TEACHER BURNOUT:

A STUDY OF OCCUPATIONAL STRESS AND BURNOUT IN NEW ZEALAND SCHOOL TEACHERS

A thesis submitted in partial fulfilment of the requirements for the degree of Doctor of Philosophy
Massey University, Albany, New Zealand

DECLARATION

I declare that this thesis represents my own work, except where due acknowledgement is made, and that it has not been previously included in a thesis, dissertation or report submitted to this University or to any other institution for a degree, diploma or other qualification.

Anna J Whitehead
Abstract

This thesis addresses the internationally recognised problem of stress and burnout in teachers, especially as this affects primary school teachers. The study included three phases. The first phase sought to examine the effects of stress since the new education administration changes, and to look at teachers' perceptions of stress, the work situations causing stress and the coping strategies that they found most helpful. The second phase of the study sought to identify levels of burnout using the Maslach Burnout Inventory (comparing them with American counterparts). Finally, the third phase of the study looked at differences in the work environment of both high and low burnout schools.

A multidimensional research approach was selected as a framework for analysis. The limitations of prior research on teacher burnout suggests that the use of multiple methods of information gathering would prove to be a most valid approach, allowing for different perspectives in understanding the complexity of burnout within the school organisation. A range of qualitative and quantitative data analyses and information gathering procedures were used. This included a stress questionnaire, MBI surveys, staff interviews, and observations.

Results from the study confirmed that teachers report high level of stress in New Zealand schools and that there are noticeable differences between low stress and high stress schools in terms of their administrative, social and physical environments. It is recommended that teacher burnout be seen not only as an individual problem, but also as an organisational problem and that effective strategies on administrative, social and physical levels must be put in place in order to maintain healthy, low burnout school environments.
Acknowledgements

This thesis could not have been completed without the support and assistance of many people. I would particularly like to thank Associate Professor Ken Ryba who provided me with excellent supervision and who gave so much support and sharing of his knowledge. Particular thanks also goes to Professor Michael O’Driscoll for sharing his specialised knowledge and scholarship.

I also wish to record my grateful thanks to work colleagues and the teachers and administrators who gave their time and willingly took part in the research. Special thanks goes to Owen and Clemency Claridge for their invaluable contribution and attention to detail in the proofing of this thesis. I would also like to thank Imre Vallyon for his inspirational support. A thank you also goes to the Massey University Research Fund who contributed funding for this research.

Finally, I would like to express heartfelt love and appreciation to my family; my mother Nan for her unfailing support, encouragement and endless meals, my brothers Ian and Alastair, my husband Andrew and daughter Sophie for their patience and support, and finally my father David to whom this thesis is dedicated in fond memory. Without all their support, and considerable patience the completion of this dissertation would not have been possible.

## CHAPTER ONE - Introduction

1.0 Introduction - An Overview of the Study .................. 1  
1.1 Background Influences: Changes in Educational Administration 2  
1.2 Effects on the School Organisation ..................... 4  
1.3 Rationale for the Study .................................. 5  
1.4 Purpose of the Study .................................... 8  
1.5 Statement of Purpose .................................... 9  
1.6 Organisation of the Thesis ............................... 10  

## CHAPTER TWO - Literature Review

2.0 Introduction ............................................ 12  
2.1 The Nature of Stress .................................... 12  
2.2 History of the Stress Concept .......................... 13  
2.3 Main Approaches to the Definitions of Stress .......... 15  
2.4 The Stimulus Based Definition ......................... 16  
2.5 The Response Based Definition ......................... 18  
2.6 Summary of Response and Stimulus Approaches ......... 21  
2.7 The Transactional or Interactional Definition of Stress 21  
2.8 The Burnout Concept .................................. 25  
2.9 Defining Burnout .................................... 26  
2.10 Cherniss's Model of Burnout ......................... 31  
2.11 Golembiewski's Model of Burnout .................. 32  
2.12 Conservation of Resources (COR) Theory ............ 33  
2.13 Conceptual framework ................................ 34  
2.14 Measurement of Burnout ............................... 36  
2.15 Correlates of Burnout ................................ 38  
2.16 Studies on Teacher Stress and Burnout ............... 42
6.1.4 Criteria utilised to select the four schools for Phase Three
6.1.5 Issues of Trustworthiness
6.1.6 Ethical Considerations
6.1.7 Description of the Interview
6.1.8 Field Notes
6.1.9 Data Analysis and Management
6.1.10 Maintaining Rapport and 'Being an Ethnographer'

6.2 Phase Three: Results
6.2.1 Description and General Impression of each school
6.2.2 Environmental Components:
   6.2.3 The Administrative Environment
   6.2.4 Green School
   6.2.5 Pink School
   6.2.6 Red School
   6.2.7 Blue School
   6.2.8 Summary: Administrative Environment
   6.2.9 The Social Environment
   6.2.10 Green School
   6.2.11 Pink School
   6.2.12 Red School
   6.2.13 Blue School
   6.2.14 Summary: Social Environment
   6.2.15 The Physical Environment
   6.2.16 Green School
   6.2.17 Pink School
   6.2.18 Red School
   6.2.19 Blue School

6.3 Summary Discussion

CHAPTER SEVEN - Reflective Analysis and Conclusion
7.0 Introduction
7.1 Integration and Reflection on the Findings
7.2 Meeting the Aims of the Research
7.3 Limitations of the Study
APPENDICES
1. Definition of Terms 225
2. Phase One: Survey of Teacher Stress 226
3. Phase Two: MBI Educator's Demographic Data Sheet 229
4. Phase Three: Interview Schedule 231
5. Administrative Environment Triangulation Checkpoints 235
6. Qualitative Audit 243
