Experiences of early adopters
in changing their thinking regarding teaching practices
for the online environment in a New Zealand university

A thesis presented in partial fulfilment of the requirements of the degree of

Master of Education in Adult Education

at Massey University, Wellington, New Zealand

Julia Leah Hallas

2005
Abstract

The aim of this thesis was to investigate how early adopters changed their thinking regarding teaching practices for the online environment. The study investigated how early adopters adapted and developed their classroom based teaching practices for the online environment, the effect of online teaching practices on their students’ learning, and the types of professional development lecturers engaged in to learn about online teaching practices.

A mainly qualitative approach, within a case study method, was used to undertake the research in a medium sized, New Zealand university, where the researcher is an academic developer in the centralised professional development unit, jointly responsible for supporting staff in online teaching practices. Written informed consent was obtained from lecturers participating in this study. A mail-in survey, individual interviews and online course observations were used to gather data for the research questions. This is a limited case study owing to the small size of the sample.

The study concluded that early adopters changed their thinking about teaching practices over time, adapting and developing student-centred approaches to learning for the online environment. The study found that early adopters’ perceptions of student learning was of a higher quality online, than in the classroom, owing to student learning approaches being deeper, more interactive and collaborative. Finally, the study showed that a majority of early adopters did not engage in research based professional development activities, which made changing their thinking from teacher-centred to student-centred online teaching practices, difficult and stressful.
Acknowledgements

I would like to acknowledge the guidance of Alison Viskovic and Linda Leach in their supervision of this thesis. Their support, patience and attention to detail was gratefully received. A special thank you to Philip and Rebecca for their never-ending patience and encouragement. Finally, I would like to thank my colleagues who have been supportive and understanding of the time I required to complete this thesis.

Ethics approval

Ethics approval was obtained from MUHEC and the Human Ethics Committee in the institution where this study takes place.
Declaration

I hereby certify that this material, which I now submit for assessment on the programme of study leading to the award of Master of Education (Adult Education), is entirely my own work and has not been taken from the work of others, except where that work has been cited and acknowledged within the text of my own work.
