SOME EFFECTS OF OXYTOCIN ON
IN VITRO PREPARATIONS
OF UTERINE MUSCLE

BY

HUMPHREY GETHIN REES D.V.M. N.D.A.

OF

Department of Animal Health
Massey University

A Thesis submitted in
Partial Fulfilment of the
Requirements for the Degree of
Master of Veterinary Science
of Massey University

October, 1967.

ACKNOWLEDGEMENTS

The candidate wishes to record his indebtedness to Professor E.D. Fielden, of the Clinical Science Department, whose continued guidance and interest made this study possible.

He wishes to acknowledge the advice of Professor D.A. Titchen, of the Physiology Department, who provided the laboratory equipment, and the encouragement of Professor D.S. Flux, Dairy Husbandry Department, who provided experimental facilities.

Special thanks are extended to the late Mr. A. Glenday, D.S.I.R., for assistance with statistical problems, and to Dr. R.A. Munford, of the Dairy Husbandry Department, whose helpful advice on biological problems and experimental design is gratefully acknowledged.

Thanks are due to Mr. B. Barnett for preparing physiological solutions, to Mrs. J. Lang for technical assistance, to Mr. G.H. Burns for photographing figures and to the Library staff for obtaining references. Thanks are also due to Organon Laboratories Limited, for providing the steroid hormones used in the main experiments.

The candidate wishes to acknowledge the advice of his colleagues at the Faculty of Veterinary Science, Massey University,

and in particular the advice of Dr. W.A.G. Charleston of the Department of Animal Health. Special acknowledgement with thanks is offered to Dr. D.B. Galloway and Mr. D.E. Johnston of the University of Melbourne, for constructive criticism of Chapter I.

This thesis was completed after appointment to the staff of the University of Melbourne. Professor Blood's forbearance with respect to time is gratefully acknowledged.

Finally sincere thanks to my wife for her encouragement and support.

Signed *H. G. Jones*

TABLE OF CONTENTS

	Page.
INTRODUCTION	1
CHAPTER 1. <u>REVIEW OF LITERATURE</u>	3
A. Uterine Physiology	3
I. Influences of the Nervous System on the Uterus	4
Summary of Nervous Effects	5
II. Hormonal Influences on the Uterus	5
1. Oestrogens and Progestogens	5
(i) Biochemical Actions of Oestrogens	6
(a) Water Content	6
(b) Ionic exchange	6
(c) Protein Synthesis	7
(d) Muscle Tonus	7
(ii) Effects of Progesterone	7
(a) General Effects	7
(b) Effects associated with Oestrogen	8
(c) Influence on parturition	8
2. Polypeptide Hormones	9
Oxytocin	9
(a) Posterior Lobe Function	9
(b) Oxytocin Action at Parturition	10
(c) Uterine Response to Oxytocin	11
(d) Species	12
(e) Stage of Cycle and Stage of Pregnancy	12
(f) Side Effects	13
(g) Ionic Influence	14
Summary of Hormonal Effects	14
B. Recording Uterine Activity <u>in vivo</u>	16
I. External methods	16
1. Recording of Electrical Potential	16
2. Recording of Mechanical Changes	17

	Page
II. Intra-abdominal methods	17
1. Electrical Potential	17
2. Pressure Changes	17
3. Telemetric methods	18
Summary of <u>in vivo</u> methods	18
C. Recording Uterine Activity <u>in vitro</u>	19
I. Partial Severance of Uterine Connections	19
II. Total Excision of the Uterus	19
Conclusion on <u>in vitro</u> methods	20
D. Physical Factors Influencing the Activity of Uterine Preparations <u>in vitro</u>	20
1. Temperature	21
2. Tension, isometric and isotonic contraction	21
3. Ionic status	23
(i) Effects of different ions	23
(a) Potassium ions	23
(b) Sodium ions	24
(c) Calcium ions	24
(d) Magnesium ions	24
(ii) Ionic inter-relationship	24
(iii) Ion-Hormone inter-relationship	25
(a) Oestrogens	25
(b) Progestogens	25
(c) Oxytocin	26
4. Technique	26
(a) Magnification of the lever	26
(b) Frequency and magnitude of stimulations	26
(c) Oxygen supply	27
(d) Source of energy	27
Summary of the physical factors affecting <u>in vitro</u> preparations	27
CHAPTER 2. <u>EXPERIMENTS WITH GUINEA PIGS</u>	29
A. Introduction	29
B. Techniques used in Experiments on Guinea Pigs	29

	Page
1. Housing and Feeding	30
2. Treatment	30
3. Examination of the Specimen	30
(i) Apparatus	31
(ii) Attachment of the Specimen	31
(iii) Administration of Oxytocin	31
4. Assessment of Response	32
5. Statistical Analysis	32
C. Experiment I	32
1. Method	33
2. Results and Conclusions	33
D. Experiment II	34
1. Method	34
2. Results and Discussion	35
E. Experiment III	39
1. Method	39
2. Results	40
3. Comment	41
F. General Discussion on Guinea Pig Experiments	42
G. Conclusion	44
CHAPTER 3. <u>PRELIMINARY EXPERIMENTS WITH THE RAT</u>	45
A. INTRODUCTION	45
B. TECHNIQUES USED IN EXPERIMENTS ON RATS	46
1. Housing and diet	47
2. Treatment	47
3. Examination of the specimen	47
(i) Apparatus	47
(ii) Ringer solution	48
(iii) Attachment of the specimen	49
(iv) Administration of oxytocin	50

	Page
4. Weight measurements	50
5. Assessment of response	50
6. Statistical Analysis	51
C. Experiment I	51
1. Method A.	51
(i) Method	51
(ii) Results	52
(iii) Comment	52
2. Method B.	53
(i) Method	53
(ii) Results	53
(iii) Comment	53
3. Conclusions from Rat Experiment I	54
D. Experiment II	55
(i) Method	55
(ii) Results	55
(iii) Comment	56
E. Experiment III	56
(i) Method	57
(ii) Results	58
Conclusions from Preliminary Experiments	58
CHAPTER 4. <u>FACTORIAL EXPERIMENTS WITH THE RAT</u>	60
A. Introduction	60
B. General Experimental Method	61
C. Factorial Experiment I	62
(i) Method	62
(ii) Results	62
(iii) Comment	63
D. Factorial Experiment II	64
(i) Method	64
(ii) Results	65
(iii) Joint Analysis of Factorial Experiments I & II	66

	Page
E. Alternative Methods of Measuring Response	66
I. Highest amplitude following administration	66
II. Area Measurement	68
(i) Method	68
(ii) Results	70
(a) Differences between contractions	70
(b) Effects of pretreatment	70
(c) Interaction effects	72
Summary of Area Measurement Findings	73
F. Variant of Factorial Experiment II	73
(i) Method	74
(ii) Analysis of results	74
(iii) Comment	76
Conclusions from Factorial Experiments	76
CHAPTER 5. <u>FURTHER COMPARISONS OF THE EFFECTS OF STEROID HORMONES ON THE RESPONSES OF THE UTERINE MUSCLE OF THE RAT</u>	77
A. Introduction	77
B. Experiment I.	77
(i) Method	77
(ii) Results	78
(iii) Comment	79
C. Experiment II.	79
(i) Method	79
(ii) Results	81
Conclusions from experiments in Chapter 5.	82

	Page
