Lee Whitehead. Move hands like clouds.
Move hands like clouds

A thesis submitted in partial fulfilment of the requirements for the degree of Master of Design, Massey University, Wellington, New Zealand: 2012

Lee Whiterod
Abstract

This thesis describes the processes and outcomes of my Master of Design Project, *Move hands like clouds*. It explores the connections between social sustainability, design, somaesthetics and Taoist Tai Chi. The designed outcome, a film, expresses the inclusive design of Taoist Tai Chi, its group activity within a community and its priority of focus on the internal origins and stance of its practice. It uses LED light drawings to trace the movements of multiple practitioners. It is an experience design response to the belief that we experience the world and our place in it through an integrated mind, body and spirit – all the senses – the rational and the intuitive. This stance is shared by the philosophies that underpin social sustainability, somaesthetics, Taoist Tai Chi, and design for sustainability. Mindful attitudes and behaviours with a focus on the wellbeing of the individual and the community is integral to these disciplines and to my film.
Acknowledgements

Thanks to all the colleagues, friends and family that have supported me during this research project.

Very special thanks to my supervisors Patricia Thomas and Karen Curley for their unstinting energy and generosity; Head of Institute Chris Bennewithe; to technical collaborators Paul Densem and Bernard Blackburn; to my Tai Chi community in the International Taoist Tai Chi Society, and my friends and participants in the film Ruth Morrish, Helen Morrish and Karin van Roosmalen; John Zonnevylle for helping with photography; my family: mum Trish, brother Steve, dad Gavin, Heather and Prue, my children Louis and Alfie for riding the emotional rollercoaster and most importantly, my partner Paul for his steady love, advise and patience.

The title of this research project – Move hands like clouds – is the name of a set of movements in Taoist Tai Chi. It is a gentle command, instruction or suggestion to take action, to make a movement. Clouds are soft and shifting, constantly in a motion of ebb and flow as they race across the sky, and float and linger and mingle through each other. They are an integral feature of our natural world. To move hands like clouds, is to move with an attitude of naturalness – softly, flowing, merging and joining with others, gently but with intention. These are the attitudes of thinking and doing, reflected in the spirit of this project.
