Subject content knowledge in early childhood curriculum and pedagogy

A thesis presented in partial fulfilment of the requirements for the degree of Master of Education (Early Years) at Massey University, Palmerston North, New Zealand.

Helen Hedges
2002
ABSTRACT

In primary and secondary teaching, subject knowledge is deemed a critical aspect of teachers' knowledge base and curricula documents. However, a common feature of early childhood education is an underemphasis of the subject content knowledge of teachers and children. Teacher beliefs have been established as perhaps the most important determinant of quality teaching and learning interactions and teacher professional growth (Kagan, 1992a). Underpinned by contemporary sociocultural theory and an interpretivist methodology, this thesis explores the beliefs of teachers, parents and four-year-old children in one public kindergarten about subject knowledge, and the influence of these beliefs on the curriculum and pedagogy children experience. The beliefs held are explored through the mechanism of a shared social and cultural event, an excursion, as a framework for the study.

Teachers and parents expressed clear beliefs about the importance of subject content knowledge. Children's beliefs were also revealed implicitly through their interactions, and supported the adults' views. However, subject knowledge was underemphasised in the majority of teaching interactions unrelated to the excursion and in curriculum documentation within the kindergarten. Yet the evidence supports that children's thirst for subject content knowledge was a motivational linchpin in their socially-constructed and inquiry-based learning experiences. The meaningful responses of the teachers were crucial to positive learning outcomes and were based on their own professional knowledge of subject content, pedagogical approaches consistent with early childhood philosophy, and the children as learners.

The study's findings are analysed from two perspectives. Firstly, using four themes as a conceptual framework, categories of teacher knowledge are explored for their construct validity in early childhood education. Secondly, the findings of the study are interpreted in relation to sociocultural theory. The conclusion argues for enhanced awareness of subject knowledge in early childhood learning, teaching and curriculum in Aotearoa/New Zealand. While maintaining a play-based and integrated philosophy, the subject knowledge of both teachers and children requires more explicit attention. Teachers' subject knowledge is crucial for extending children's learning. There is potential for inquiry and reflection on beliefs and practices with regard to subject knowledge within sociocultural notions of learning communities.
ACKNOWLEDGEMENTS

The participants

♦ Particular thanks to the three teachers: Nicola Billman, Catherine Geddes and Julie Sandilands.

My beliefs and practices were greatly enriched by your generous participation in this study.

Massey University College of Education

♦ Sincere thanks to my supervisors, Joy Cullen and Jenny Boyack, whose knowledge, enthusiasm, experience and support have been invaluable. Supervision and critique have been thorough, challenging and timely. Joy and Jenny provided comprehensive and focused responses to my various inquiry processes on an extensive learning journey.
♦ The Graduate Research Fund and the Department of Learning and Teaching each contributed much-appreciated funds towards the cost of the research.
♦ The distance library service provided prompt responses to my frequent requests.
♦ The Massey University Human Ethics Committee reviewed and approved this project - PN Protocol 01/38. On March 5, 2002, permission to credit the kindergarten and teachers by naming them in the acknowledgements was received.

Family, friends and colleagues

Along with the participants and my supervisors, the following people formed my personal learning community. Their faith in my resilience and confidence in me sustained me over the judder bars that appeared on the road during the journey.

♦ Paul, Rebecca and Christopher Hedges, whose love and support enabled me to achieve this goal.
♦ Lorraine McLeod, Winnie Duggan, Kris van der Beek, Diane Daly and Nancy Bell, whose interest and encouragement were greatly appreciated. Special thanks to Winnie and Lorraine for critiquing the final draft.
♦ Belinda Yourn, who allowed me to borrow her high-quality audio-taping equipment.
♦ Julie Seymour, who transcribed the focus group interviews, and provided other word-processing and formatting advice and assistance.

**Chapter One: INTRODUCTION**

1. Beliefs, curriculum and pedagogy
   - Challenges for early childhood education
   - Overview of thesis

**Chapter Two: LITERATURE REVIEW**

4. Perspectives on knowledge
   - Sociocultural perspectives
   - A synthesis

6. Teachers' knowledge base
   - Categories and models of teacher knowledge
     - Subject content knowledge
   - The knowledge base of early childhood teachers
     - Challenging the developmental approach
     - A sociocultural perspective

12. Contemporary views of learning in early childhood education
    - Learning communities in sociocultural theory

13. Children's knowledge
    - Children's prior subject knowledge

16. Beliefs in teaching and learning
    - Teacher beliefs
      - Teacher beliefs about developmentally appropriate practice
      - Teacher beliefs about subject knowledge
      - Teachers’ confidence in and orientation toward subject knowledge
      - Polarised views in the early years
    - Parents' beliefs
      - Parents’ perspectives on curriculum and pedagogy
Children’s beliefs 28
Children’s perspectives on curriculum and pedagogy 29

Curriculum in early childhood education 30
Underpinnings of early childhood curricula 32
The popular discourse of early childhood curriculum 33
Early childhood curriculum from a sociocultural perspective 33
Excursions in early childhood curriculum 35
A pedagogical paradox in the early years? 36
Concerns, contrasts and contradictions 39

A way forward? 41
Research problem 43
Rationale for this study 44

Chapter Three: METHODOLOGY 46
Research questions 46
Research design 47
Interpretivist research 47
Case study 48
The research setting 49
The participants 50
The excursion 51

Ethical considerations 53
Ethical research with adults 53
Involving children in research in an ethical manner 54
The presence of the researcher 55

Data gathering techniques 57
Focus groups 57
Parent and teacher diaries 60
Fieldnotes 60
Curriculum documentation 61

Validity and reliability 61
Triangulation 62
Generalisability 62
Chapter Four: RESULTS: CATEGORIES OF TEACHER KNOWLEDGE

Conceptual framework

Subject content knowledge
- General knowledge
- Specialised knowledge

Links between beliefs and practices
- General knowledge in teaching interactions
- Specialised subject knowledge in teaching interactions
  - Orca’s specialised subject knowledge
  - Penguin 2 extends her knowledge
  - Orca and Shark’s technology knowledge
- Subject knowledge in spontaneous teaching
- The impact of the research
- Links between beliefs and curriculum documentation
  - Children’s portfolios
  - Curriculum based on Te Whāriki

Knowledge of pedagogy and philosophy
- Play as pedagogy

Links between beliefs and practices
- Children’s play and interests
- Pedagogical content knowledge

Knowledge of learners

Links between beliefs and practices

Knowledge of context
- Group size
The kindergarten/junior primary nexus  

**Links between beliefs and practices**  

**Summary**  

- Teachers', parents' and children's beliefs about subject content knowledge  
- Informing curriculum and practice  
- Conclusions  

Chapter Five: RESULTS AND DISCUSSION: A SOCIOCULTURAL ANALYSIS  

**Socially-constructed learning in communities**  

- Children's social construction of knowledge  
- The excursion  
- Teachers' and parents' learning  

**Relationship-based pedagogy in early childhood education**  

- Teachers and children  
- Parents and children  
- Learning with child peers  
- The researcher and children  

**Maximising children's socially-constructed learning**  

- The significance of dialogue  
- Learning and teaching through play  
- Pedagogical approaches  
- Constraints on maximising children's learning  
- Teachers' subject knowledge confidence  
- Group size  
- Teacher-parent partnerships  

**Teachers' knowledge base re-thought**  

- Teachers' professional knowledge  
- Teacher beliefs  

**Early years contexts: Continuity and progression**  

- Pedagogy  
- Curriculum  

**Summary**
Chapter Six: DISCUSSION AND CONCLUSIONS

Knowledge in a sociocultural curriculum
Subject knowledge: A missing paradigm in early childhood education
  Implications for curriculum and teaching practice
  Implications for policy
  Implications for teacher education
  Implications for professional development
Summary of study and contributions to the literature
  Subject knowledge is critical
Limitations of the study
  Further research
A way forward

Epilogue
