Urban Growth Management in New Zealand

What factors have influenced urban growth management policies in the Waikato and Bay of Plenty regions over the period 1986 to 2009?

A thesis presented in partial fulfilment of the requirements for the degree of

Master of Resource and Environmental Planning

at Massey University, Manawatu, New Zealand.

Kate Pascall

2013

ACKNOWLEDGEMENTS

I would like to thank Dr Matthew Henry for his continuous supervision and support over the last 2 years. Thank you for the time and effort spent reviewing chapters and consistently meeting with me via Skype to discuss the ins and outs of this project. Without this support this thesis would not have been possible.

I would also like to thank my parents and my sister, Laura. Your support and encouragement over the past two years have kept me going, and you have all boosted my motivation at various points throughout the project. Laura, it has been so great undertaking this project at the same time you are completing your own thesis, celebrating the little milestones and seeking advice and reassurance throughout this journey.

Finally, I would like to thank my colleagues and Managers at Hastings District Council for allowing me the opportunity to complete my Master's degree. Thank you for granting me a couple of hours off work each week to meet with Matt and 'chip away' at this thesis. This has been invaluable to the completion of this project.
