time realigning their reporting practices to New Zealand national requirements, and the expectations of their school communities. This research examined what led schools to make their decisions about their reporting practices, comments on the effectiveness of current practices and draws conclusions based on the findings of the research.

Evaluative case study was selected as the methodology for this study. The study is located within three school contexts and involves in-depth examination and analysis of teachers’ and parents’ perceptions about educative theory, partnership and reporting student achievement. The methodology used provided an opportunity to evaluate current practice, provide feedback to each participant school and allowed the cooperative development of recommendations for improving reporting processes. Issues and themes were identified as data were gathered. Exploration of emerging themes occurred throughout the data gathering phase. Data gathering strategies included parent and teacher questionnaires, individual interviews with senior leaders, teachers and parents and document analysis.

That data revealed a number of themes in relation to educative theory, reporting and partnership. Initial themes included: important educational outcomes identified by parents and teachers, the purpose of reporting identified by parents and teachers, the type of information parents found helpful, the role of teacher-parent interviews, the desire of parents to be actively involved in their children’s learning, and the frequency and timing of personal contact between parents and teachers.

This thesis concludes that each school had not directly linked their practices to educative theory or conditions for effective partnerships with parents. A key purpose identified by both parents and teachers was the support of parents in helping their children achieve, yet this key purpose was omitted from any documentation identifying purposes and, in many cases, from the implementation of reporting processes by teachers. A further conclusion is that the link between educative theories, the relationship of those theories to the reporting process and how effective links could be made to develop effective partnerships between teachers, parents and students is a significant area for future research.
Acknowledgements

As with all research, this thesis is the culmination of the contributions of many people. Without the support of the three school’s Board of Trustees, staff and parents this thesis could not have been completed. The openness with which each school community contributed to the research is testament to their own desire to ensure students are at the heart of decision making within each school.

I acknowledge the invaluable support of Jan Hill, IPDER, Massey University who kept me on task and focused. Jan challenged me to extend my thinking and ensured the process of research was rigorous. I also thank Dr Jenny Poskitt for her critique and timely advice in relation to the completion of this study. Andrea Morley provided secretarial and practical support. Coordinating community questionnaires and making contact with appropriate translators was an enormous job and I am grateful to Andrea for managing that aspect of the study so well.

And finally, to my family, who came to ‘lovingly’ know me as ‘the back’ because that was all they saw of me for the latter part of 2002 and all of 2003. I could not have completed this study without their tolerance and understanding.
# Table of contents

## ABSTRACT

## ACKNOWLEDGEMENTS

## CHAPTER ONE: Introduction

- Introduction
- The context: reporting
- The research problem
- Objectives
- The process: evaluative case study and the researcher's role
- The organisation of this thesis

## CHAPTER TWO: Background

- Introduction
- The evaluation of school's reporting policies and practices
- Matching the intended message with the message received
- New Zealand national assessment strategy: a need for change
- Assessment tools to assist reporting
- Legislating for change
- Current national guidelines for reporting student achievement to parents
- Summary

## CHAPTER THREE: Literature Review

- Introduction
- Effective partnerships in reporting student achievement
- Effective practice in supporting student learning
- Theories of effective practice in reporting student learning
- Making the links: a summary
CHAPTER FOUR: The methodology in practice

Introduction
Case study as a research design
Case study approaches
Evaluating school programmes
Limitations of evaluative case study
Evaluative case study tools
Summary

CHAPTER FIVE: Methodology in practice

Introduction
Selection of participants
Personal contact with schools
Evaluation approach
Evaluative case study tools used
Analysis of data
Ethical issues
Limitations of the methodology
Summary

CHAPTER SIX: Findings and emergent themes

Introduction
Key understandings and interpretation of national guidelines and requirements
Articulating purposes of reporting student achievement to parents
Articulating and implementing reporting procedures
Matching the intended message with the message received by parents
Promoting the concept of education as a partnership
Summary
CHAPTER SEVEN: Making connections and moving forward

BIBLIOGRAPHY

APPENDICES

A  Information sheet for schools and parents
B  Questionnaires for teachers and parents (English)
C  Questionnaires for parents translated into Samoan and Tongan
D  Expression of interest to be interviewed
E  Example of initial qualitative analysis of data from teacher questionnaires
# LIST OF TABLES

1. Relationship between formative evaluation and evaluative case study
2. Statistical information about each school
3. Percentages of parents and teachers who returned questionnaires
4. Participation in interviews by teachers and parents
5. Documents analysed
6. Tools used in study
7. Familiarity with national guidelines and legislation
8. Percentage of teachers involved in professional development
9. Purposes of reporting student achievement
10. Policies analysed in the study
11. Relationship between participant school's policies and the themes identified in the literature
12. Perception of parents about receiving information on reporting procedures
13. Parents' perceptions about how they receive information about reporting procedures
14. Usefulness of each school's reporting methods
15. Features of reports
16. Parents' perceived level of understanding about their child's learning
17. Parents' and teachers' expectations of educational outcomes
18. School B reading report continuum
19. Cycle of communication in reporting student achievement which demonstrates educative theory and high level partnership
