Blending and flipping learning: A journey in innovative curriculum design and delivery

A case study exploring teachers’ understandings and perceptions of blended, flipped learning

Frances Morgans

A thesis submitted in fulfilment of the requirements for the degree Master in Education (eLearning), Massey University
Abstract

Historically, lecturing has been the dominant form of teaching within tertiary institutions, however the past decade has seen a shift of focus away from the lecturer as the source of all knowledge. As learning and teaching approaches change to meet the needs of a changing society, research is needed into how the academic staff involved in these new methods understand these approaches and deal with them. There is a move towards pedagogies that are more authentic, contextual and social in nature, as these are perceived as more appropriate to equip learners with the skills they will need to participate in a constantly changing societal context.

This research study aimed to gain a deeper understanding of the perceptions and experiences of staff involved in creating and facilitating a curriculum innovation involving new courses that were blended and flipped.

Twenty-five staff members from a tertiary institution in New Zealand took part in the study. Participants held a range of roles and were all actively involved in the curriculum innovation. This thesis adopted a qualitative case study research approach using information gained from a questionnaire and semi-structured interviews.

While understandings of blended and flipped learning were varied among participants, the perceived benefits of a blended, flipped model included flexibility, increased digital literacy, opportunities for the improvement of self-directed learning skills among students, the freeing up of class time for exploration, the development of critical thinking and problem-solving skills and allowing learners to lead and direct their learning. The challenges in design were deciding on the best use of online and face-to-face spaces, designing engaging online activities, having knowledge of appropriate online tools and platforms to use and time. Facilitation challenges included managing and building student’s self-directed learning skills, keeping students engaged online, giving timely feedback to students, and managing group work.

By gaining valuable insights into teachers’ understandings of the blended and flipped methods that they were working with, these findings may help to inform institutions using a similar context.
Acknowledgements

With special thanks to Mandia Mentis and Maggie Hartnett in the Institute of Education who provided academic oversight and support for the thesis. Your consideration, cordiality and expertise have been much appreciated.

Thank-you, also to my family for their never-ending patience, understanding and inspiration. To my sons Max and Alex, and my partner David. I dedicate this thesis to you.
Contribution

I, the researcher, undertook all aspects of this study under the direct guidance of my supervisors. This entailed selecting the appropriate research design, the data collection and analysis, and the publishing of the findings in this thesis.
# Table of contents

Abstract ................................................................................................. ii

Table of contents .................................................................................. v

## Chapter I: Introduction ..................................................................... 9

### 2.1 Introduction ............................................................................ 12

### 2.2 Blended learning and tertiary education .......................... 12

#### 2.2.1 Defining blended learning ........................................... 12

#### 2.2.2 Benefits of blended learning ...................................... 14

#### 2.2.3 Designing blended learning .......................................... 16

#### 2.2.4 Facilitating blended learning ...................................... 19

#### 2.2.5 Summary on blended learning ..................................... 20

### 2.3 Flipped learning and tertiary education ......................... 20

#### 2.3.1 Defining flipped learning ........................................... 21

#### 2.3.2 Benefits of flipped learning ...................................... 23

#### 2.3.3 Designing flipped learning .......................................... 25

#### 2.3.4 Facilitating flipped learning ...................................... 26

#### 2.3.5 Summary on flipped learning ..................................... 28

### 2.4 Bringing together blended and flipped learning .......... 28

### 2.5 Research aims ....................................................................... 29

## Chapter III: Research design and process .............................. 31

### 3.1 Introduction .......................................................................... 31

### 3.2 Paradigm ............................................................................. 31

#### 3.2.1 Interpretive / constructivist ......................................... 31

### 3.3 Qualitative research ............................................................. 32
3.3.1 Case study research ................................................................. 32
3.3.2 General inductive method of enquiry ....................................... 33
3.4 Study design ................................................................................ 34
3.5 Context of study ........................................................................... 36
3.6 Trustworthiness ........................................................................... 38
3.7 Researcher background ................................................................. 39
3.8 Participants .................................................................................. 40
  3.8.1 Participant eligibility ................................................................. 40
  3.8.2 Recruitment of participants ..................................................... 40
  3.8.3 Phase 1 – The questionnaire .................................................... 40
  3.8.4 Phase 2 – The Interviews ......................................................... 41
  3.8.5 Data analysis ........................................................................... 42
  3.8.6 Coding ................................................................................... 42

Chapter IV: Findings ........................................................................... 44
  4.1 Introduction .................................................................................. 44
  4.2 The participants .......................................................................... 44
    4.2.1 The interview participants .................................................... 48
  4.3 Understandings of blended learning and perceptions of benefits and
      challenges for learning and teaching ............................................. 50
    4.3.1 Definitions of blended learning ............................................. 50
    4.3.2 Challenges of blended learning .............................................. 55
  4.4 Understandings of flipped learning and perceptions of benefits and
      challenges for learning and teaching ............................................. 59
    4.4.1 Definitions of flipped learning ............................................. 60
    4.4.2 Benefits of flipped learning .................................................. 65
    4.4.3 Challenges of flipped learning .............................................. 68
  4.5 Summary ..................................................................................... 72

Chapter V: Discussion ........................................................................ 73
  5.1 Introduction .................................................................................. 73
  5.2 What are staff understandings of blended and flipped learning? ...... 73
5.2.1 Understandings of blended learning................................................................. 73
5.2.2 Summary of understandings of blended and flipped............................... 78
5.3 What are the perceived benefits of blended and flipped learning? .......... 78
   5.3.1 Benefits of blending ..................................................................................... 79
   5.3.2 Benefits of flipping ...................................................................................... 81
   5.3.3 Summary of the benefits of blending and flipping .................................... 84
5.4 What are the challenges involved in creating courses that are blended and flipped? ........................................................................................................................................... 85
   5.4.1 The challenges for creating blended and flipped learning experiences ....... 85
   5.4.2 Summary of the challenges for creating blended and flipped learning experiences .......................................................................................................................... 90
5.5 What are the challenges involved in facilitating courses that are blended and flipped? .................................................................................................................................................. 91
   5.5.1 The challenges involved in facilitating blended and flipped courses .......... 91
   5.5.2 Summary of the challenges for facilitating blended and flipped learning experiences .......................................................................................................................... 95
5.6 Summary of chapter ........................................................................................... 95

Chapter VI: Conclusion ........................................................................................... 97
   6.1 Summary of the main findings ........................................................................ 97
   6.2 Summary of the implications for practice .................................................... 98
   6.3 Significance of this research ........................................................................ 100
   6.4 Limitations of the research study .................................................................. 100
   6.5 Recommendations for future research ........................................................ 101
