Abstract

This qualitative research project explored how a student music therapist utilised goal-oriented processes to support young people with autism spectrum disorder throughout their course of music therapy. Inductive thematic analysis of selected literature relating to goals in music therapy developed an initial framework of what goal-oriented processes could include. The student music therapist’s clinical data (including session notes, monitoring sheets, client reports and reflective journal entries) was then coded through deductive secondary analysis, from which five key themes were formed. The findings indicated that clients’ goals were supported by: employing a client-centred philosophical approach; nurturing therapeutic relationships; collaborating with clients and their caregivers; utilising the referral, assessment and review processes; and observing and documenting clients’ development. These goal-oriented processes helped to support goals that were meaningful for the clients and their caregivers. Themes were explored in detail using a case vignette to illustrate and provide a context for the findings. Although the context-bound qualitative nature of this research project limits its generalisability, it attempts to provide insight into what goal-oriented processes in music therapy might include, encouraging other music therapists to consider how they utilise goals in their own practice.

Thank you to –

The providers of the Sir Roy McKenzie Scholarship and Anonymous Music Study Grant, for making it possible for me to perform this research in another city

Dr. Sarah Hoskyns, for your patience, wisdom, guidance, and most of all, time

Dr. Daphne Rickson, for keeping music therapy alive for me

My classmates, for your genius and your madness

The Whānau at my placement facility, for pushing me forward but always having my back

All of the young people and their incredible supporters, for putting your trust in me and letting us explore music together

Mum and Dad, for showing the way, and Daniel, for leading the way

Georgia, for everything

For Lewis
