An investigation into ITP tutors’ understanding of policy and performance, to identify changes that have the potential to enhance teaching practice

A thesis presented in partial fulfilment of the requirements for the degree of

Doctor of Philosophy

in

Education

at Massey University, Palmerston North,

New Zealand

Christine Pritchard

2012
ABSTRACT

This thesis examines the reported views and experiences of tutors who work in the institutes of technology and polytechnics (ITP) sector in New Zealand. This phenomenographic based study focuses on elucidating these views and experiences in order to identify changes that have the potential to enhance tutors’ teaching practice. The choice of phenomenography as a methodology for recording and analysing individual viewpoints – and the variation in these viewpoints – is complemented by case study analysis, designed to present a more individualised interpretive perspective.

Although studies have been undertaken on the way in which academics perceive working in the university sector, little research has been undertaken on the way in which ITP tutors understand and evaluate their teaching practice. This research revealed variations in the way that tutors: experience teaching in the ITP sector; measure their own performance; and interpret and use policy to support their teaching practice.

Thirty-two volunteer tutors participated in semi-structured interviews conducted within four ITPs and across four subject areas, namely: trades, business, art and design, and foundation studies. Interview data was transcribed and analysed in order to present the findings of this research, which are presented in two parts.

First, the aggregated views and experiences of tutors are marshalled into five qualitatively different categories: understanding and modelling effective teaching; developing and growing; building relationships; enacting government and institutional policy; and adapting to contextual influences.

Second, the thesis presents case studies of tutors drawn from four different subject areas. Their data was included in the categories of description before being re-analysed and reported in the context of the five categories identified in the aggregated analysis.

The researcher has formulated eight recommendations from the findings. These recommendations are of a long-term nature, and have the potential to enhance teaching practice within the ITP sector.

This research provides new perspectives on tutors’ understanding and experiences of working within the ITP sector. It demonstrates that there is marked variation in the way in which they perceive and evaluate their performance; identifies potential gaps in their understanding and in the institutional environment in which they are employed; and offers recommendations for change.
ACKNOWLEDGEMENTS

I am deeply grateful for the support and encouragement of so many people throughout the period of my doctoral candidature. I warmly acknowledge you all. Without your faith, guidance and support my journey would have been much more arduous.

I would like to express my gratitude to the many people who have assisted me directly in the formulation of this thesis. I have been very fortunate in the intellectual guidance, advice and endorsement I have received from my two supervisors. My principal supervisor Associate Professor Nick Zepke has been a source of prompt, constructive suggestions, always interested in the research, and inspiring and encouraging. My co-supervisor Dr Paul Goodson has been exceedingly generous with his time in reviewing my work and offering insightful comments. Nick’s and Paul’s supportive, rigorous feedback has been invaluable in keep my writing focused and on track. They gave me tremendous confidence to carry on. Thank you both.

My gratitude is further extended to Dr Nicola Parker and Dr Jo McKenzie from the University of Technology in Sydney for their advice in helping me to understand the nature and scope of phenomenography as a qualitative research methodology.

Ian and Barbara Titter are thanked for their willingness to read and critique the chapters as I wrote them, which resulted in many lively debates about teaching in the ITP sector.

I gratefully acknowledge the generosity of the participants in this research, who gave generously of their time and openly shared their thoughts and feelings about their teaching practice.

I wish to thank Massey University library staff for their help in tracking down reference material.

Finally, I would like to thank my wonderful family, especially my husband Ian, for their unfailing support, faith in my ability to reach the finish line, and assistance in innumerable ways that helped me towards achieving my goal.
