CAREER TRANSITION:
THE SPORT RETIREMENT EXPERIENCES
OF NEW ZEALAND ATHLETES

A thesis presented in partial fulfilment of the
requirements for the degree of

Master of Science
in
Psychology

at Massey University, Albany,
New Zealand

Andrea J. Smith
1999
This study explored the sport retirement experiences of seventy-four New Zealand athletes who were identified as having retired from high performance sport participation. During the peak of their sport careers, these athletes achieved regional, national, or international competitive representation. The Athlete Career Transition Inventory, a 47-item instrument, was developed for this study. The inventory was divided into sections that examined: motivation for sport participation, reasons for retirement, adjustment to retirement, pre-retirement career planning, social networks, athlete identity dimensions, and life satisfaction. Analysis indicated the majority of athletes adjusted to their sport retirement with minimal difficulty. Although significant differences between the gender groups were only observed for sense of personal control at transition $\chi^2(2, n = 72) = 6.66, p = .036$, there appear to be differences between male and female athletes with regard to social support prior to transition. Neither goal achievement nor the causal factors involved in the retirement decision predicted the quality of the athlete’s adaptation experience. Practical implications for coaches and sport bodies are discussed.
The process of researching and writing this thesis has provided me with many experiences and challenges. I would like to take this opportunity to thank those people whose unique contributions made the completion of my Masterate thesis possible.

Firstly, I would like to express my sincere gratitude to Dr Jennifer Stillman for her supervision, support, encouragement, and patience throughout my thesis year.

I would like to thank Sue Dennehy and Glenda Rodger at Sport North Harbour for their help with athlete contacts. I would also like to acknowledge those athletes who took the time to contribute to this research.

I am grateful to Simon and Shirley Cairns for their care, attention, and support over the past year, and to Auntie Yvonne for her heartening advice and the late nights spent proof reading.

Finally, I would like to thank my parents, Carl and Dianne for the unwavering support and encouragement they consistently provide me with.

Thank you all very much.

## INTRODUCTION

1

The Research

3

## CHAPTER ONE: SPORT RETIREMENT: AN ISSUE FOR ATHLETES?

5

Is Retirement From Sport an Issue for Athletes?

5

- Collegiate athletes

6

- Elite amateur and professional athletes

8

- Impact of sport disengagement on life satisfaction

10

Theories and Models of Athlete Retirement

11

- Social gerontology: Activity, Continuity, and Disengagement theories

11

- Thanatology

13

- The Kübler-Ross grief response

14

- Retirement as a transition

15

- Schlossberg’s model for analysing human adaptation to transition

16

- The rebirth model

17

- Conceptual models of adaptation to career transition

18

- Summary

21
CHAPTER TWO: A CONCEPTUAL MODEL OF ADAPTATION

Causes of Career Termination
- Involuntary reasons for retirement
- Voluntary reasons for retirement

Personal and Psychological Influences
- Developmental experiences
- Athlete identity
- Social identity
- Perceptions of control
- Goal achievement
- Tertiary contributors

Availability of Resources
- Coping strategies
- Social support
- Pre-retirement planning

Quality of the Career Transition
- Career transition distress

Post-retirement Interventions
- Summary

CHAPTER THREE: THE PRESENT STUDY

Rationale
- Justification
- Aims and objectives

Research Design
- Participant recruitment
- The study sample
Ethical considerations 52

Measures 53
  Questionnaire development 53
  Instrument description 55
  Summary 58

CHAPTER FOUR: RESULTS SECTION 60

Analytic Strategies 60

Data Analysis 62
  Demographic information 62
  Current sporting participation 65
  Previous sport involvement 66
  Post-sport adjustment 68
  Planning for life after sport 73
  Open-ended questions 78
  Life satisfaction 80

CHAPTER FIVE: DISCUSSION 83

Objectives 83
  The adjustment experience 83
  Adjustment predictors 85
  Life satisfaction 86
  Programme preference and delivery 88
  Personal control 89
  Social support 91

  Recommendations for Coaches and Sporting Bodies 95

Research Limitations 98
