DECLARATION

I declare that this thesis represents my own work, except where due acknowledgement is made, and has not been previously included in a thesis, dissertation or report submitted to this university or to another institution for a degree, diploma or other qualification.

Alicia A. Ritter
Abstract

The purpose of this study was to examine factors affecting international teachers’ decisions to stay in or leave their international schools. The research questions for the study answered what individual characteristics of teachers impacted retention, how cultural distance, length of time it took to settle in, and school support affected retention, and what guided teachers to remain in their locations. The participants were 100 international teachers in ten schools across four countries. The teachers ranged from younger to older and from newly experienced to more seasoned international teachers who had been working in international schools for a long period of time. The researcher interviewed each teacher personally and used a grounded theory approach to the collection and analysis of data, coding data into themes related to the research questions. The results of the analysis suggested that the most important reasons for staying in an international school were for personal reasons, including for partners or family, age, quality of life, right ‘fit’, and level of happiness. The second most important reasons for staying in a job included professional reasons such as for the school’s philosophy, vision, administration, and for professional opportunities within the school. The third most important reason for remaining in a job was for the salary and benefits. International teachers who made an effort to get involved in their locations seemed to adjust better. The extent to which international adaptations were positive or negative varied depending on the country. The value of the present study was that the interviews gave a personal insight into the experiences of these teachers, the challenges they faced in working and adapting to new cultures, languages, and in different school settings around the world, and how these experiences impacted retention in international schools.
Acknowledgments

International teaching is a career unbeknownst to many educators in their home countries. Once teachers have discovered and entered the realm of international education, many remain in the profession for the duration of their careers. I connected and identified with these teachers very quickly when I began my international teaching career in Beijing, China. I became curious at first as to why many teachers remained abroad, though the benefits revealed themselves quickly. My curiosities then turned to what specifically schools or cultural environments offered to keep international teachers in locations.

I would like to thank the international school heads and principals for allowing me to contact teachers within their schools and would also like to thank the international teachers who set aside time to be interviewed and correspond with me over time about their experiences abroad. It was an all encompassing and indescribable journey getting to travel to the international schools and countries to meet these international teachers in person. I would like to thank everyone who helped make these journeys across the world possible.

I would especially like to thank my two supervisors, Professor Tom Nicholson and Professor Michael Townsend, for their counsel and guidance throughout this project. Without their expertise and encouragement, I could not have completed this journey successfully. Thank you both for your support, inspiration, and friendship over the last decade!

Lastly, thank you to my family who gave unrelenting support throughout the process. Without their love and encouragement I would not have made it through. And thank you to Bella, my daughter, the inspiration to keep going when times were tough and crossing oceans with me on what continues to be an incredible journey.
# Table of Contents

## Chapter 1: Introduction

1.1 Rationale for the present study .................................................. 1
1.2 The international school context .................................................. 1
1.3 The teacher retention problem: Turnover in education ...................... 2
1.4 Reasons for teacher turnover ..................................................... 3
1.5 The significance of the present study ........................................... 3
1.6 The aim of the study ................................................................. 4
1.7 The research questions .............................................................. 4
1.8 Structure of the thesis ............................................................... 4

## Chapter 2: Review of the Literature

2.1 Globalization and its effects on education in the 21st century .............. 6
2.2 Stobart’s concept of internationalism ........................................... 6
2.3 The emergence of international education ..................................... 7
2.4 Nature and needs of expatriate families in international schools ........... 8
2.5 Characteristics of teachers choosing to work overseas ..................... 11
2.6 Cross-cultural motivations and working overseas ............................ 12
2.7 Challenges in international education .......................................... 15
2.8 Retaining educators ................................................................. 17
2.9 Turnover in education .............................................................. 21
2.10 Why does turnover occur? ......................................................... 23
2.11 Characteristics of educators leaving the profession ......................... 26
2.12 Turnover and retention in international schools ............................ 29
2.13 The need to retain quality international school educators ................ 31
2.14 Conclusion ............................................................................. 32

## Chapter 3: The Research Method

3.1 Introduction ........................................................................... 34
3.2 Research objective ................................................................. 34
3.3 Research questions ................................................................. 34
3.4 Research paradigm .................................................................. 35
3.5 Field research entry ............................................................... 36
3.6 Participants ........................................................................... 37
3.7 Measures for data collection ..................................................... 42
3.8 Procedure ............................................................................. 42
3.9 Data analysis ........................................................................ 43
3.10 Determining themes .............................................................. 47
3.11 Confidentiality and ethical considerations .................................... 49
3.12 Timeline of the study ............................................................... 50
3.13 Summary of methodology ..................................................... 52
3.14 Organization of remaining chapters ........................................ 53

Chapter 4.1 Results for Research Question 1 ................................. 54

4.1.1 Research Question 1 ............................................................... 54
4.1.2 Themes on characteristics of international teachers .................. 54
4.1.3 Hardman’s classifications of international teachers ................. 55
4.1.4 Summary of teacher classifications within the scope of this study 59
4.1.5 Teachers changing classifications over time ........................... 60
4.1.6 Summary of findings for those who change classifications over time 62
4.1.7 Marital and family status and influence on overseas experiences 62
4.1.8 Advantages of being overseas with a partner or family ............ 63
4.1.9 Disadvantages of having a family while living overseas .......... 65
4.1.10 Advantages of being a single teacher ................................. 69
4.1.11 Disadvantages of being a single teacher ............................. 70
4.1.12 Summary of findings on family and marital status ............... 71
4.1.13 Level of personal investment on the part of the teacher ........... 71
4.1.14 Length of stay affected investment level .............................. 72
4.1.15 Level of involvement affected based on length of time in location 72
4.1.16 Experiencing a reverse investment phenomenon .................... 75
4.1.17 Summary of findings for relationship between investment and time 75
4.1.18 Overall summary of Chapter 4.1 ........................................ 76

Chapter 4.2: Results for Research Question 2 ............................... 79

4.2.1 Research question 2 ............................................................... 79
4.2.2 Themes on cultural distance, settling in, and school support .... 79
4.2.3 Cultural distance ................................................................. 80
4.2.4 Adjusting to cultural norms, behaviors, and differences in thinking 80
4.2.5 Cultural differences affecting communication .......................... 83
4.2.6 Cultural differences specific to locations .............................. 86
4.2.7 Summary of cultural distance and communication differences ........ 87
4.2.8 Cultural distance in the workplace ....................................... 88
4.2.9 Observing differences in work ethic with staff members .......... 88
4.2.10 Cultural differences noted with students ............................. 89
4.2.11 Cultural differences noted with students’ parents ........................................ 91
4.2.12 Effects of culture impacting instruction ...................................................... 93
4.2.13 Approaching cultural differences in the workplace ...................................... 94
4.2.14 Aligning own ways of thinking in different environments ....................... 94
4.2.15 Summary of findings on cultural distance .................................................. 96

4.2.16 Involvement in the host culture ................................................................. 97
4.2.17 Substantial involvement with the host culture .......................................... 99
4.2.18 Became peripherally involved with the host culture .................................. 100
4.2.19 Involvement more with expatriate culture ................................................. 101
4.2.20 Perception of host culture and language level affecting involvement ........ 102
4.2.21 Reasons for being less involved in the host culture .................................... 103
4.2.22 Cultural involvement linked to longevity in some cases ............................. 105
4.2.23 Summary of findings related to cultural involvement ............................... 105

4.2.24 Teachers learned languages at different ability levels by country .............. 106
4.2.25 Motivation behind why some teachers learned the language .................. 108
4.2.26 Cultural differences and effects on learning the language ......................... 109
4.2.27 Summary related to language ability and effects on involvement ............. 111

4.2.28 Cultural distance and effects on settling in .............................................. 112
4.2.29 Settled in more quickly with the culture and in everyday life ................... 113
4.2.30 Settled in more slowly in the culture and in everyday life ......................... 114
4.2.31 Point at which teachers felt settled in their locations ............................... 116
4.3.32 Summary of settling into the culture and into everyday life ..................... 116

4.2.33 Length of time it took teachers to settle in to their schools ...................... 117
4.2.34 Settled in more quickly into the workplace .............................................. 118
4.2.35 Settled in more slowly into the workplace .............................................. 119
4.2.36 Differences between teachers and time it took to settle in ....................... 121
4.2.37 Summary of findings for settling in professionally ................................. 122

4.2.38 Experiencing phases of transition when changing locations .................... 122
4.2.39 Experiencing phases of honeymoon, depression, and contentment .......... 123
4.2.40 Experiencing the honeymoon phase first ............................................... 128
4.2.41 Experiencing the depression phase first ................................................. 129
4.2.42 Arrival at the contentment phase ....................................................... 134
4.2.43 Additional models of transition ............................................................. 135
4.2.44 Transitioning out of the school is also an important consideration .......... 135
4.2.45 Summary of findings for honeymoon, depression, and contentment ....... 136

4.2.46 Level of personal support in the transition ............................................. 136
4.2.47 Maintaining familiar aspects of home ..................................................... 136
4.2.48 Getting involved in the new location ....................................................... 137
4.2.49 Building and maintaining a support network ........................................... 138
4.2.50 Developing routines in the new location ..................................................... 140
4.2.51 Balance and wellness ................................................................................. 141
4.2.52 Summary of personal supports in transitions ............................................. 142

4.2.53 School orientation processes and overall support ....................................... 142
4.2.54 Important aspects of an orientation process ................................................ 143
4.2.55 Positive and negative experiences upon arrival .......................................... 144
4.2.56 Orientations, additional support, and links to retention ............................... 148
4.2.57 Additional considerations regarding orientation weeks ............................ 148
4.2.58 International school orientations and links to retention ............................. 149
4.2.59 Summary of findings regarding orientation processes ............................... 151

4.2.60 Overall summary of Chapter 4.2 ............................................................... 151

Chapter 4.3: Results for Research Question 3 ...................................................... 155

4.3.1 Research question 3 ..................................................................................... 155
4.3.2 Themes related to future decisions of international educators .................... 155

4.3.3 School, country, or combination as key motivators for remaining ................ 156
4.3.4 School was the most important reason for staying ....................................... 157
4.3.5 Country was most important factor in decision to remain ............................ 162
4.3.6 School and country were equally important in decision-making ................. 164
4.3.7 Other reasons for remaining in one’s current location ................................. 166
4.3.8 Reasons the teacher would want to leave the school or country ................... 167
4.3.9 Summary of findings for remaining in location for school or country .......... 170

4.3.10 What more specifically guides decisions to remain in location .................. 171
4.3.11 Key decisions made in relation to the job and school administration .......... 173
4.3.12 Key decisions made in relation to professional opportunities elsewhere .......... 174
4.3.13 Key decisions made in relation to family .................................................... 175
4.3.14 Key decisions made in relation to age ........................................................ 176
4.3.15 Key decisions made in relation to quality of life ........................................ 177
4.3.16 Key decisions made in relation to right ‘fit’ ................................................. 178
4.3.17 Key decisions made in relation to level of happiness ................................. 178
4.3.18 Key decisions made in relation to salary and benefits packages ................. 179
4.3.19 Ideals of what one wants in their school and location ............................... 181
4.3.20 Summary of findings for basis for future decisions .................................... 182

4.3.21 Changes in the experience after making the decision to leave .................... 183
4.3.22 Negative consequences in the workplace after choosing to leave .............. 183
