Factors Affecting Strategic Marketing Decisions in Agriculture: A Study of Fruit Farmers in Thailand

A thesis presented in partial fulfilment of the requirements for the degree of

Doctor of Philosophy

in

Agribusiness

at Massey University, Palmerston North, New Zealand.

Bhawat Chiamjinnawat

2017

DECLARATION

I, Bhawat Chiamjinnawat, declare that this thesis entitled "*Factors Affecting Strategic Marketing Decisions in Agriculture: A Study of Fruit Farmers in Thailand*" submitted to Massey University for the degree of Doctor of Philosophy is the outcome of my own research work. Acknowledgement is given where material from other resources was used. I also certify that the thesis has not been presented, in whole or partly, for any degrees or diplomas.

ABSTRACT

The transformation of agri-food marketing systems worldwide has implications for small-scale fruit farmers in Thailand. Effective strategic marketing decisions (SMDs) of farmers are essential elements in response to market transformation. Based on the theory of strategic decision making, SMDs are made in regards to the availability of internal resources, the dynamics of the external environment and the goals that need to be accomplished. Previous literature mostly explains the SMDs of individual farmers in developed countries. Research work in developing countries generally concentrates on SMDs, in order to link small-scale farmers to markets. Characterised by small-scale operations farmers in Thailand were not considered as being leading actors in agri-food value chains. As a result, available research on SMDs, which reflect farmers' strategic capability, was scarce within a Thailand context.

This study employed a quantitative survey-based approach to determine key factors that affect the SMDs of fruit farmers in Chanthaburi province of Thailand. Qualitative data was also collected in a pilot study, in order to develop the conceptual model and the foundation of the questionnaire. The survey data was collected from 216 fruit farmers, through the use of face-to-face interviews with structured questionnaires. Descriptive statistics and chi-square tests were employed to describe and compare the fruit farmers who used traditional marketing channels (TM users) with those who used high-value marketing channels (HM users). Furthermore, factor analysis was employed to identify factors included in the conceptual model, and logistic regression was employed to test the hypotheses.

This study found that SMDs towards high-value market participation were positively related to business size, experience in fruit farming, perceived importance of market requirements, and farmers' goals in regards to effectiveness. The results suggest that small business sized farms need to improve their productivity and increase their business capacity, via collective actions that would allow them to benefit from collective learning with experienced farmers, which could lead to updated market information. It was also noted that some farmers aimed to achieve their production goals by focusing on efficiency, while others desired a simple lifestyle by focusing their lives on self-sufficiency. This implied that different types of farmers needed to be encouraged in different ways, in order to develop their strategic capabilities as important stakeholders in the fruit industry of Thailand.

ACKNOWLEDGEMENTS

Firstly, I wish to express my appreciation to Sukhotahi Thammathirat Open University (STOU) Thailand, for providing me with a full doctoral scholarship and for allowing me leave from my work for this PhD study.

Special thanks go to my supervisors Dr. Elena Garnevska and Associate Professor Dr. Panos Fousekis for their advice and support throughout the journey of my thesis. I have appreciated their criticism of my thesis and also their professional attitude and commitment to the excellence of research. Their encouragement, patience and enthusiasm have greatly helped me to complete my PhD study.

I am also grateful to the Provincial Agricultural Extension Office, the Provincial Cooperative Office, the Office of Agricultural Research and Development and the fruit farmers in Chanthaburi province, Thailand, who kindly gave their cooperation and provided invaluable information for my study.

I acknowledge the support of Professor Nicola Shadbolt, Warren Anderson, Iona McCarthy and Professor Peter Kemp for providing invaluable assistance and consultations at various stages of my study and for kindly involving me as part of the academic community at Massey. I thank the staff of the Institute of Agriculture and Environment, International Student Support, Centre for Teaching and Learning and Graduate Research School, Dianne Reilly, Denise Stewart and Lois Wilkinson for their assistance and administrative details throughout the study.

Finally, I want to profoundly thank my beloved wife Achara and our daughters Rada, Siree and Narawee for their support, patience and care and for always being alongside me. My thanks also go to my siblings for their continuous encouragement during this journey. Most importantly, I dedicate this thesis to my parents who have always given me their unconditional love.

Bhawat Chiamjinnawat

CHAPTER SEVEN

7 Description of the sample: Comparisons between the two sample groups.....	147
7.1 Introduction.....	147
7.2 Descriptive analysis	147
7.3 Characteristics of the fruit farmers	149
7.3.1 Age.....	149
7.3.2 Gender.....	150
7.3.3 Education	150
7.3.4 Fruit farming experience.....	151
7.3.5 Income sources.....	152
7.4 Characteristics of the fruit farm business.....	153
7.4.1 Farm size	154
7.4.2 Land ownership.....	155
7.4.3 Fruit crops grown	156
7.4.4 The Good Agricultural Practice certification.....	157
7.4.5 Membership of agricultural cooperatives	162
7.4.6 Fruit production and sales	163
7.5 Markets used	163
7.5.1 Different types of markets used	164
7.5.2 Market attributes	165
7.6 Strategic intention	166
7.6.1 Fruit farm operation	166
7.6.2 New main fruit crops	166
7.6.3 New main markets	169
6.7 Summary	172

CHAPTER EIGHT

8 Factors affecting strategic marketing decisions of the fruit farmers.....	174
8.1 Introduction.....	174
8.2 Establishing the factors	174
8.2.1 Factor analysis	174
8.2.2 Underlying factors	180
8.2.3 Descriptions of the underlying factors	191
8.3 The conceptual model	192
8.3.1 Independent variables	193
8.3.2 Dependent variable	194
8.3.3 Hypotheses	196
8.4 Testing the model.....	197
8.4.1 Logistic regression analysis	197
8.4.2 Nine-factor model	202
8.4.3 Six-factor model.....	204
8.4.4 Effects of the factors	206
8.4.5 Links between the six key factors and strategic marketing decisions.....	212
8.5 Profile of the fruit farmers	214
8.5.1 Traditional marketing channel users	214
8.5.2 High-value marketing channel users.....	215
7.7 Summary	215

CHAPTER NINE

9 Conclusions.....	217
9.1 Introduction.....	217
9.2 The research objectives and results.....	217
9.2.1 Thailand's agriculture sector and fruit industry	218
9.2.2 Fruit farms and farmer characteristics	219

9.2.3 Factors affecting strategic marketing decisions	219
9.3 Discussion	221
9.3.1 The internal environment	221
9.3.2 The external environment	223
9.3.3 The farmers' goals	224
9.4 Implications.....	227
9.4.1 Implications for academics	227
9.4.2 Implications for industry stakeholders	228
9.5 Limitations of the study	230
9.6 Future research	231
9.7 Final conclusion	232
