A knowledge creation approach to environmental education in early childhood: Creating a community of learners

Cynthia Margaret Prince

This thesis is submitted in part fulfilment of the requirements for the Doctor of Education

Massey University
October 2006
Abstract

The study investigated the creation of a community of learners to integrate environmental education into early childhood curriculum. Two centres were used for the study (one kindergarten, one childcare centre). The participants were four kindergarten teachers, eight childcare staff, along with five focus group parents and six focus children from each centre. The qualitative research was conducted in two phases over one year. In phase one a case study approach was employed to allow teachers to gain confidence in the research process. During this time a two week environmental education integrated curriculum was implemented at both centres. At the conclusion of phase one a nascent community of learners was emerging. After a transition stage when the research was shared with the researcher, the teachers at both centres made the decision to lead the research in phase two using a participatory action research approach. This resulted in a growth in professional knowledge of research processes. The teachers aimed to collaboratively create a community of learners with the parents by valuing their involvement, social capital and funds of knowledge. A project approach to environmental education based on children’s environmental interests, the emergent curriculum, and the use of documentation was implemented at both centres. A conceptual artefact in the form of a community of learners was created. Bereiter’s knowledge creation metaphor and the sociological concepts of parental social capital and funds of knowledge guided the data analysis. Environmental knowledge creation by all participants in the community of learners was a significant finding. The research process resulted in all the participants (teachers, children and parents) creating their own environmental knowledge and gaining a heightened awareness of environmental education in early childhood curriculum.
Acknowledgements

In loving memory of Coralie Brooks 1948-2005: who loved God’s creation and shared her passion with young children.

To Sir Peter Blake and Rod Donald, two New Zealanders whose care and respect for the natural environment epitomised the tenets of Environmental Education.

My sincere thanks to the teachers, parents and focus children at Ocean Kindergarten and Sanctuary Childcare, without your participation this research would not have been possible. It was my privilege to work with you all.

I would like to acknowledge the three Js in my academic life, my first supervisor Professor Joy Cullen, my colleague Jillian Johnstone, and my second supervisor Dr Jenny Poskitt. Joy: thank you for your belief in me, your support and guidance so generously given over many years of academic study. My admiration for you as an academic, researcher and tireless advocate of early childhood education both internationally and in New Zealand has been a constant inspiration. Your contribution to the wider early childhood community and your quest for excellence has always motivated me to do my best. Jillian: thank you for your friendship and support, throughout my doctoral study. I have appreciated your insightful critique and academic debate. Due to my provincial location, I have often said that doctoral study is a lonely journey. Thank you for easing the ‘tyranny of distance’ from major academic institutions. Grateful thanks for your assistance with EndNote and all things technological. Jenny: thank you for your feedback, especially in the final stages of my thesis and for your insight as a parent of young children. I appreciated your in-depth methodological knowledge of action research, both theory and the lived reality. Your shared knowledge proved invaluable during the field work stage of the research. Speaking of which, I would like to thank Massey University for their financial support during this time.

My grateful thanks to the management of the Eastern Institute of Technology for their support, especially allowing me absence from work for uninterrupted study during the writing-up stage. I would also like to acknowledge my colleagues in the Faculty of Arts and Social Sciences for their encouragement and Ann for her cultural guidance.
Special thanks go to the Early Childhood teaching team, Cheryl, Helen, Gillian and Mary Anne whose words of encouragement, support and interest sustained me over many years of doctoral study.

Last but not least, I wish to extend my gratitude to my children Brendan, Glen and Leah and their families. Your loyalty, unconditional love and total acceptance of my academic endeavours have spurred me on. Leah, you get special mention for your word processing prowess that was often required when absolute deadlines were looming.

Finally, I want to acknowledge the prayers and support of my friends and relatives whose ongoing encouragement has culminated in the completion of this doctoral thesis.
# Table of contents

## Chapter One: Introduction
- Focus of the study 1
- A theoretical rationale for the study 1
- My position: myself as researcher 4
- Research questions: a background to choice 6
- Research questions: the final choice 7
  - Phase one 7
  - Phase two 7
- Thesis structure 8

## Chapter Two: Literature Review
- Introduction 11
- Environmental education: ideological and political considerations 11
  - Environmental ideologies 12
- Approaches to environmental education 13
  - Environmental education approaches in early childhood education 14
- Pedagogy: meaning and definition 16
  - Pedagogy in the New Zealand context 18
- Curriculum: *Te Whāriki* 19
- Integrated curriculum 23
  - Theoretical underpinnings 23
  - Inclusive of all children and connected to their lives 23
  - Challenging to children and adults 24
  - Communal and collaborative 24
  - Courageous 25
  - Integrated curriculum: *Te Whāriki* 25
- Teachers’ knowledge about curriculum 27
  - The project approach 27
  - Documentation: socio-cultural assessment 29
- Current perspectives on learning 30
- A community of learners 32
Sociological concepts 35
  Social capital 35

**Chapter Four: Environmental Education: The Way We Were**

**Introduction** 97

**Kindergarten children’s first interview** 97

  **Children’s baseline knowledge of the natural environment** 97

**Kindergarten parents’ first interview** 99

  **Parents’ knowledge and awareness of environmental education** 99

  **Parents’ attitudes towards the environment** 101
Parents’ action: recycling 101
Parents’ influence on children’s knowledge 103
Kindergarten teachers’ first interview 105
Childcare children’s first interview 109
Children’s baseline knowledge of the natural environment 109
Childcare parents’ first interview 110
Parents’ knowledge and awareness of environmental education 110
Parents’ attitudes to the environment 111
Parents’ action – recycling 112
Parents’ influence on children’s knowledge 112
Childcare: teachers’ first interview 113
Summary of the first kindergarten and childcare interviews 116

**Chapter Five: Knowledge Creation: First Steps in Environmental Education**

Introduction 118
“A sailor went to sea, sea, sea” 118
   Environmental topic of interest at the kindergarten: the rocky shore 118
The EEIC: an integrated curriculum 119
Knowledge creation: children’s theories 119
Knowledge creation: butterflies 120
Knowledge creation: the rocky shore 121
Knowledge creation: habitats 123
Kindergarten children’s second interview 123
Integrated curriculum environmental concepts 126
   Pollution 126
   Conservation 127
Children’s environmental learning 128
Emergent curriculum 128
Potential parental social capital and funds of knowledge 129
Teaching strategies 130
Kindergarten parents’ second interview 130
   Funds of knowledge 130
   Social capital 132
Kindergarten teachers’ second interview 133
Chapter Six: Empowerment: The Teachers Take Charge

Introduction 151
Decision time: phase two 151
Participatory action research in practice 153
Researching environmental topics of interest 154
Kindergarten: participatory action research 154
  Empowerment: the project approach 154
Collaboration: a project approach to a community of learners 156
  The sea life project 156
  Aquarium excursion: desperately seeking Nemo 156
  Henrietta’s newsletter 5.7.04 157
  Documentation 158
Emergent curriculum: kindergarten 160
Chapter Seven: Collaboration and a Community of Learners

Introduction

Collaboration in a community of learners

Children’s learning: a socio-cultural approach

Inter-subjectivity

Children’s learning: a knowledge creation approach

Creating a community of learners: parental collaboration

Parental involvement in a community of learners: teacher perspective

Excursions

Documentation

Children’s environmental interests

Parental involvement and contribution

Parental involvement: parent perspective
Chapter Eight: Discussion and Conclusion

Introduction 205
Baseline environmental knowledge 205
Knowledge creation 206
   A socio-cultural/knowledge creation approach 206
   Te Whāriki: a critique 208
Collaborative participation 210
A community of learners 212
Relationships 215
Implications for teachers 216
Reflections on methodology 220
   Contributions of the study 220
   Limitations of the study 221
Future directions for research 221
Conclusion 223
