

Strengthening of National Productivity Organizations (NPOs) Assistance Program (SNAP).

A Comprehensive Study of the Status and Needs of National Productivity Organisations and the Asia Productivity Organisation.

5 June 2015

Contributors

The contributors to this project were many from the APO and its member countries. The roles and responsibilities of the prime people involved are described below. Thanks to ALL.

Commissioners of the Research and Liaison

Mari Amano, Secretary-General, Asian Productivity Organisation
Naoki Ogiwara, Director, Research & Planning Department, Asian Productivity Organisation
Jose Elvinia - Program Officer, Research & Planning Department, Asian Productivity Organisation

Chief Expert

Dr Robin Mann, Director, Centre for Organisational Excellence Research (COER), New Zealand

National Experts

Mr. Mohammad Abdul Musabbir, Senior Research Officer, National Productivity Organisation (NPO),
Ministry of Industries, Bangladesh
Mr. Yea Bunna, Deputy Director General (DDG), General Department of Small and Medium Enterprises
(SMEs) and Handicraft, Ministry of Industry and Handicraft, Cambodia
Mr. Kamlesh Shashi Prakash, Director, National Training & Productivity Centre Fiji National University, Fiji
Ms. Nageswaran Srimati, Freelancing Management Consultant, India
Dr. Mochamad Moedjiman, Chairman, National Training Council of Indonesia Ministry of Manpower and
Transmigration, Indonesia
Dr. Firouzeh Khalatbari, Chief Advisor, National Iranian Productivity Organization, Islamic Republic of Iran
Dr. Keomarakoth Sidlakone, Deputy Director General Department of Small and Medium Enterprise
Promotion (DOSMEP), Ministry of Industry and Commerce, Lao People's Democratic Republic
Mr. Mah Lok Bin Abdullah, Principal Consultant, Railer Management Services, Malaysia
Ms. Enkhzul Baatarkhuu, General Manager / Expert, Mongolian Productivity Organization, Mongolia
Dr. Bhavani P. Dhungana, Advisor, Institute for Integrated Development Studies (IIDS), Nepal
Ms. Rabia Jamil, Head of International Relations National Productivity Organization, Pakistan
Mr. Carlos A. Sayco, Jr., Vice President, Development Academy of the Philippines (DAP), Philippines
Mr. Upali Marasinghe, Secretary, Ministry of Education, Sri Lanka
Ms. Parichat Sanoi, Productivity Research Department, Productivity Researcher, Thailand Productivity
Institute, Thailand
Ms. Dang Thi Mai Phuong, Service Development Manager, Vietnam National Productivity Institute,
Vietnam

Chief Expert Assistant and Senior Researcher

Musli Mohammad (Universiti Tun Hussein Onn Malaysia)

Researchers for Data Collection and Analysis

EXECUTIVE SUMMARY

The objective of this project was *"To assist the Asian Productivity Organisation (APO) and National Productivity Organizations (NPOs) undertake a Needs Assessment to enable effective productivity-related strategies and programs to be developed and implemented at a National and APO-wide level"*.

The research was commissioned by the APO Secretariat and officially started on 18 February 2014 and concludes with the publication of this report on 5 June 2015.

This report had the input of 16 NPOs (Bangladesh, Cambodia, Fiji, India, Indonesia, Iran, Lao, Malaysia, Mongolia, Nepal, Pakistan, Philippines, Republic of China, Sri Lanka, Thailand and Vietnam). A Chief Expert (supported by 7 researchers) and 16 National Experts coordinated the research and analysed the data provided by 372 staff, 390 customers and 130 NPO partners.

Data was obtained on Country Trends, NPO Strategy, Systems and Services, NPO Performance Results, NPO SWOT Analysis and APO Strategy and Assistance.

The results reflect the diversity of APO members. For example, the number of staff employed by NPO members varied from 16 in Nepal and Mongolia to 670 people in Sri-Lanka. Malaysia had the most training course attendees in 2013 with 130,517 people trained whilst some countries recorded less than 20 people trained. Some NPOs were almost 100% government funded whilst others received no government funding. Whilst the NPOs all had specific challenges and opportunities there was agreement with the APO's current vision and mission, and most indicated that "Training courses, Technical expert services, Development of demonstration companies / organizations and In-country programs" had the most impact.

The report provides many recommendations to assist the APO and NPOs such as encouraging more best practice sharing on institutional strengthening and capability building (to share strategies, organizational structure, infrastructure, funding models, staffing levels/ratios and approaches to governance, leadership, human resources, customer focus, operations and systems, and measurement, analysis and knowledge management) and on service delivery (to share success stories on how productivity-related services are being delivered). For both the APO and NPOs more needs to be done to raise the profile of productivity including simple steps such as the improved use of social media and improving the design and content of NPO websites.

The report endorsed the need for an APO Roadmap which has a clear strategy and targets. Currently, 3 or more APO members are in the top 20 countries for 10 of 18 reputable international performance metrics but none were in the top 20 for Labour Productivity. Clear stretch targets for key performance metrics can help the APO to develop appropriate strategies and obtain alignment of NPO strategies. Some NPOs require help in developing their own National Plans and Roadmaps.

This report contains a wealth of information which can be used as a reference guide and for benchmarking purposes for many years to come.

CONTENTS

The report is structured into the following sections:

	Page No.
Executive Summary	2
Contents	3
1. Introduction	4
2. Research Methodology	5
3. Findings	9
4. Recommendations	19
6. Conclusion	22
Appendix 1 - Country Data and Trends	24
Appendix 2 - NPO Strategy, Systems and Services	50
Appendix 3 - NPO Performance Results	256
Appendix 4 - NPO SWOT Analysis	281
Appendix 5 - APO Strategy and Assistance	326

1. Introduction

This report shares the research data obtained from a project to assist the APO and NPOs undertake a needs assessment.

The official objective was:

To assist the Asian Productivity Organisation (APO) and National Productivity Organizations (NPOs) undertake a Needs Assessment to enable effective productivity-related strategies and programs to be developed and implemented at a National and APO-wide level”.

With a scope of:

- a. To develop a methodology for a Needs Assessment taking into consideration the mission, objectives, and mandates of NPOs and the purpose of the APO;
- b. Review of APO programs for NPO capability building and institutional strengthening;
- c. Review of the performance of each NPO including profiling of resources and programs;
- d. Identifying the core competencies of each NPO including strengths, weaknesses, opportunities, and threats;
- e. Identifying the emerging roles and challenges of NPOs resulting from sociopolitioeconomic changes; and
- f. Identifying the organizational development, capacity building, and institutional support needs of NPOs to lead productivity-related initiatives.

The research was commissioned by the APO Secretariat and officially started on 18 February 2014 with the appointment of the Chief Expert and concludes with the publication of this report on 5 June 2015.

The body of this report describes the Research Methodology, Findings, Recommendations and Conclusions. The Appendices show the full set of research data obtained from NPO members.

2. Research Methodology

A chief expert and 15 national experts were appointed to undertake the research. The National Experts were from: Bangladesh, Cambodia, Fiji, India, Indonesia, Iran, Lao, Malaysia, Mongolia, Nepal, Pakistan, Philippines, Sri Lanka, Thailand and Vietnam. The Republic of China (ROC) joined the study at a later date, making a total of 16 countries.

The project commenced with the chief expert devising the research methodology with input from the APO. This was followed by a coordination meeting on 28/29 May 2014 involving all National Experts to finalise the methodology and the design of the research tools. Each national expert was responsible for carrying out the research in his/her country following the proposed methodology. The chief expert's role, in addition to devising the research methodology, was to provide technical support to the national experts, review current APO programs, and prepare a final research report with specific recommendations for the APO and NPOs.

To ensure consistency of data for comparison and aggregation purposes a National Expert Survey and four Stakeholder Surveys were developed with clear guidelines on how the data should be collected. These were accompanied by a mapping spreadsheet to show how the questions from the Stakeholder Surveys were linked to the National Expert Survey. The Stakeholder Surveys were designed so that they could be sent by email or posted to respondents for completion or used as a basis for a one to one structured interview.

The four Stakeholder Surveys and the number of surveys that were targeted for completion are described in Figure 1.

Figure 1 – Types of stakeholder surveys and survey completion guidelines

Stakeholder Surveys	Minimum number of surveys to be completed
NPO CEO/Directors	At least 75% of CEO/Directors should complete this survey.
NPO Staff (Professional & Technical only)	At least 20 surveys completed in total or at least 50% of staff should complete this survey
NPO Customers (Enterprises)	At least 20 surveys completed in total or at least 50% of customers should complete this survey
NPO Partners (Funders/ Training Providers/ Consultants/ Employer Groups/ Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board and the APO)	At least 3 surveys completed or at least 50% of key partners should complete this survey

National Experts were also encouraged to review:

- The NPO's and APO's vision, mission and strategy
- Services provided by the NPO/APO described on websites/documents
- Policies and procedures
- Feedback received by clients (customer surveys, training assessment forms)

- Employees engagement/satisfaction survey reports
- Project reports
- Audit reports
- Correspondence/agreements with Partners
- 2007 Needs Assessment Report
- A slide set provided by the Chief Expert showing country performance on over 20 international performance metrics.

In addition, for Section 4 of the National Experts Survey the National Expert coordinated a strengths, weaknesses, opportunities and threats (SWOT) analysis with senior executives from the NPO. This meeting involved a review of the collected data and a discussion to identify the NPO's key strengths, weaknesses, opportunities and threats in relation to the government/partners, private sector and public sector.

Information gleaned from the Stakeholder Surveys and the above sources assisted the National Experts to complete the National Expert Survey which was then sent to the Chief Expert for analysis. Of prime importance was that the National Experts Survey was completed accurately, bearing in mind potential translation issues, and represented the views of NPO stakeholders rather than the National Experts' personal views. To check project progress and the accuracy of survey completion there was regular reporting between the National Experts and the Chief Expert. Figure 2 describes the research plan and level of reporting.

Figure 2 – Research activities and timetable

Completion date	Activity	Responsibility
10 March 2014	Outline of the role/responsibilities of National Experts and issue of the <i>preliminary</i> SWOT Analysis exercise for completion.	Chief Expert/APO
1 April 2014	National experts appointed and role/responsibilities are assigned.	NPOs/APO
1 May 2014	Identification and review of currently available data/information relevant to the SWOT Analysis and Needs Assessment.	National Experts
15 May 2014	Completion of a <i>preliminary</i> SWOT Analysis by each country. Completed SWOT Tables sent to the APO in preparation for the	National Experts

	Coordination Meeting.	
15 May 2014	Draft design/outline of Needs Assessment Survey/Stakeholder Surveys/Report Template to be reviewed/improved at the Coordination Meeting	Chief Expert
28/29 May 2014	Coordination Meeting, Tokyo, Japan.	APO, Chief Expert, National Experts
23 June 2014	Final version of Needs Assessment Survey/Stakeholder Surveys/Report Template provided to National Experts	APO, Chief Expert
1 July 2014	Development of a strategy for the collection of data relevant to the Needs Assessment. This to include who to contact/survey and by when and which Stakeholder Survey(s) to use.	National Experts
8 August 2014	Preliminary completion of the National Experts Survey based on current data availability. Submitted to the Chief Expert	National Experts
27-29 August 2014	APO Liaison Officers' meeting, Tokyo, Japan. Initial findings/data from the Needs Assessment will be reviewed.	APO, APO Liaison Officers, Chief Expert
1 December 2014 (extended until 26 December)	Final completion of the National Experts Survey. Submitted to the Chief Expert.	National Experts
5 January 2015	Review of survey data, checking for correct completion	Chief Expert
20 January 2015	Resubmission of surveys	National Experts.
2 February 2015	Compilation of data in spreadsheets ready for checking by National Experts	Chief Expert
28 February 2015	Resubmission of data	National Experts

9 March 2015	Compilation of information into Appendices for review by APO	Chief Expert
15 April 2015	Draft Version of APO Needs Assessment Analysis Report issued to the APO and National Experts for review	Chief Expert
5 June 2015	Final Version of APO Needs Assessment Analysis Report issued to the APO and all APO members.	Chief Expert

3. Findings

This section summarises the findings from the research. The full set of findings are shown in the Appendices.

Within each Appendix the survey questions are shown, followed by the aggregated responses in data and graphical format.

From the 16 NPOs that participated 372 CEO/Directors/Staff, 390 customers and 130 partners contributed their opinions.

A summarised selection of findings from each Appendix are presented below:

Appendix 1: Country Data and Trends.

What does it show?

This Appendix shows:

a) the performance of each country with respect to 22 economic and societal metrics with data provided by reputable independent sources:

.

1. Population
2. Population growth rate
3. Population aged 65 and above (% of total)
4. Labour productivity
5. Gross domestic product (GDP)
6. GDP per capita
7. Global Competitiveness,
8. Ease of doing business,
9. Information Technology – Networked Readiness Index
10. Education of 15 year old students
11. Human development index
12. Innovation
13. Perceived corruption in the public sector
14. Political stability and Absence of Violence
15. Government effectiveness
16. Wellbeing of older people
17. Happiness index
18. Homicide rates
19. Life expectancy
20. Environmental performance
21. Energy sustainability index
22. The Global Energy Architecture Performance Index

b) the megatrends that the CEOs/Directors of NPOs selected as likely to have the most impact on productivity in their country over the next five years.

How should the data be used by NPOs?

- The data shared on the 22 economic and societal impacts should be reviewed by NPOs to assist with their SWOT analysis and for setting of future targets. NPOs are encouraged to contact countries with higher levels of performance to learn from them.
- NPOs should ensure that they have strategies in place to address or take advantage of the 5 mega trends they have identified as having most impact on productivity over the next 5 years. In addition, NPOs may wish to re-assess their 5 most important mega trends based on the opinions provided by other countries.

How should the data be used by the APO?

- The APO may wish to calculate the average performance of NPOs with respect to the 22 economic and societal measures, and set future targets and strategies for those measures it aims to have an impact on.
- The APO should ensure it has strategies in place to address or take advantage of the 5 mega trends that have been identified as having most impact on productivity over the next 5 years.

Selected Findings (View the Appendix for full findings)

- 3 or more APO members were in the top 20 countries for 10 of 18 reputable international performance metrics (the 18 metrics referred to were from the above list of 22 metrics, the 4 measures excluded were population, population growth rate, population aged 65+ and GDP as these are not productivity based and/or were encompassed in the other measures).
- No APO members were in the top 20 for Labour Productivity, Happiness Index, Energy Sustainability Index or the Global Energy Architecture Performance Index.
- The mega-trends identified as having most impact on productivity over the next 5 years were:
 - Liberalisation of global trade and financial markets (indicated by 63% of NPOs)
 - Convergence of technologies and research fields (indicated by 63% of NPOs)
 - Increasing energy consumption (indicated by 50% of NPOs)
 - Green productivity: scarce resources and increasing commodity prices lead to techniques that increase energy and resource productivity (indicated by 38% of NPOs)
 - Decreasing costs for communication and transportation (due to technical innovations such as the internet) enabling more international trade (indicated by 38% of NPOs)
 - Government accountability due to a more informed electorate (indicated by 38% of NPOs)

Appendix 2: NPO Strategy, Systems and Services

What does it show?

This Appendix provides information on each NPO's strategy, systems and services. Data and opinions of the NPO's CEO/directors, staff, customers and partners were sought on 32 questions.

How should the data be used by NPOs?

- The data provides a good overall assessment of each NPO's strategy, systems and services from the perspectives of stakeholders. Differences in opinion by stakeholder groups should be investigated to find out why there is this difference as it could mean the strategy, system or service or communication channels with the stakeholder group should be improved.
- The data will assist NPOs in benchmarking their strategies, systems and services with other NPOs. NPOs are encouraged to contact higher performing NPOs to learn from them in areas such as the provision of high quality services and revenue generation.

How should the data be used by the APO?

- The data will enable the APO to have a clearer understanding of each NPO's strategy, systems and services. This will enable the APO to provide a tailored approach to meet each country's needs.
- The data will enable the APO to identify the comparative strengths and opportunities for improvement for each NPO. This will enable the APO to facilitate the sharing of knowledge between high and low performers.

Selected Findings (View the Appendix for full findings)

- All NPOs have a stated vision and mission. Three NPOs (Nepal, Pakistan and Vietnam) do not have stated organisational values.
- There is a large variation in the number of people employed by each NPO from 16 in Nepal and Mongolia to 670 people in Sri-Lanka.
- There is a large variation in the ratio of support staff to professional/technical staff between NPOs with Sri-Lanka reporting it has 82.75 professional/technical staff to 1 support staff and Thailand reporting it has 0.48 professional/technical staff to 1 support staff.
- There is a large variation in the number of part-time staff used by NPOs with Fiji employing 131 part-time staff and 9 countries employing no part-time staff.
- The most popular training for professional/technical staff was Presentation Skills Training (67%) followed by Business Excellence Training (50%) with the least popular being Governance Training (33%).
- Based on budget spend most NPO work was conducted in the Manufacturing Sector (26%) and Information and Communications Sector (11%).
- On average NPOs assisted the Private Sector 45% of the time followed by the Public Sector 41% of the time.
- Fiji has 65 training rooms that can accommodate up-to 1350 people while 4 NPOs have no training rooms.
- Fiji owns 9 buildings while 4 countries own none.

- 7 NPOs (Fiji, Lao, Malaysia, Philippines, ROC, Thailand and Vietnam) are certified to ISO9001 (Quality Management System)
- 2 NPOs (Nepal and Mongolia) do not have any Professional/Technical staff that have been given a computer that is less than 5 years old for their individual use. 8 NPOs have 91-100% of their Professional/Technical staff using computers for their individual use of less than 5 years old.
- Customers of NPOs indicated that the most important Training, Workshop, and/or e-learning Courses for raising the performance of organisations was on Customer focus (understanding customers, building customer relationships, managing customer complaints), with 43% indicating this.
- The Training, Workshop, and/or e-learning Course provided by the most number of NPOs (14) was on Productivity Tools (Problem solving, 5S-Ind. Housekeeping, Lean, Six Sigma).
- Customers of NPOs indicated that the most important Conference and/or Forum for raising the performance of organisations was on Productivity, with 21% indicating this.
- The Conference and/or Forum given by the most number of NPOs (11) was on Productivity.
- Customers of NPOs indicated that the most important Mentoring, Coaching and/or Consultancy Services for raising the performance of organisations was "Developing organizational capability – SMEs" and on "Human Resources", with 25% indicating this.
- The Mentoring, Coaching and/or Consultancy Services provided by the most number of NPOs (11) was on "Developing organizational capability – SMEs" and "Measurement, analysis and knowledge management".
- Customers of NPOs indicated that the most important Information Dissemination Services for raising the performance of organisations was a "Benchmarking Database/Website", with 9% indicating this.
- The Information Dissemination Service provided by the most number of NPOs (10) was "Study Missions".
- Customers of NPOs indicated that the most important Toolkits/Assessment Tool for raising the performance of organisations was a "SME start up assessment tool" with 14% indicating this.
- The Toolkit/Assessment Tools provided by the most number of NPOs (8) were Business Excellence Assessment Tools and Productivity Assessment Tools.
- Customers of NPOs indicated that the most important Award/Standard for raising the performance of organisations was an "ISO 9001 (Quality Management System)" with 12% indicating this.
- The Award/Standard provided by the most number of NPOs (8) was a Business Excellence Award.
- Customers of NPOs indicated that the most important Research for raising the performance of organisations was "Productivity" with 14% indicating this.
- The Research provided by the most number of NPOs (10) was on Productivity.
- Customers of NPOs indicated that the most important Networking and Support Groups for raising the performance of organisations were "Community of productivity practitioner's networks" and "Consultant networks" with 4% indicating this.
- The Networking and Support Groups provided by the most number of NPOs (5) was a Business Excellence Award winners network
- Customers of NPOs indicated that the most important Financial Assistance for raising the performance of organisations were "Subsidized training and workshops" with 11% indicating this.
- The Financial Assistance provided by the most number of NPOs (2) was Subsidized Consultancy and Advice.

- The level of customer satisfaction across all NPO countries was highest for "Training, Workshops and e-learning" and lowest for "Research"
- NPO customers rated the following as the top 10 most important NPO services (from a list of 74) for raising the performance of organisations in their country:
 1. Training, Workshop, and/or e-learning on "Customer focus (understanding customers, building customer relationships, managing customer complaints)" (43.4%)
 2. Training, Workshop, and/or e-learning on "Leadership (vision, values, developing leaders, ethics, governance) Training, Workshop, and/or e-learning" (41%)
 3. Training, Workshop, and/or e-learning on "Strategic planning and deployment (balanced scorecard, performance management)" (38.7%)
 4. Training, Workshop, and/or e-learning on "Productivity Tools (Problem solving, 5S – Industrial Housekeeping, Lean, Six Sigma)" (38.1%)
 5. Mentoring, Coaching and/or Consultancy Services on "Developing organizational capability – SMEs" (37.5%)
 6. Training, Workshop, and/or e-learning on "Business excellence assessments, awards and models" (36.2%)
 7. Training, Workshop, and/or e-learning on "Quality Management System/Standards" (31%)
 8. Training, Workshop, and/or e-learning on "Personnel development (facilitation skills, presentation skills, communication skills)" (29%)
 9. Training, Workshop, and/or e-learning on "Improvement Teams (including Quality Circles)" (24.8%)
 10. Training, Workshop, and/or e-learning on "Staff empowerment, motivation, and satisfaction" (23.0%)
- NPOs' performance as assessed by customers was highest for "NPO flexibility in meeting customer needs" and "Quality of project output" and equal lowest for "Design of NPO website", "Contents in NPO website", "Design of NPO newsletter", and "Use of Social Media".
- Customer satisfaction with the NPO was reported as highest in Bangladesh and Lao.
- CEO/Directors and Staff on average across all NPOs rated their organisation's greatest strength as their Leadership and prime opportunity for improvement as Measurement, Analysis and Knowledge Management. The statement "Our leadership team is always seeking new ways to sustain and grow the organization" had the highest level of agreement and the statements "We develop succession plans for leadership and management positions, and career progression plans for employees" and "We track daily operations and overall organizational performance using a full range of information (e.g. financial, customer satisfaction, employee satisfaction, environmental, suppliers, and key processes)" had the lowest levels of agreement.
- On average 85% of NPO employees indicated employee satisfaction levels of satisfied or very satisfied. Employee satisfaction levels were reported as highest in Iran.

Appendix 3: NPO Performance Results

What does it show?

This Appendix shows the performance of each NPO with respect to a balanced set of performance measures, see below. The measures were selected by the Chief Expert and National Experts as the most important result/outcome measures for NPOs to use.

1. Product and Process Outcomes

- Training course attendees
- Conference/exhibition attendees
- Consultancy/research projects private sector
- Consultancy/research projects government sector
- Consultancy/research projects total
- Publications sold
- New publications published
- QCC participation rates
- BE award applications
- BE award winners

2. Customer Focused Outcomes

- Customer complaints
- Customer satisfaction overall
- Customer satisfaction with training courses
- Customer satisfaction with conferences/exhibitions
- Customer satisfaction with consultancy projects

3. Workforce Focused Outcomes

- Education – doctorates
- Education – MSc/MBA
- Education – Degree
- Staff training
- Staff experience
- Employee satisfaction
- Employee turnover
- Employee absenteeism

4. Leadership and Governance Focused Outcomes

- Leadership/governance training
- Community projects/activities

5. Financial and Market Outcomes (Indirect outcomes – national outcomes NPOs contribute to but it is difficult to measure their impact on. Some measures are repeated from Appendix 1)

- Labor productivity in 2010 and 2011
- Labor productivity 2012 and 2013
- Ease of Doing Business
- Innovation
- Perceived corruption in the public sector
- Environmental performance

6. Financial and Market Outcomes (Direct outcomes – outcomes NPOs can directly measure)

- Total income
- Total expenditure
- Income from education
- Income from training
- Income from conferences
- Income from consultancy
- Income from books/publications
- Income from other
- Government funding

How should the data be used by NPOs?

- These are measures that were considered to be important for NPOs to be using on a regular basis to monitor their performance.
- The data enables NPOs to benchmark their performance with other NPOs. NPOs are encouraged to contact higher performing NPOs to understand how they are achieving higher levels of performance.

How should the data be used by the APO?

- The APO may wish to calculate the average performance of NPOs with respect to a number of the measures provided, and set future targets and strategies for those measures it aims to have an impact on.
- The data will enable the APO to identify the comparative strengths and opportunities for improvement for each NPO. This will enable the APO to facilitate the sharing of knowledge between high and low performers.

Selected Findings (View the Appendix for full findings)

- Malaysia had the most training course attendees in 2013 with 130,517 people trained and the most attendees at its conferences/exhibitions with 9,435 attendees.
- ROC has the highest number of consultancy/research projects for the private sector in 2013 with 369 and Sri-Lanka had the highest number for the government sector with 445.
- ROC sold the highest number of publications in 2013 with 37,348 sold.
- Sri Lanka had the highest number of BE Award Applications in 2013 with 1376 and the highest number of BE Award Winners at the highest level with 500. (Note assessment methods used for BE Awards in different countries do differ).
- Malaysia, Mongolia and Vietnam recorded 100% customer satisfaction levels (of satisfied or very satisfied) from their clients that completed the Stakeholder Survey.
- Iran had the highest % of professional/technical staff with a doctorate in 2013 at 30%.
- 100% of professional/technical staff working at the NPOs of Malaysia, Mongolia and Vietnam in 2013 had at least a bachelor's degree qualification.
- Thailand had the highest % of professional/technical staff which had worked at its organisation for 5 or more years, at 91%.
- Malaysia and Mongolia recorded 100% employee satisfaction levels (of satisfied or very satisfied) staff that completed the Stakeholder Survey.
- Thailand recorded the lowest employee turnover rate of its professional/technical staff in 2013 of 2%.
- 100% of directors from the NPOs in Bangladesh, Sri-Lanka and Vietnam have attended a leadership or governance related training course in the last two years.
- Sri-Lanka has led or supported the most community projects in 2013 with 238 projects.
- Singapore rated best overall for Productivity, Ease of Doing Business, Innovation, Least level of Corruption and Environmental Performance in 2013 of all APO members.
- ROC had the highest revenue for 2013 at USD\$39.9 million.
- Pakistan's proportion of revenue from training was the highest in 2013 at 60%.
- Philippines's proportion of revenue from consultancy was the highest in 2013 at 44%.
- Sri-Lanka's proportion of revenue from government funding was the highest in 2013 at 98.5%.

Appendix 4: NPO SWOT Analysis

What does it show?

This Appendix shows each NPO's most important strengths, weaknesses, opportunities and threats (SWOT) in relation to Government/Partners, Private Sector and Public Sector. The SWOT analysis was undertaken by the senior executive team of each NPO.

In addition, nine countries (Sri Lanka, Indonesia, Fiji, Malaysia, Nepal, Lao, Thailand, India and Bangladesh) ranked their three most important strengths, weaknesses, opportunities and threats with the most important strength, weakness, opportunity or threat ranked as "1", the second most important as "2" and the third most important as "3". This data is summarised at the end of the Appendix.

How should the data be used by NPOs?

- NPOs should review their SWOT to consider how they can better serve their stakeholders through improvements to their strategies, systems and services. NPOs should consider how they can build on their strengths and take advantage of opportunities, while minimising weaknesses and avoiding threats.

How should the data be used by the APO?

- The SWOT analysis of each NPO should be reviewed by the APO to have a clearer understanding of each NPO's strengths, weaknesses, opportunities and threats. This will enable the APO to provide a tailored approach to meet each country's needs.
- The APO should analyse all the SWOTs to see if there are common issues that can be addressed.

Selected Findings (View the Appendix for full findings)

Common strengths among NPOs were:

- Strong connections with key government ministries and employer bodies.
- Reputable productivity specialist organization.
- Ability to disseminate the latest information through strong networks of international cooperation.

Common weaknesses among NPOs were:

- Need to increase visibility of the NPO and the importance of productivity.
- Lack of clear national productivity agenda and/or roadmap on how productivity gains will be achieved.
- Staff issues such as low employee motivation, wrong mix of technical to support staff, and the technical competence of staff need to be addressed.
- Consultants are limited in number and often the required skills are lacking.
- Budget is not enough to have a major impact.

Common opportunities among NPOs were:

- Opportunities for greater international sharing and learning through the APO (and other institutions such as APEC and ASEAN). In particular, opportunities for sharing international expertise/experts.
- The public sector is open to productivity concepts and requires programs tailored to its needs, for instance on governance.
- With the opening of international trade there is a need to focus on export-orientated SMEs.
- Possibilities for expanding services into national issues such as environment, energy, water, transportation and sustainability and to new sectors

Common threats among NPOs were:

- Lack of support from Government in terms of mandate and funding for productivity planning and implementation.
- Outdated or unnecessary regulations and bureaucratic procedures affecting productivity improvements.
- Lack of critical mass of subject experts.
- Competition from foreign consultants and training and consultancy service providers potentially replacing some of the work of NPOs.

Appendix 5: APO Strategy and Assistance

What does it show?

This Appendix shows how the APO's strategy and services are viewed by the NPO's CEO/directors and staff. 12 questions were asked.

How should the data be used by NPOs?

- NPOs may use the data to provide feedback and ideas on how the APO can better meet their needs.

How should the data be used by the APO?

- The data will assist the APO in strategy development and in improving its services.

Selected Findings (View the Appendix for full findings)

- All NPOs agreed with the APO's vision and mission.
- Almost all NPOs agreed with the APO's strategic direction and key roles. Small changes to the wording for improved clarity were suggested.
- The APO's performance for each of its 5 key roles was assessed as "Good" to "Very Good" on average with the APO's roles as a Regional Advisor rating lowest. There were large variations in ratings between countries.
- 86% of NPO CEO/Directors/Staff, on average, assessed the impact of APO events/projects as "Good" or better.
- 75% of NPO CEO/Directors/Staff, on average, assessed their level of understanding of the APO's role and its programs as high or very high.
- There was a large variation in the % of NPO CEO/directors/staff that had visited the APO website and/or read a newsletter in the last two months from 5% to 100% with the median for both between 65 to 70%.

- NPO satisfaction ratings for the APO was highest in “Human Resources” in particular for “Communication skills of APO staff” although two items (from a total of 43) relating to “Operations Focus” had the highest satisfaction rating overall, these were the “Work of Industry Department” and the “Work of the Agriculture Department”. The APO rated lowest for “APO’s work to attract new members”, “Visibility of the APO and promotion of APO worldwide”, “APO’s use of social media channels such as Facebook and Mobile applications”, “Reporting on the overall impact of the APO across Asia”, and “Assistance provided to develop the capabilities of APO Liaison Officers”.
- Of the 17 services provided by the APO the following were considered by NPO members to equally have the highest impact:
 - Training courses
 - Technical expert services
 - Development of demonstration companies / organizations
 - In-country programs/projects
- Of the 17 services provided by the APO “Productivity Research” was considered by some distance to have the lowest impact with it averaging as having slightly higher than a “moderate impact”.
- 14 of 16 APO members recorded a level of satisfaction of “satisfied” or “very satisfied” with being an APO member. 2 members indicated that they were neither satisfied or dissatisfied.

4. Recommendations

Data from this report can be used to assist NPOs and the APO in:

- strategy development
- institutional capacity and capability development;
- delivery of effective productivity related services to stakeholders;
- visibility as leading productivity organizations.
- attracting new members

Advice and recommendations on how to use the data from the report has been provided in the section titled "Findings"

Further recommendations for the APO are provided below:

1. The APO may wish to calculate the average performance of NPOs with respect to the economic and societal measures shown in Appendix 1 and the balanced set of performance measures shown in Appendix 3, and set future targets and strategies for those measures it is striving to have an impact on. In particular, targets for key performance measures such as Productivity should be set.
2. 3 or more APO members were in the top 20 countries for 10 of 18 reputable international performance metrics. However, no Asian countries were in the top 20 for Labour Productivity, Happiness Index, Energy Sustainability Index or the Global Energy Architecture Performance Index. This indicates these areas should be considered for addressing by the APO.
3. The APO should ensure it has strategies in place to address or take advantage of the 5 mega trends that have been identified as having the most impact on productivity over the next 5 years. These were:
 - Liberalisation of global trade and financial markets (indicated by 63% of NPOs)
 - Convergence of technologies and research fields (indicated by 63% of NPOs)
 - Increasing energy consumption (indicated by 50% of NPOs)
 - Green productivity: scarce resources and increasing commodity prices lead to techniques that increase energy and resource productivity (indicated by 38% of NPOs)
 - Decreasing costs for communication and transportation (due to technical innovations such as the internet) enabling more international trade (indicated by 38% of NPOs)
 - Government accountability due to a more informed electorate (indicated by 38% of NPOs)
4. It is recommended that the APO develops a program that provides advice and encourages the sharing of best practices between NPOs on institutional strengthening and capability building. This program could assist NPOs on strategy, organizational structure, infrastructure, funding models, staffing levels/ratios, governance, leadership, human resources, customer focus, operations and systems, and measurement, analysis and knowledge management.
5. It is evident that some NPOs are having tremendous success in the delivery of some productivity related services whilst others are not. It is recommended that the APO develops a program that provides advice and encourages the sharing of best practices on the delivery of productivity services.

6. From a list of 74 NPO services the 3 that NPO customers rated as the most important for raising organizational performance were Training, Workshop, and/or e-learning on "Customer focus (understanding customers, building customer relationships, managing customer complaints)" (43.4%), "Leadership (vision, values, developing leaders, ethics, governance)" (41%) and "Strategic planning and deployment (balanced scorecard, performance management)" (38.7%). It is recommended that the APO reviews whether these topics are adequately covered in its programs.
7. NPO customers assessed the NPOs on 18 characteristics related to Leadership, Customer Focus, Measurement, Analysis and Knowledge Management, Human Resources and Operations Focus. NPOs rated lowest for Customer Focus and in particular for "Design of NPO website", "Contents in NPO website", "Design of NPO newsletter", and "Use of Social Media". It is recommended that the APO runs a program to assist NPOs with these issues to enhance the image of NPOs, the take-up of productivity programs and the ability of NPOs to attract government funding.
8. NPO CEO/directors/staff on average rated their greatest opportunities for improvement in the areas of "Succession plans for leadership and management positions, and career progression plans for employees" and for "Performance measurement to track daily operations and overall organizational performance using a full range of information (e.g. financial, customer satisfaction, employee satisfaction, environmental, suppliers, and key processes)". It is recommended that the APO runs programs to assist NPOs in these areas.
9. The SWOT analysis revealed that many NPOs have budgetary concerns with a need to do more with less. The APO could run a program to assist NPOs in growing their revenue stream and/or help them work effectively with partners that can deliver productivity services. Advice can be given on securing government funding or increasing revenue through, training, conferences or consultancy projects.
10. The SWOT analysis indicated that raising the visibility of productivity was of key importance. The APO and NPOs should work together on visibility programs to improve APO/NPO branding and websites and undertake initiatives to foster stronger relationships with governments and key institutions.
11. A number of APO members require assistance in developing or coordinating the development of National Plans for Productivity and/or a Roadmap. A sharing of current National Productivity Plans would be of value (it is the chief expert's opinion that business excellence frameworks could be used to generate national plans as they touch on all aspects of importance related to productivity). There is the potential to develop an Asian-wide Productivity Plan and/or Roadmap which all National Productivity Plans feed into. This could be an opportunity to raise the profile of productivity across Asia especially if APO member governments sign off on the plan.
12. The SWOT analysis indicated that consultants and/or subject matter experts are limited in number and often lack the required skill set. Work should be undertaken by the APO to identify this need more clearly and provide programs to address this shortfall. One potential solution is greater sharing of consultant expertise between countries.
13. A number of common opportunities were identified through the SWOT analysis:
 - the public sector is becoming more open to productivity concepts.
 - with the opening of international trade there is a need to focus on export-orientated SMEs.
 - national issues such as environment, energy, water, transportation and sustainability provide opportunities for NPOs to play a leadership role.

It is recommended that the APO considers if these opportunities are currently adequately addressed.
14. APO members voiced many opinions and suggestions on the APO's strategy and services. A snapshot of these is provided below:

- Green Productivity should be considered in a broader scope of “sustainable productivity” which covers not only environmental impact but also issues such as communicable diseases, road accidents, social security and work life balance
- There needs to be more in-country projects to help with MCs needs on ground and this will lead to a better customization of services to the members; thus a better allocation of resources to Category C projects is required
- APO should make efforts to generate revenue in order to be self – sustainable in long term
- APO renewed its Vision and Mission in 2011 but there is no roadmap to achieve them. In view of the same, it should develop a detailed roadmap with clear indication of output and outcome besides resource requirement
- It is submitted that APO and inter NPOs related linkages must be deepened beyond liaison officers and other top management officials serving essentially as gate keepers. Indeed little engagement has been seen between NPOs / NPCs across countries beyond tokenism or some expert services being facilitated as per APO and liaison officer and management wishes, which too happening occasionally. Accordingly, a seamless inter- NPO linkage at all levels is the need of the hour such that the APO / NPO system becomes dynamic with prospects of knowledge creation and exchange and experience sharing and expertise identification and application (with ICT support and on the ground action) and project execution across countries

It is recommended that all comments shown in Appendix 5 are read and considered by the APO.

15. There were large variations in response to a number of questions in Appendix 5. It is recommended that the APO spends time with all countries over the coming year to discuss the feedback and take action where necessary.
16. NPO satisfaction ratings for the APO were lowest for “APO’s work to attract new members”, “Visibility of the APO and promotion of APO worldwide”, “APO’s use of social media channels such as Facebook and Mobile applications”, “Reporting on the overall impact of the APO across Asia”, and “Assistance provided to develop the capabilities of APO Liaison Officers”. It is recommended that the APO addresses these issues.
17. Of the 17 services provided by the APO the following were considered by NPO members to equally have the highest impact:
 - Training courses
 - Technical expert services
 - Development of demonstration companies / organizations
 - In-country programs/projects

The APO should consider providing additional resource for these services.

18. The APO’s “Productivity Research” was considered by some distance to have the lowest impact of 17 services with it averaging as having slightly higher than a “moderate impact”. The APO should investigate the level of resource invested in this activity and whether it should be reduced and/or consider how APO members can obtain more value from this service.

5. Conclusion

This report has had the input of 16 NPOs with the participation of 372 staff, 390 customers and 130 NPO partners.

It is envisaged that this report will be great assistance to the APO and NPOs for planning purposes and for assisting the APO community to understand how each NPO operates and the challenges faced. This report contains a wealth of information which can be used as a reference guide and for benchmarking purposes for many years to come.

It is recommended that every 3 years the research is repeated so that the data remains relevant to the APO/NPOs.

If the research is repeated it is strongly recommended that all countries participate so that the data will be representative of the whole APO community.

APPENDICES

The Appendices show the data collected from the National Expert Survey. There is an Appendix for each section of the survey.

The Appendices are as follows:

Appendix 1 – Country Data and Trends.

Shows the performance of each country with respect to 22 economic and societal metrics and the perceived impact of megatrends within each country.

Appendix 2 – NPO Strategy, Systems and Services

Provides data and opinions of NPO CEO/Directors, staff, customers and partners on 32 questions relating to NPO strategy, systems and services.

Appendix 3 – NPO Performance Results

Shows the performance of each NPO with respect to a balanced set of performance measures covering:

1. Product and Process Outcomes
2. Customer Focused Outcomes
3. Workforce Focused Outcomes
4. Leadership and Governance Focused Outcomes
5. Financial and Market Outcomes (Indirect outcomes – national outcomes NPOs contribute to but it is difficult to measure their impact on. Some measures are repeated from Appendix 1)
6. Financial and Market Outcomes (Direct outcomes – outcomes NPOs can directly measure)

Appendix 4 – NPO SWOT Analysis

Shows each NPOs' most important strengths, weaknesses, opportunities and threats (SWOT) in relation to Government/Partners, Private Sector and Public Sector. The SWOT analysis was undertaken by the senior executive team of each NPO.

In addition, nine countries (Sri Lanka, Indonesia, Fiji, Malaysia, Nepal, Lao, Thailand, India and Bangladesh) ranked their three most important strengths, weaknesses, opportunities and threats with the most important strength, weakness, opportunity or threat ranked as "1", the second most important as "2" and the third most important as "3". This data is summarised at the end of the Appendix.

Appendix 5 – APO Strategy and Assistance

Shows how the APO's strategy and services are viewed by the NPO's CEO/directors and staff. 12 questions were asked.

APPENDIX 1: COUNTRY DATA AND TRENDS

This Appendix shows the performance of each country with respect to 22 economic and societal metrics and the perceived impact of megatrends within each country.

1.1 Names of Countries participating in the National Expert Survey:

1. Bangladesh
2. Cambodia
3. Fiji
4. India
5. Indonesia
6. Iran
7. Lao
8. Malaysia
9. Mongolia
10. Nepal
11. Pakistan
12. Philippines
13. Republic of China (ROC)
14. Sri Lanka
15. Thailand
16. Vietnam

1.3 Select the 5 MegaTrends that you think will have the most impact on productivity (good or bad) in your country in the next 5 years?

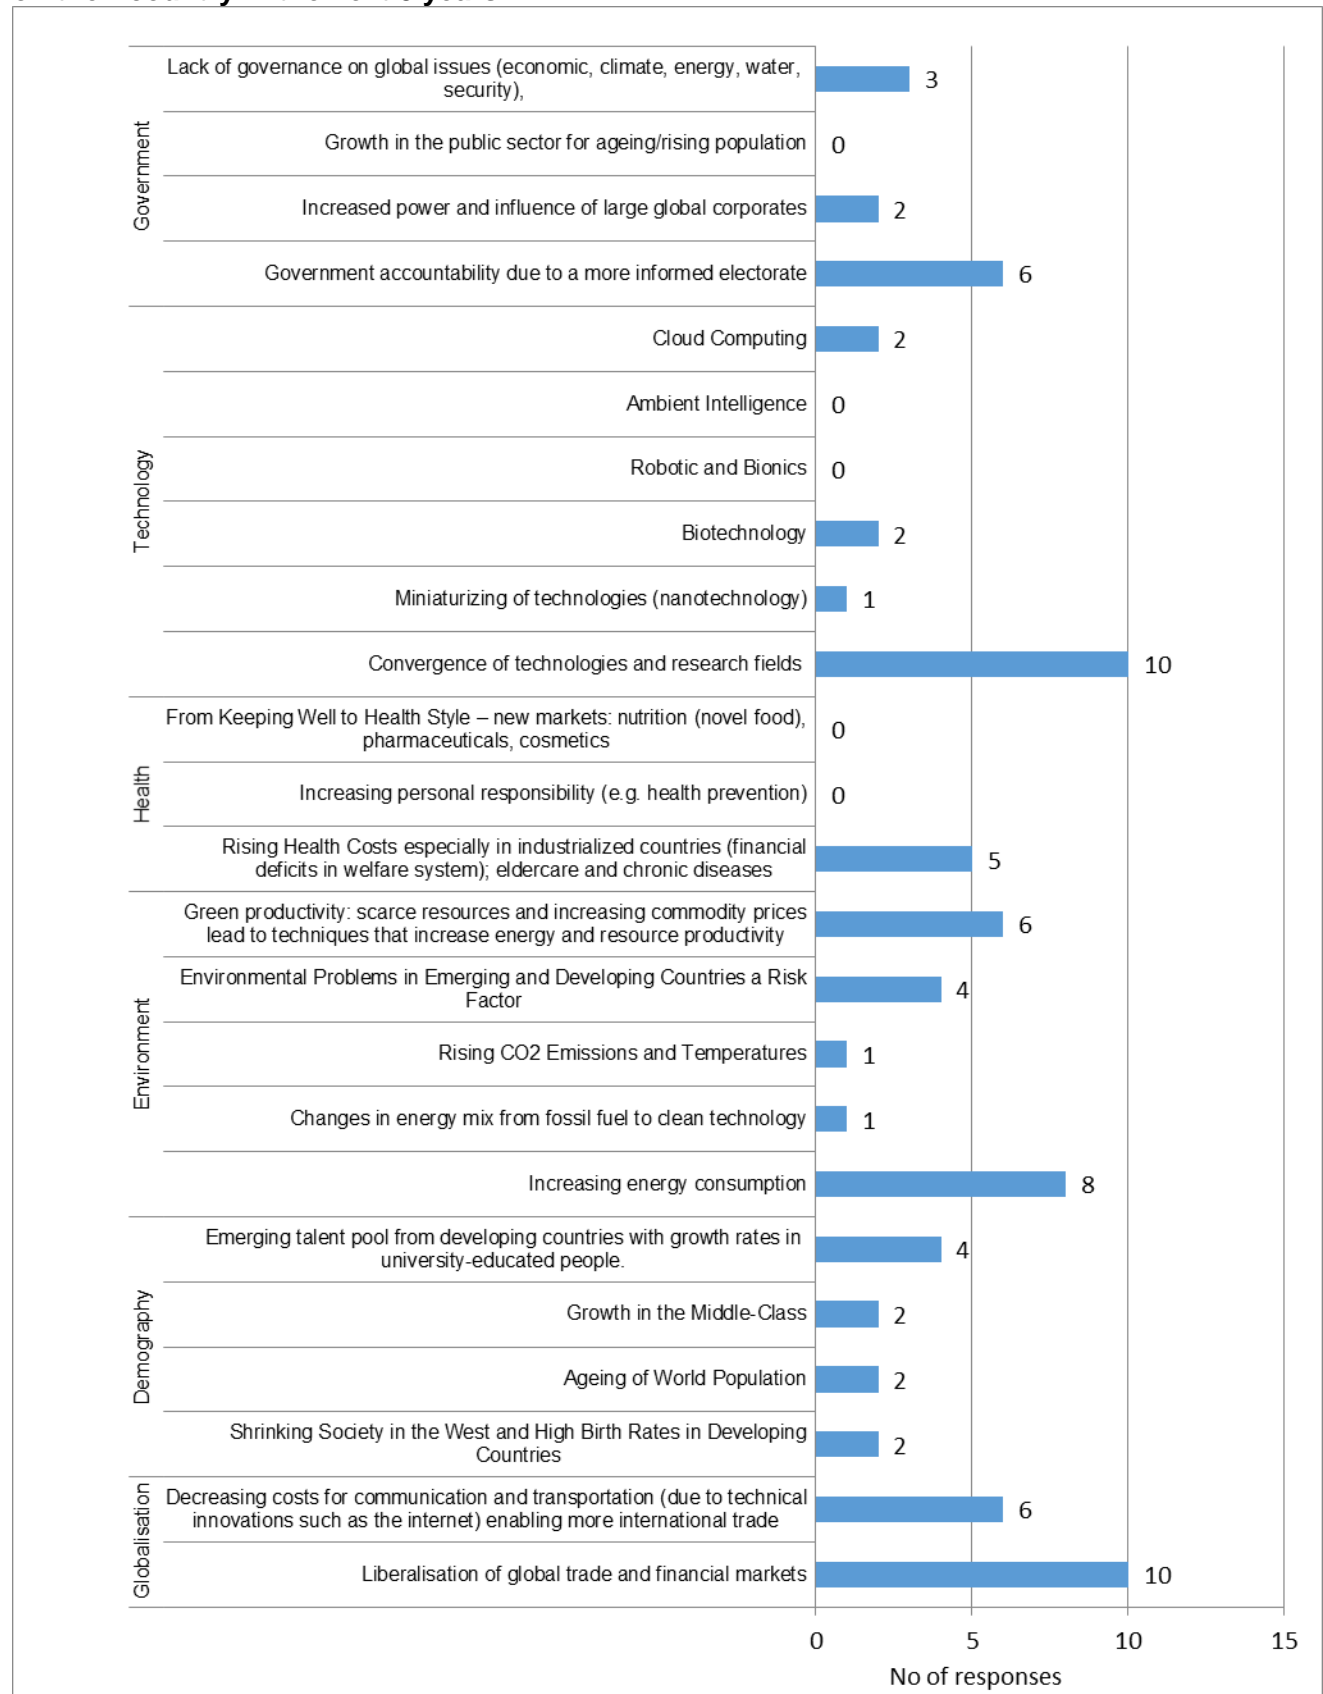

Megatrends		Malaysia	Lao	Cambodia	Indonesia	Mongolia	Fiji	Vietnam	Bangladesh	Thailand	Sri Lanka	Nepal	India	Philippines	ROC	Pakistan	Iran*	Freq	Percentage %
Globalisation	Liberalisation of global trade and financial markets		1	1	1	1		1	1		1		1	1		1		10	63%
	Decreasing costs for communication and transportation (due to technical innovations such as the internet) enabling more international trade	1					1			1	1	1					1	6	38%
Demography	Shrinking Society in the West and High Birth Rates in Developing Countries												1			1		2	13%
	Ageing of World Population									1					1			2	13%
	Growth in the Middle-Class				1							1						2	13%
	Emerging talent pool from developing countries with growth rates in university-educated people.	1		1					1					1				4	25%
Environment	Increasing energy consumption			1	1	1	1	1			1		1			1		8	50%
	Changes in energy mix from fossil fuel to clean technology												1					1	6%
	Rising CO2 Emissions and Temperatures								1									1	6%
	Environmental Problems in Emerging and Developing Countries a Risk Factor		1								1	1		1				4	25%
	Green productivity: scarce resources and increasing commodity prices lead to techniques that increase energy and resource productivity	1				1	1	1		1					1			6	38%
Health	Rising Health Costs especially in industrialized countries (financial deficits in welfare system); eldercare and chronic diseases		1	1							1						1	5	31%
	Increasing personal responsibility (e.g. health prevention)																	0	0%

	From Keeping Well to Health Style – new markets: nutrition (novel food), pharmaceuticals, cosmetics																0	0%
Technology	Convergence of technologies and research fields	1			1	1	1	1	1	1			1	1	1		10	63%
	Miniaturizing of technologies (nanotechnology)		1														1	6%
	Biotechnology										1			1			2	13%
	Robotic and Bionics																0	0%
	Ambient Intelligence																0	0%
	Cloud Computing													1		1	2	13%
Government	Government accountability due to a more informed electorate	1		1		1	1		1						1		6	38%
	Increased power and influence of large global corporates				1			1									2	13%
	Growth in the public sector for ageing/rising population																0	0%
	Lack of governance on global issues (economic, climate, energy, water, security),		1								1		1				3	19%
	Total Megatrends (for each country)	5	5	5	5	5	5	5	5	5	5	5	5	5	5	2		

Notes: * 3 additional mega trends were included by Iran:

- **Environment – Large reduction in absolutely clean energy costs** (Major change in the concept of energy and hence energy productivity)
- **Health - Medical Genetics** (no medicine, structural change in health care and labor productivity)
- **Government - Change in the structure of government to just an operator with minimum mandate from population** (people use computerized systems to announce their preferences and do not refer to the governments to waste time and resources)

MegaTrends that the NPOs think will have the most impact on productivity (good or bad) on their country in the next 5 years?

APPENDIX 2: NPO STRATEGY, SYSTEMS AND SERVICES

This Appendix provides data and opinions of NPO CEO/directors, staff, customers and partners on 32 questions relating to NPOs' strategy, systems and services.

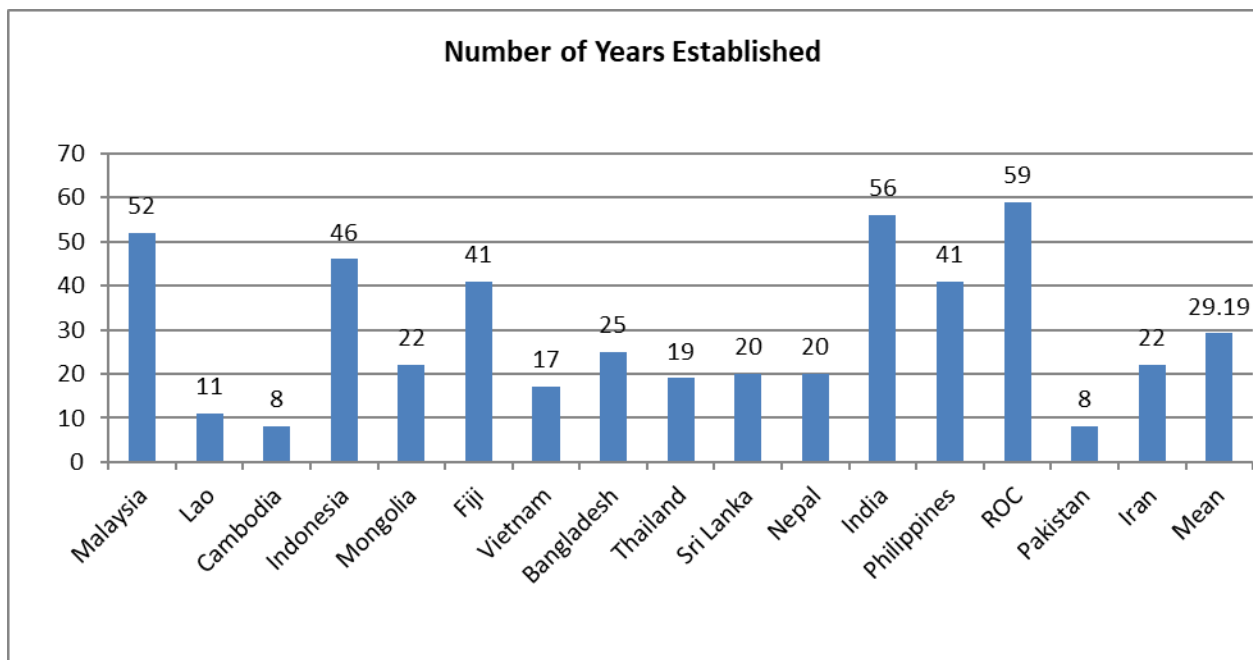

Within the Appendix the survey questions are shown, followed by the aggregated responses in data and graphical format. If a "No response" or "No data" has been recorded it means that the NPO has not responded to the question. "Na" refers to the question being "Not applicable" for the NPO.

2.1 Name of NPO

Malaysia	Malaysia Productivity Corporation
Lao	Department of SME's Promotion/Lao National Productivity Organization (DOSMEP/LNPO)
Cambodia	National Productivity Organization of Cambodia
Indonesia	Directorate of Productivity and Entrepreneurship
Mongolia	Mongolian Productivity Organization
Fiji	National Training and Productivity Centre
Vietnam	Vietnam National Productivity Institute
Bangladesh	National Productivity Organisation
Thailand	Thailand Productivity Institute
Sri Lanka	National Productivity Secretariat
Nepal	National Productivity and Economic Development Centre (NPEDC)
India	National Productivity Council
Philippines	Development Academy of The Philippines
ROC	China Productivity Center
Pakistan	NPO Pakistan
Iran	National Iranian Productivity Organization

2.2 Year of establishment

	Year of establishment	Number of years established
Malaysia	1962	52
Lao	2003	11
Cambodia	2006	8
Indonesia	1968	46
Mongolia	1992	22
Fiji	1973	41
Vietnam	1997	17
Bangladesh	1989	25
Thailand	1995	19
Sri Lanka	1994	20
Nepal	1994	20
India	1958	56
Philippines	1973	41
ROC	1955	59
Pakistan	2006	8
Iran	1992	22
Mean		29.19

2.3 Type of institution

	Statutory Body	Government Department
Malaysia	1	
Lao		1
Cambodia		1
Indonesia		1
Mongolia	1	
Fiji	1	
Vietnam	1	
Bangladesh		1
Thailand	1	
Sri Lanka		1
Nepal	1	
Philippines	1	
ROC	1	
Pakistan		1
Iran	1	
Total	9	6

Note, India responded “none of the above” describing NPC as “an autonomous, multipartite, non – profit organization, established by Ministry of Industry, Government of India, in 1958”

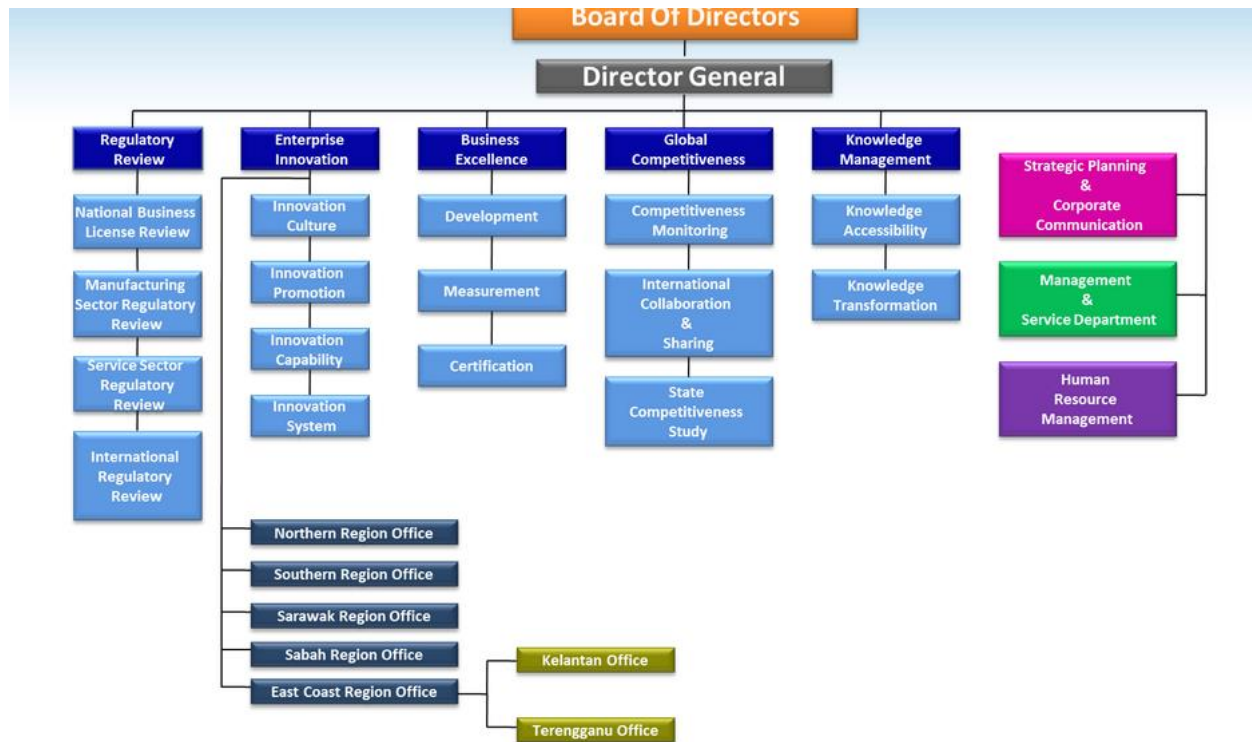

2.4 Year joined APO

	Year joined APO	Number of years joined APO
Malaysia	1983	31
Lao	2002	12
Cambodia	2004	10
Indonesia	1968	46
Mongolia	1992	22
Fiji	1984	30
Vietnam	1996	18
Bangladesh	1982	32
Thailand	1961	53
Sri Lanka	1966	48
Nepal	1961	53
India	1961	53
Philippines	1961	53
ROC	1961	53
Pakistan	1961	53
Iran	1965	49
Mean		38.5

2.6 NPO main partners that assist in delivering strategy and/or services

	Partners	
Malaysia	Board of Directors	Universities/ Government Agencies
	Consultative Panels	NGOs
	Working Groups/Task Force	International Agencies
	Training /System Development Service Providers	
Lao	Difference Lines Of Ministries	Technical Schools
	Lao National Chamber Of Commerce And Industry	International Organizations Like GIZ, ADB, JICA and BAF
	Enterprises	Local & International Ngo Organizations
	Universities	
Cambodia	Ministry of Industry and Handicraft	
Indonesia	National Productivity Board	Education and Training Providers
	Line Ministries and Provincial Government	Employers Association/Chamber of Commerce
Mongolia	Ministry of Labor	Mongolian University of Science and technology
	Government Office	Ministry of Environment and Green Development
Fiji	NTPC Advisory Board (Board)	University Senate/Vice Chancelloer
	FNU Council	Fiji Commerce and Employers Federation
	Ministry of Employment, Productivity and Industry Relations	Industry Associations
	Ministry of Education	Fiji Trades Union Congress
Vietnam	Ministry of Science and Technology, Directorate for Standards and Quality (STAMEQ) and Local Department of Science and Technology	Ministries such as Ministry of Industry and Trade, Ministry of Natural Resources and Environment, Ministry of Agriculture and Rural Development
	APO, NPOs	
	Universities, Institutions of research and training	Productivity and quality service providers (including Certification Bodies, companies, trainers, consultants and professional network)
Bangladesh	Ministry of Industries	National Productivity Executive Committee
	National Productivity Council	Productivity Advisory Committee
Thailand	Institute for small and medium Enterprise development	Thai-German institute
	National innovation agency	National science and technology development agency
Sri Lanka	All Government institutions	Freelance Trainers and NPS trainers
	Chambers	Parallel Training institutes
	Private sector institutions	

Nepal	Government agencies particularly, sectoral ministries and public corporations	United Nations Bodies and Agencies like UNIDO, UNCTAD, ILO, WIPO etc
	Enterprise established within Industrial Estates (Estates established by Government but enterprise are private owned)	Academic institutions particularly institutes for higher learning in management and marketing and technological capability building areas
	Intergovernmental Organizations like Technonet Asia, Int. Training Institute, WTO and ICC	Private Sector Organizations, industry associations and business/commerce associations
	Asian Productivity Organization (APO)	
India	Organizations with whom NPC has signed MOUs	Dept of Industrial Policy & Promotion
Philippines	Office of the President	Asian Productivity Organization
	National Economic Development Authority	Department of Agriculture
	Department of Budget and Management	Department of Energy
	Commission on Higher Education	Department of Trade and Industry
	University of the Philippines	Productivity Improvement Circles Association of the Philippines
	Philippine Productivity & Quality Movement	Department of Science and Technology
ROC	No data	No data
Pakistan	Ministry of Industries & Production	Development Sector Organizations
	All Federal Ministries	Private Sector Organizations
	Academia	
Iran	Vice Presidency in Human Resource and Management Development	Team of Consultants
	Group of Project-based Employees	

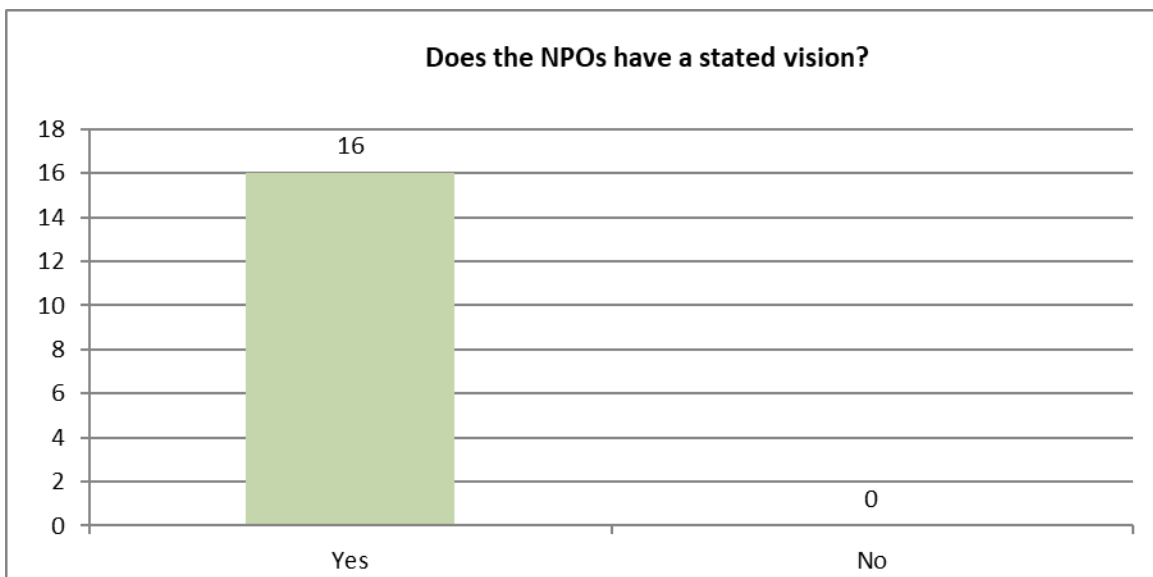

2.7 NPO's main customers

	Customers	
Malaysia	Public and government agencies	Private sector
	NGO	
Lao	Ministry Of Education	University
	Lao Chamber Of Commerce & Industry	Technical Institution
	Various Enterprises	Vocational School
Cambodia	Cambodian Micro, Small and Medium Enterprises from various associations and federations	Public officers from concerned ministries of the Government of Cambodia
Indonesia	Enterprises	Communities
	Education and Training Providers	Technical Sectoral Government Institutions and Provincial Government
Mongolia	Thermal power plants /Darkhan	Shunkhlai LLC
	Erdenet mining industry	Interactive LLC
	Golomt Bank	
Fiji	Employers that pay us a Levy	Franchise partners

	Government agencies	Internal customers
	Private students	NTPC Advisory Board
Vietnam	Enterprises	Hospitals, Universities
	Public Administration Organizations and Agencies	
Bangladesh	Public Industries, Bank, Hospital	School. Collage
	Private Industries	SME, MSME
Thailand	Government agency	Private enterprise
	State enterprise	
Sri Lanka	All government institutions	Communities
	Schools and Universities	Pre schools(Kindergarten)
	Private sector	
Nepal	Government and its affiliates like public corporations	Private sector enterprises particularly SMEs
	Training institutes in areas of management, marketing, technology information, standardization, quality control, WTO Agreements	Potential entrepreneurs for business and SME set-ups, Technology seekers
	Enterprises in the services sector like tourism, financial sector	Engineering and Consultancy firms Reputed organizations in Services sector viz Govt Depts, Enterprises, International organizations Legislature & Judiciary International Organizations, funding institutions, private firms including small and medium enterprises, non-government organizations and academe
India	Reputed organizations in Manufacturing in Private Sector, Public Sector international organizations	
	Constitutional Bodies	
	Government Corporations	
Philippines	National Line Agencies (NLAs)	Local Government Units (LGUs)
	Constitutional Bodies	Legislature & Judiciary
	Government Corporations	Others (International Organizations, funding institutions, private firms including small and medium enterprises, non-government organizations and academia)
ROC	Government agencies	Public
	Private sector	Related associations and organizations
Pakistan	Private Sector Organizations	Enterprises / Development Organizations
	Public Sector Organizations	Professionals / Individuals
	Academia	
Iran	Public sector and governmental organizations through their productivity offices	Industrial and Development Organizations in the public sector responsible for promotion of industrial activities
	Industrial organizations, public or private	Service and Utility organizations in the country
	Any individual or Group Organization in the private sector who may demand NIPO services	Agricultural organizations responsible for agricultural production units

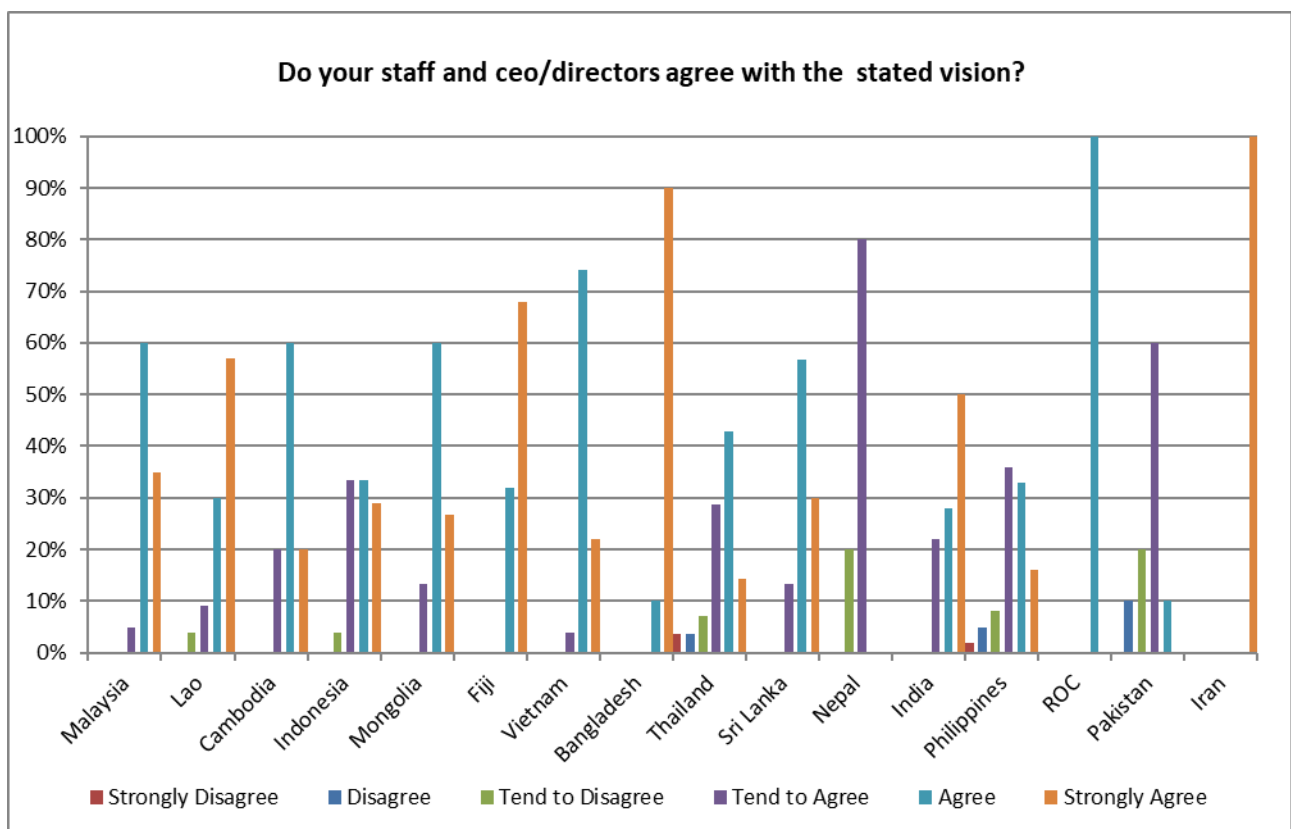

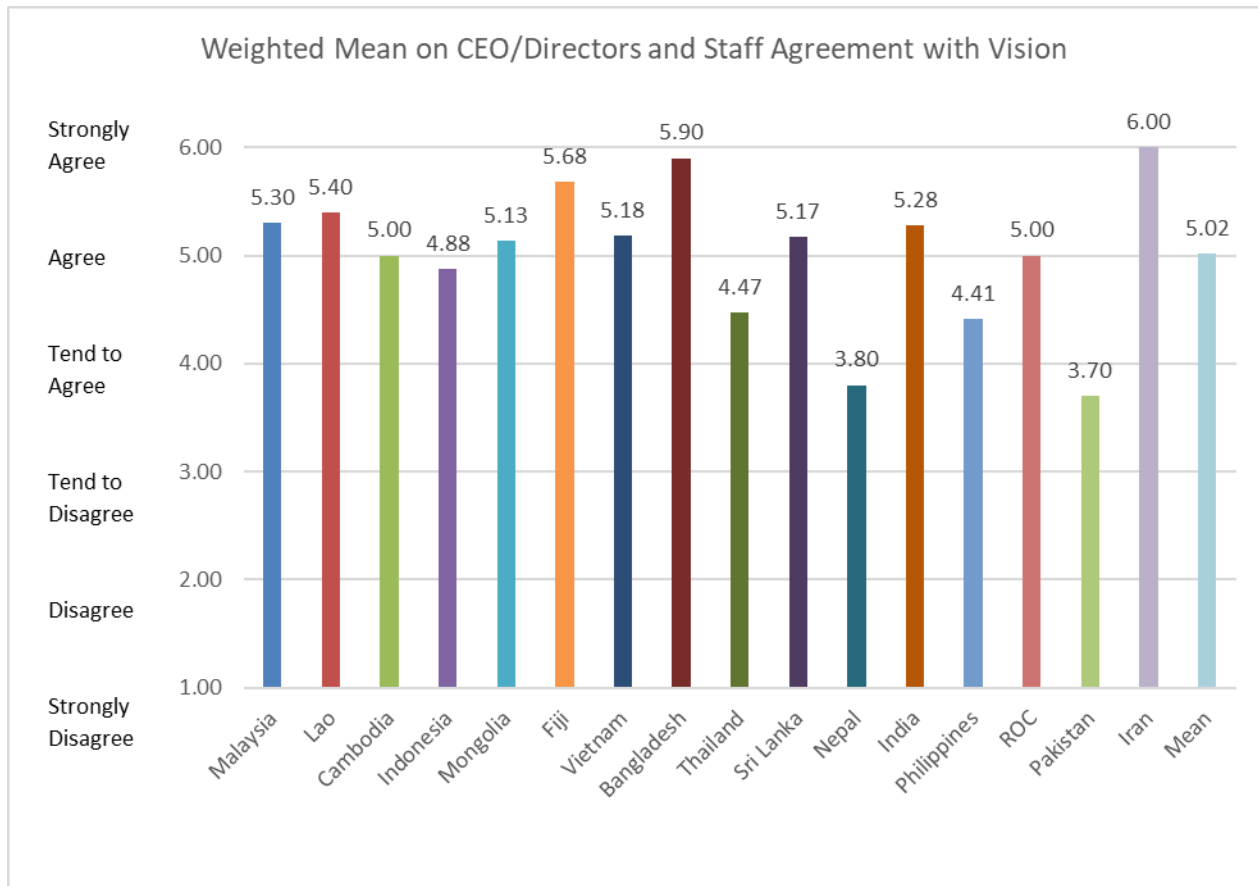

2.8 Does the NPO have a stated vision?

	Yes	No
Malaysia	1	0
Lao	1	0
Cambodia	1	0
Indonesia	1	0
Mongolia	1	0
Fiji	1	0
Vietnam	1	0
Bangladesh	1	0
Thailand	1	0
Sri Lanka	1	0
Nepal	1	0
India	1	0
Philippines	1	0
ROC	1	0
Pakistan	1	0
Iran	1	0
Total	16	0

2.8 a) If yes, do your staff and CEO/directors agree with the vision:

	n	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree	Weighted Mean
Malaysia	20	0%	0%	0%	5%	60%	35%	5.30
Lao	20	0%	0%	4%	9%	30%	57%	5.40

Nepal	6	0%	0%	20%	80%	0%	0%	3.80
India	18	0%	0%	0%	22%	28%	50%	5.28
Philippines	39	2%	5%	8%	36%	33%	16%	4.41
ROC	70	0%	0%	0%	0%	100%	0%	5.00
Pakistan	20	0%	10%	20%	60%	10%	0%	3.70
Iran	30	0%	0%	0%	0%	0%	100%	6.00
Mean	24.9	0%	1%	4%	20%	39%	35%	5.02
Total Respondent	399							

2.8 b) If yes, do your partners agree with the vision:

	n	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree	Weighted Mean
Malaysia	7	0%	0%	0%	14%	43%	43%	5.29
Lao	3	0%	0%	5%	15%	28%	52%	5.27
Cambodia	3	0%	0%	0%	0%	100%	0%	5.00
Indonesia	5	0%	0%	0%	0%	40%	60%	5.60
Mongolia	3	0%	0%	0%	33%	33%	33%	5.00
Fiji	4	0%	0%	0%	0%	25%	75%	5.75
Vietnam	5	0%	0%	0%	0%	20%	80%	5.80
Bangladesh	3	0%	0%	0%	0%	33%	67%	5.67
Thailand	3	0%	0%	0%	0%	67%	33%	5.33
Sri Lanka	20	0%	0%	0%	10%	65%	25%	5.15
Nepal	5	0%	0%	0%	60%	40%	0%	4.40
India	2	0%	0%	0%	50%	50%	0%	4.50
Philippines	20	0%	5%	0%	20%	55%	20%	4.85
ROC	30	0%	0%	0%	0%	100%	0%	5.00
Pakistan	10	0%	10%	30%	50%	10%	0%	3.60
Iran	10	0%	0%	0%	11%	33%	56%	5.45
Mean	8.3	0%	1%	2%	16%	46%	34%	5.10
Total Respondent	133							

2.8 c) Suggested changes to the vision by staff and ceo/directors:

- The NPCC Vision 2030 should be broken into contingencies that would be based on reality of each stages (Cambodia).
- Some respondents would like to see a stronger focus on business excellence and productivity in the vision (Fiji).
- Others would like a separate vision statement for the NPO (as the NPO now is located within the Fiji National University) (Fiji).
- Vision statement is not inspiring (Fiji).
- Should be represented with a short word that is able to create inspiration to employee mindset (Thailand).
- Should specify how can use organization competency to obtain the vision (Thailand).
- Should include corporate governance (Thailand).
- Productive and Prosperous nation through Excellence (Sri Lanka).
- Establish as an excellent nationally and internationally recognized national productivity organization promoting productivity, quality and competitiveness of national products and services and perform the role of national focal point for productivity improvement campaign (Nepal).
- An internationally recognized institution producing top notch managers in the public and private sectors as well as innovative and strategic research in enhancing national productivity overall, defined as public sector effectiveness and private sector efficiency (Philippines).
- Vision needs to be revised. Should be more precise and relevant reflecting a specific long term vision (Pakistan).
- The only change suggested was in the nature of NIPO. One person said he is not sure if NIPO should be a government organization, or as suggested a state-based organization independent of government (like a central bank) (Iran).

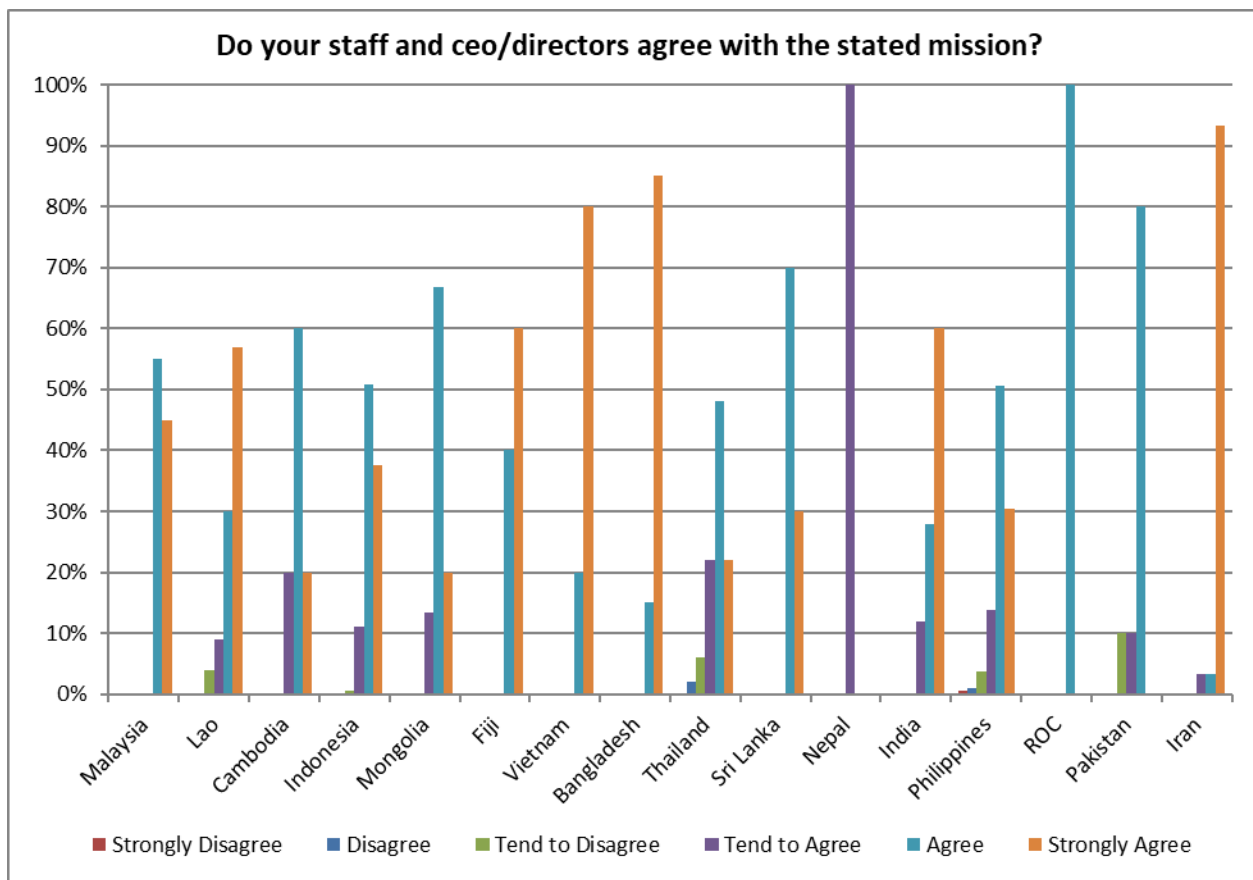

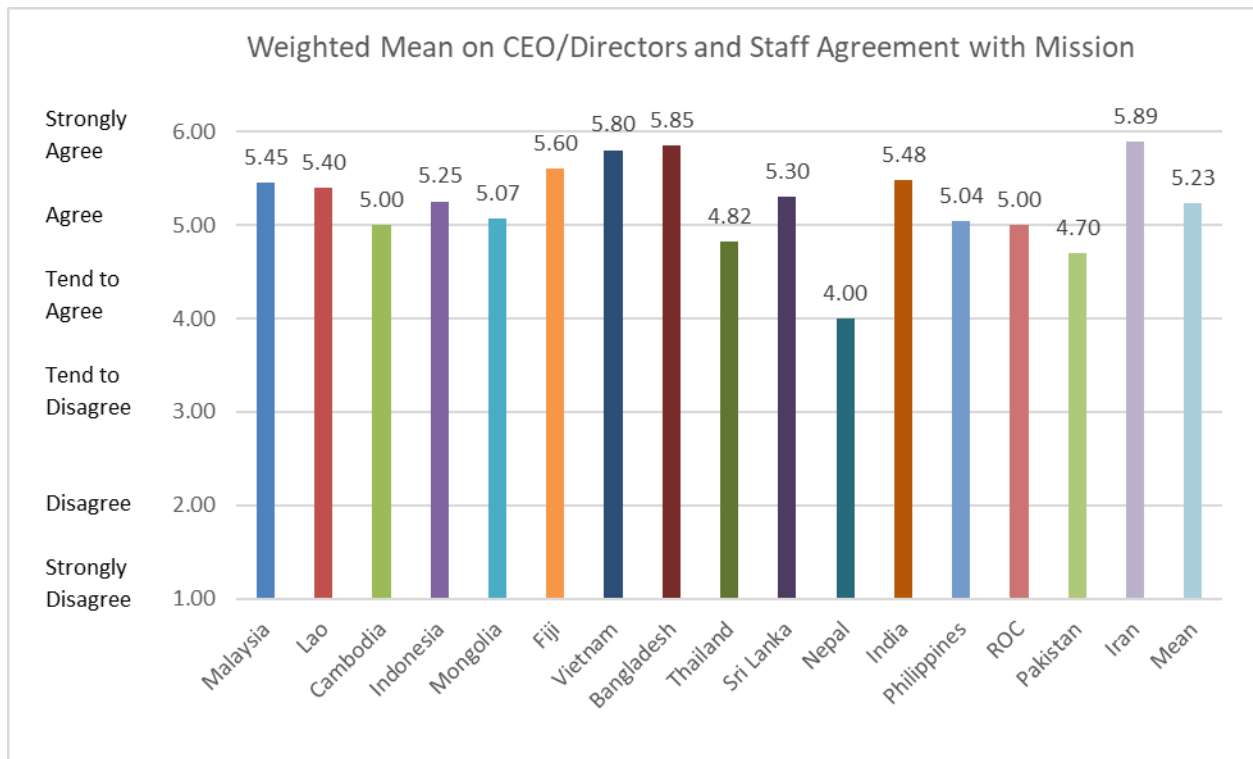

2.8 d) Suggested changes to the vision by partners:

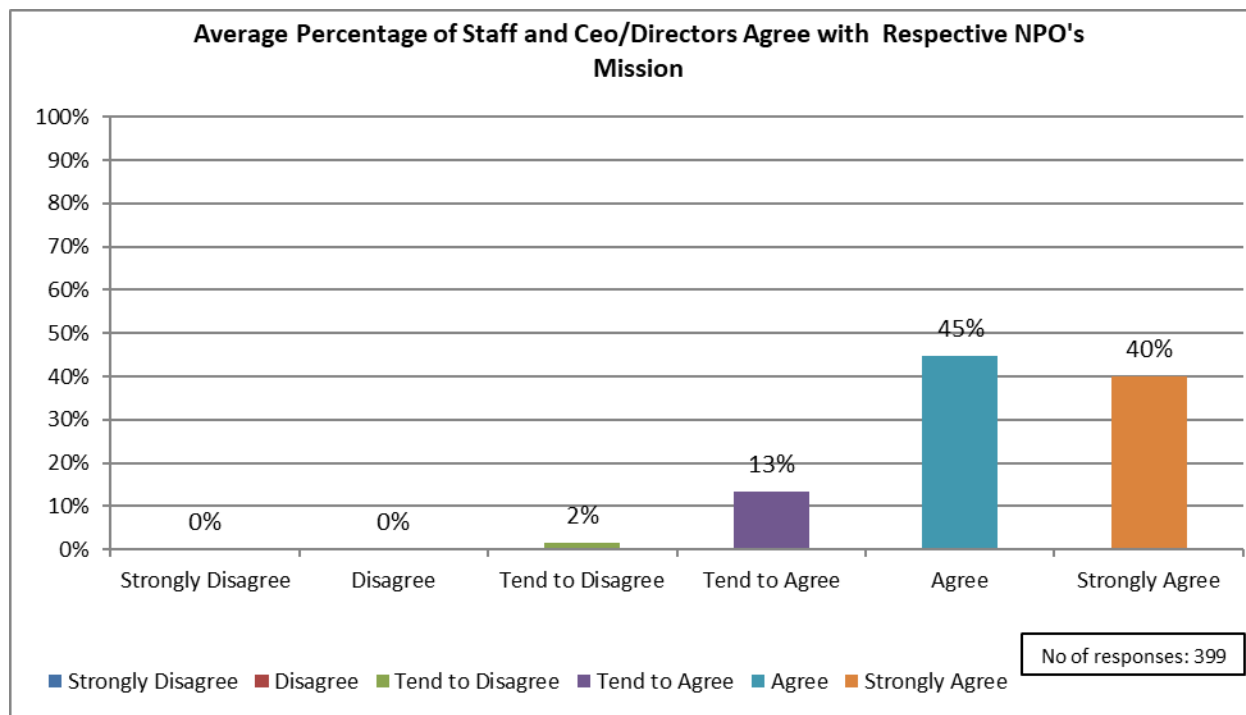

- Partners agree that a shorter and crispier vision statement would be fitting, and one that is measurable (Fiji).
- Also that the university has the higher education agenda as well as TVET and productivity so it's difficult to give same attention to all (Fiji).
- Sri Lanka to become the centre of excellence for Productivity Promotion in Asia" by the year 2020 (Sri Lanka).
- Sri Lanka to become the hub of excellence for the productivity promotion in Asia by empowering workforce (Sri Lanka)..
- The Vision appears to be too broad based – could be more focused on improving productivity in all sectors (with focus of SMEs) without compromising on quality and in line with national priorities (like how can NPC contribute to “ Make in India” Vision) (India).
- Simplify the vision. Please make it short, direct to the point and concise. Here is a bold suggestion – “A globally recognized institution in public sector productivity and innovation.” (Philippines).
- An internationally recognized institution which enhances national productivity by producing top-notch public managers, generate innovative and strategic research in public sector effectivity (Philippines).

2.9 Does the NPO have a stated mission?

2.9 a) If yes, do your staff and ceo/directors agree with the mission:

	n	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree	Weighted Mean
Malaysia	20	0%	0%	0%	0%	55%	45%	5.45
Lao	20	0%	0%	4%	9%	30%	57%	5.40
Cambodia	15	0%	0%	0%	20%	60%	20%	5.00
Indonesia	18	0%	0%	1%	11%	51%	38%	5.25
Mongolia	15	0%	0%	0%	13%	67%	20%	5.07
Fiji	22	0%	0%	0%	0%	40%	60%	5.60
Vietnam	27	0%	0%	0%	0%	20%	80%	5.80
Bangladesh	21	0%	0%	0%	0%	15%	85%	5.85
Thailand	28	0%	2%	6%	22%	48%	22%	4.82
Sri Lanka	30	0%	0%	0%	0%	70%	30%	5.30
Nepal	6	0%	0%	0%	100%	0%	0%	4.00

Mean	8.3	0%	0%	0%	4%	53%	43%	5.39
Total Respondent	133							

2.9 c) Suggested changes to the mission by staff and ceo/directors

- Strong effort should be put by NPCC to be attaining the above mission (Cambodia).
- Productivity (and quality) needs to be highlighted in the mission statement of the NPO (Fiji).
- Since the main business of the university is providing higher education, training, research and creation of knowledge, the “NPO” function (which is comparatively as lesser function) is not highlighted in the mission (Fiji).
- After the merger with higher education institutions under the Fiji National University, it has lost its autonomy in the sense that all its processes come under the University policies and procedures, and these tend to slow the speed of the business and define the character of NPO, and all its visions and directions are expressed within and under the university umbrella (Fiji).
- Some respondents feel a greater autonomy and expression for the NPO is more desirable (Fiji).
- To ensure career advancement and welfare of all personnel should not put in mission (Thailand).
- No 8 mission: To promote a productivity-based work culture is covered in mission No 2 (Thailand).
- No.1 mission: To collaborate with the public sector to propel target organizations forward and to introduce productivity concept on a broader scale: shall not only cover public sector but also private sector (Thailand).
- To enable Sri Lanka to face the International Competitiveness through the promotion of Productivity and contribute to the National Development and enhancing standard of life (Sri Lanka).
- To contribute to productivity improvement and economic development in the country by launching productivity campaign at national level and offering training and consultancy

and services as per the needs of the clients and its own institutional competency (Nepal).

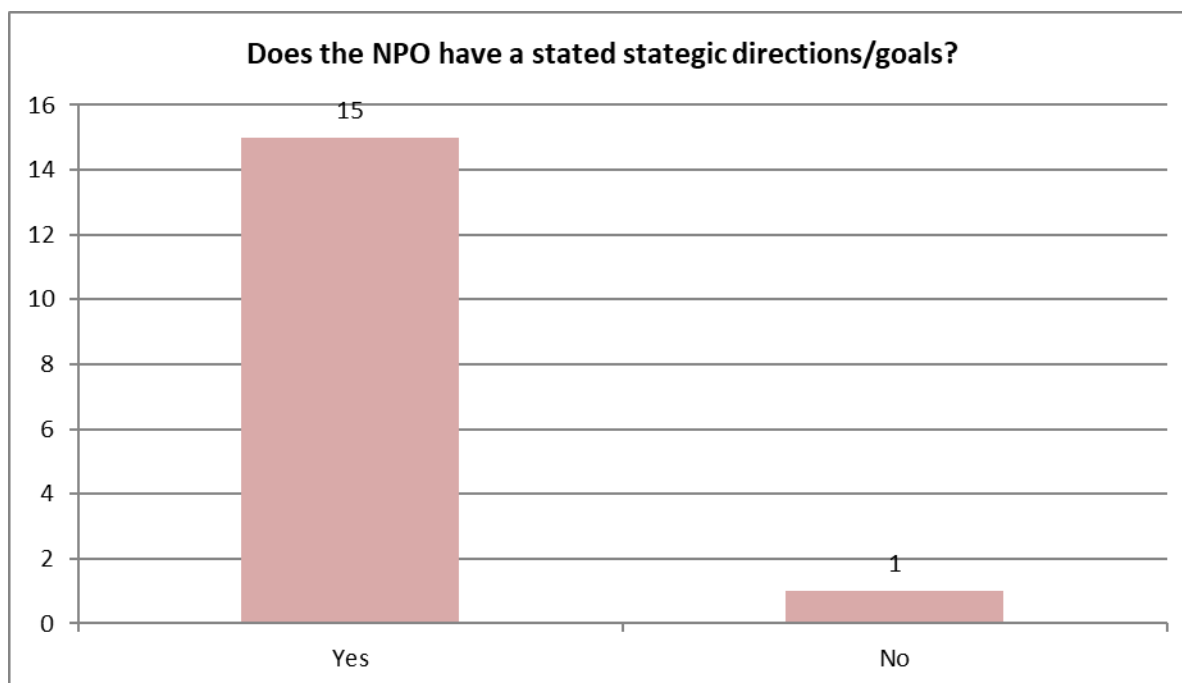

- May be revised and updated according to new initiatives taken by NPO Pakistan over recent years (Pakistan).

2.9 d) Suggested changes to the mission by partners:

- There is no mention of quality or productivity in the mission statement. This dilutes the NPO agenda of productivity promotion a bit (Fiji).
- By energizing all stakeholders to overcome international competition and to uplift the quality and the living standard of our people through national development (Sri Lanka).
- Enhance Sri Lankan productivity by energizing the sector to face international competition and to uplift living standard of our people through national development and contribute more to GDP (Sri Lanka).

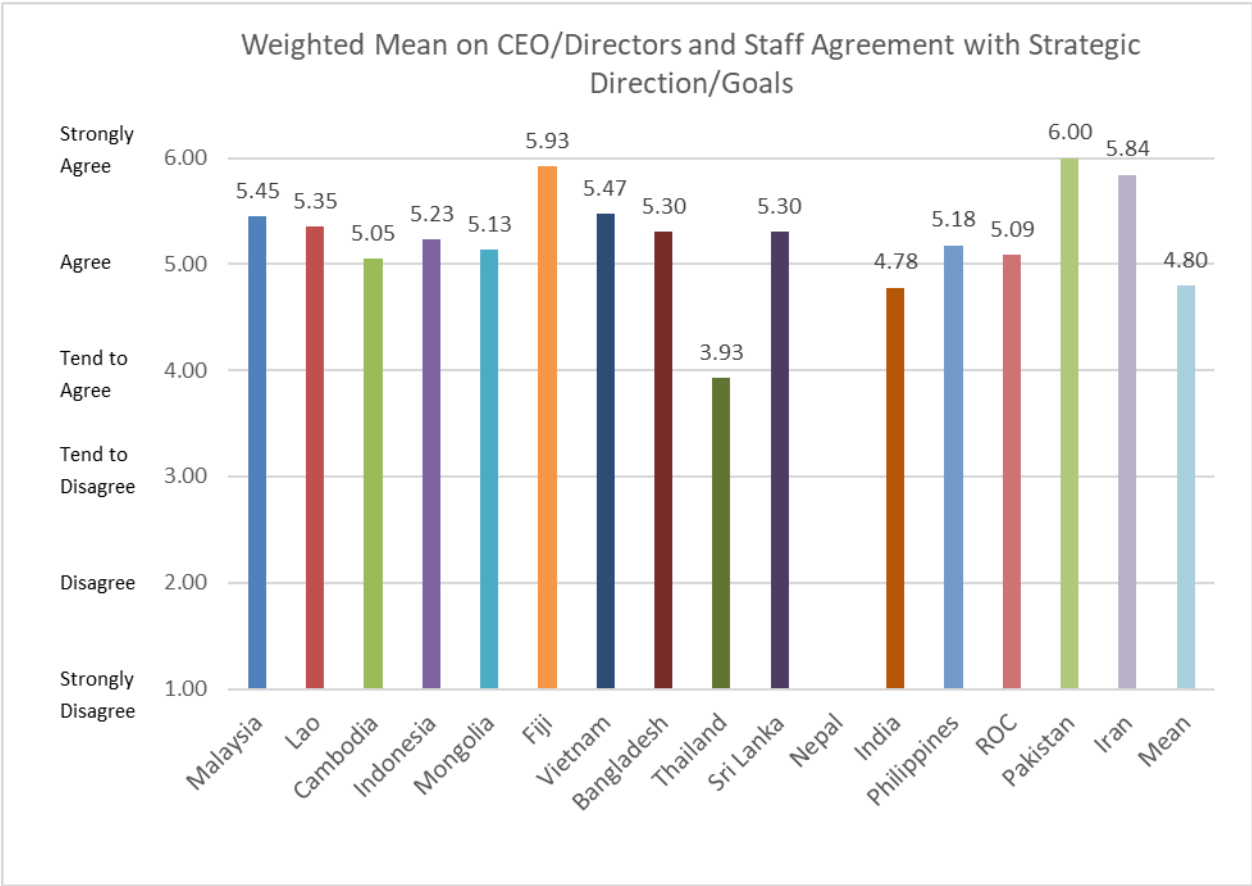

2.10 Does the NPO have a stated strategic direction/goals?

	Yes	No
Malaysia	1	0

Total Respondent	145							

2.10 c) Suggested changes to the strategic direction /goals by staff and ceo/directors:

- To add SME's development issue and Knowledge building institutions (Mongolia).
- In todays context, TVET is of strategic importance to the development of the country and the government has also emphasized this significant role (Fiji).
- TVET (and technical training in the trades areas) need to be separately emphasized. We are doing this though our activities, but it may not be expressed in the strategic directions as such (Fiji).
- Develop new products /services/improve professional /knowledge of consultants/technical officers (Thailand).
- Undertake research, trainings and consultancy in priority areas for manufacturing, agriculture services for productivity improvements and quality assurance (Nepal).
- Assist in building technological capability for SMEs through information sharing, negotiation and technological adaptations and diffusions (Nepal).
- Provide technical and managerial services for promotion of rural agro-based enterprises and value-chain creation through efficient resource utilization and networking (Nepal).
- Strengthen NPEDC capacity for technical, managerial and market enhancing services for export oriented rural enterprises (Nepal).

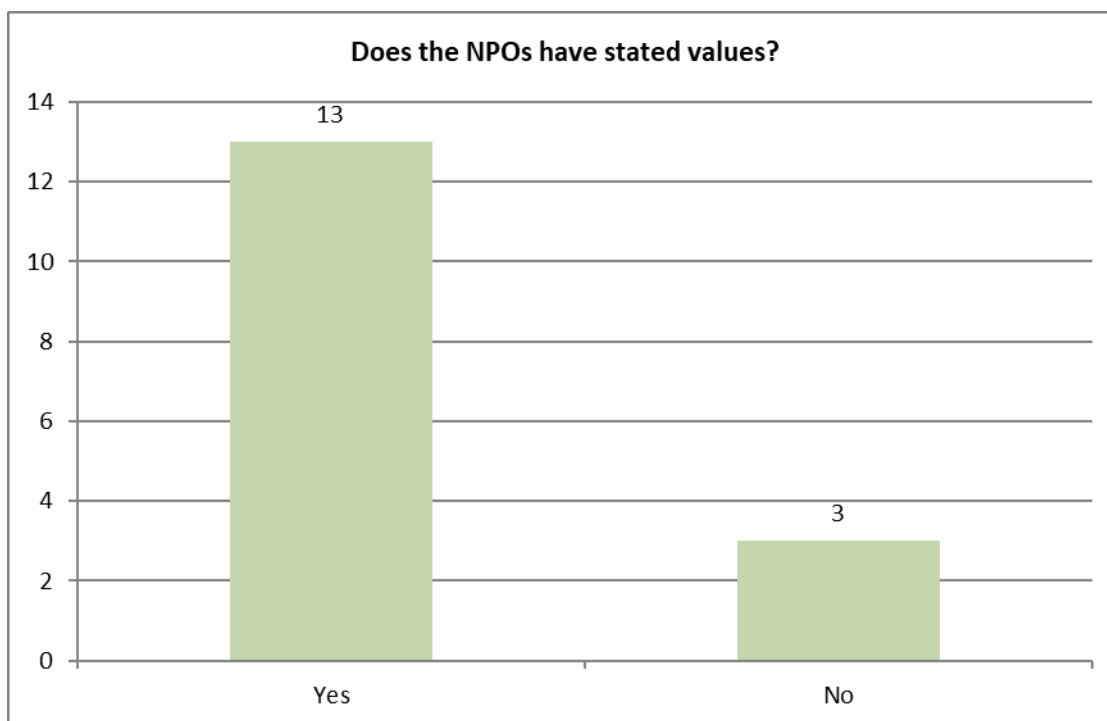

2.10 d) Suggested changes to the strategic direction /goals by partners:

- The NPO has too many functions and activities and they cannot be expressed in the strategic directions (Fiji).
- The directions of the university and the directions of the NTPC side may not be same as they serve different clients and purposes (Fiji).

- In the last strategic direction, the term “Sustainable Development” could replace part of the text starting with ‘environment’ (India).
- New goals as per latest industrial needs and initiatives of NPO can be added. Previous goals may be modified accordingly (Pakistan).

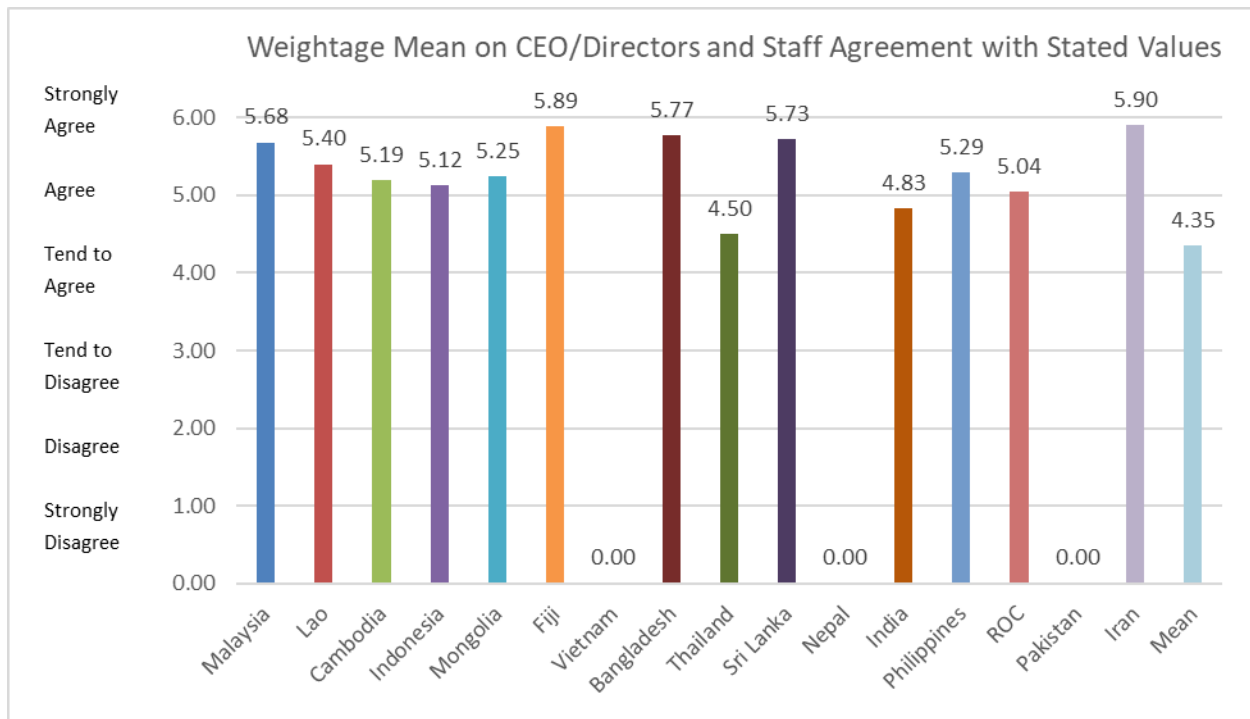

2.11 Does the NPO have stated values?

	Yes	No
Malaysia	1	0
Lao	1	0
Cambodia	1	0
Indonesia	1	0
Mongolia	1	0
Fiji	1	0
Vietnam	0	1
Bangladesh	1	0
Thailand	1	0
Sri Lanka	1	0
Nepal	0	1
India	1	0
Philippines	1	0
ROC	1	0
Pakistan	0	1
Iran	1	0
Total	13	3

2.11 a) If yes, do your staff and ceo/directors agree with the values of the NPO:

	n	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree	Weighted Mean
Malaysia	20	0%	0%	0%	2%	22%	75%	5.68
Lao	3	0%	0%	2%	12%	30%	56%	5.40
Cambodia	15	0%	0%	0%	12%	55%	33%	5.19
Indonesia	18	0%	0%	0%	13%	63%	25%	5.13
Mongolia	11	0%	0%	0%	0%	75%	25%	5.25

Pakistan	20	0%	0%	0%	0%	0%	0%	0.00
Iran	30	0%	0%	0%	3%	3%	93%	5.90
Mean	21.6	0%	0%	1%	6%	35%	39%	4.35
Total Respondent	345							

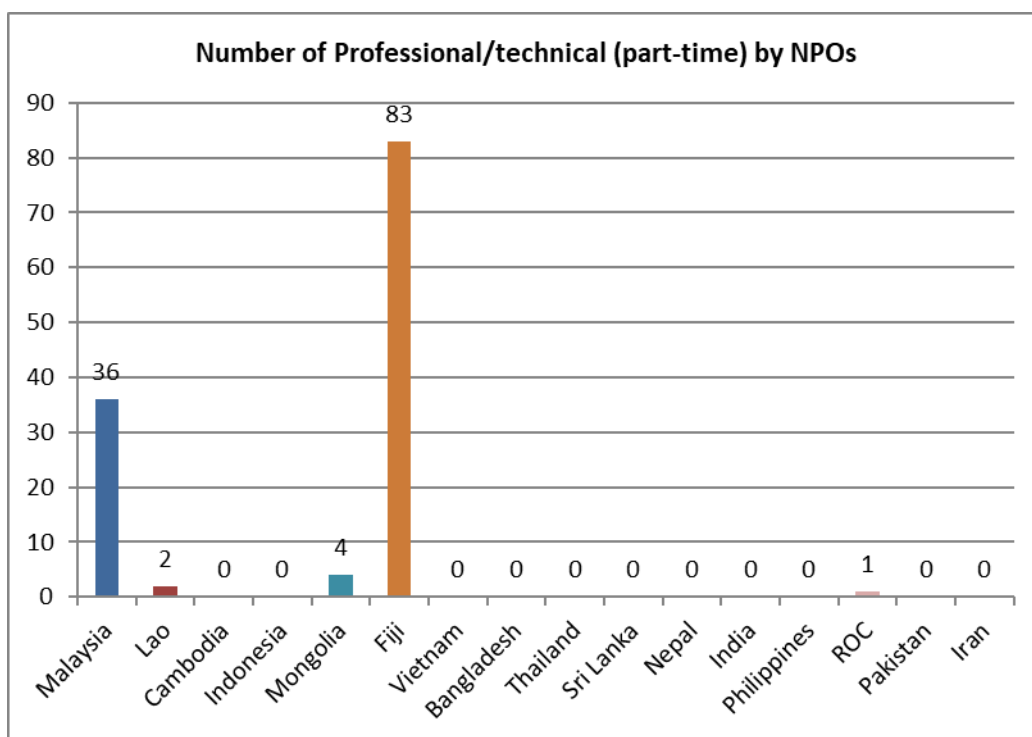

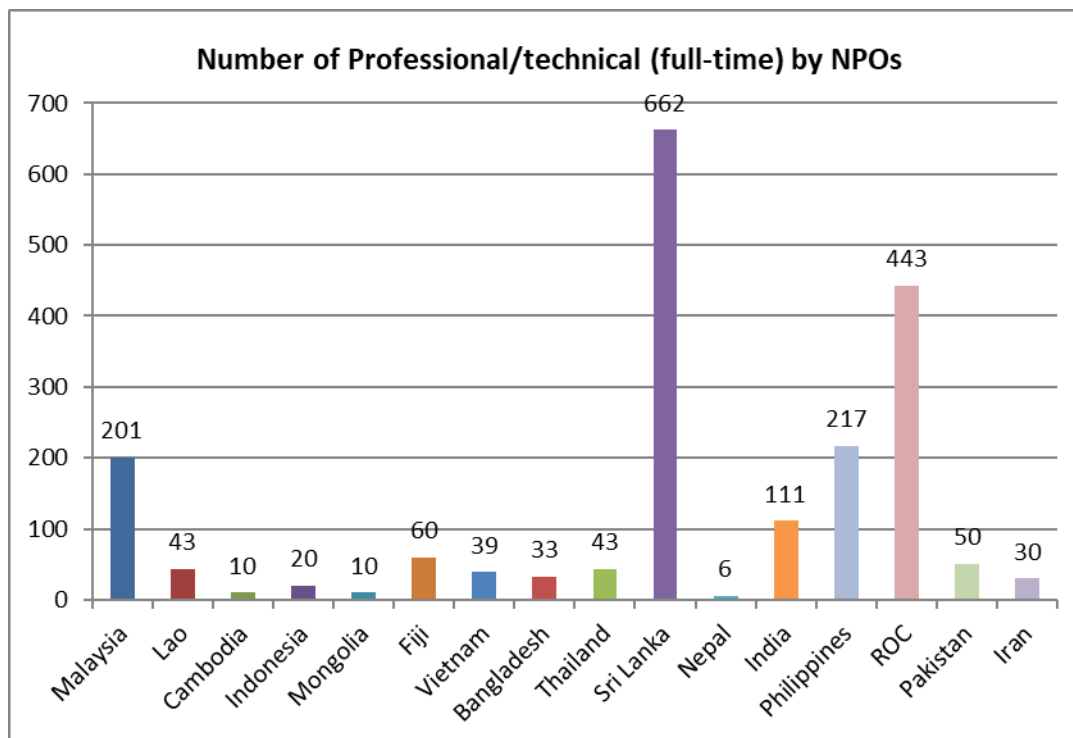

2.11 b) Suggested changes to the values by staff and ceo/directors:

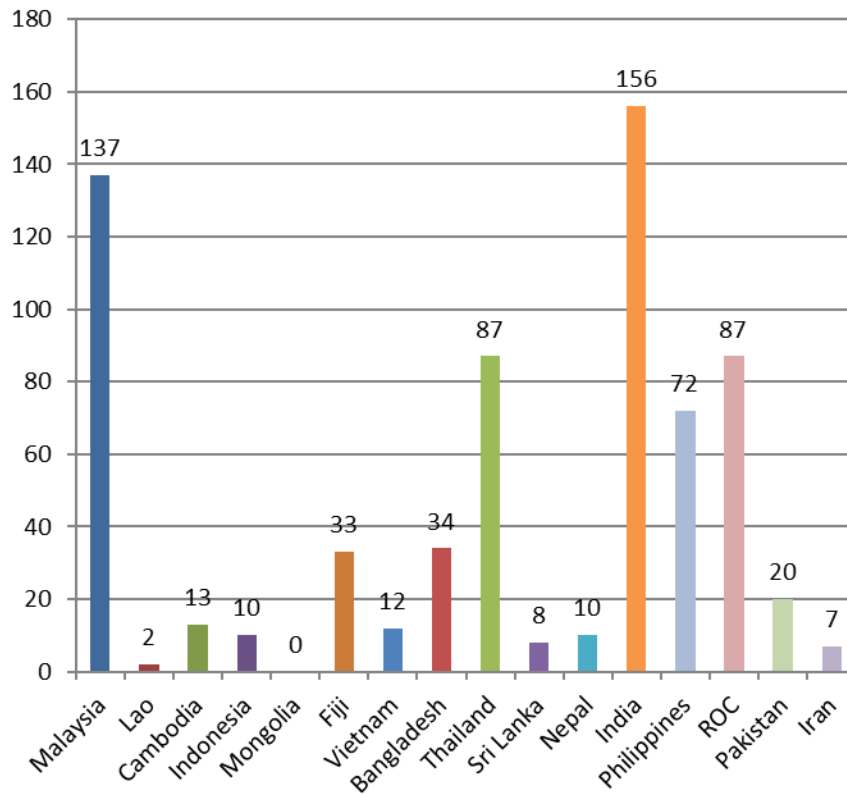

- There were suggestions for 1) Innovation, 2) Respect and Trust, and 3) Entrepreneurship (Fiji).
- Should consider the definition that support strategic objective rather than use FTPI without unique with vision (Thailand).
- Competitiveness through quality and fair business practices: Open and fair playing fields (Nepal).
- High technical and professional standards of Staffs. Competency and reward on merit based system (Nepal).
- Efficient and good working conditions at NPEDC (Nepal).
- New enhancements could include work ethics and work culture (India).
- Values can only be met if work comes from varied fields, but as for now it is only into industrial sector (India).

2.22 What productivity improvement services has your NPO provided in the last year and which ones are most important?

Productivity services	A. What productivity improvement services has your NPO provided in the last year? <i>(Data source: Obtained from CEO/directors and/or relevant personnel)</i>	B. For those that you have placed an X against: what was the level of interest in these services? Low (L) – used by less than 20 organizations, Medium (M) – used by 21 to 100 organizations, or High (H) – used by 100's of organizations <i>(Data source: obtained from CEO/directors and/or relevant personnel)</i>	C. For each of the services below record the % of customers that indicated the service as one of their top 10 choices <i>(Data source: from customer survey data show the top 5 services)</i>	D. For each of the services below record the % of partners that indicated the service as one of their top 10 choices. <i>(Data source: from partner surveys)</i>	E.. From the whole list of services which 10 services did your CEO/directors think are the most important for the future for your country?. <i>(Data source: obtain the consensus view of CEO/directors at a meeting or use CEO/director survey data)</i>

2.30 How can the partner relationship be enhanced in future?

Feedback

- Sharing knowledge with MPC and communication with other consultants in similar project type (Malaysia).
- Chance to conduct any related APO programs (Malaysia).
- Relationship based on mutual respect and more open for mutual benefits to both parties (Malaysia)
- LNPO should be aware of working together with partner very often to exchange information and opinion on the socio-economic development, mainly in the SMEs' technical support in order to uplift the quality standard of existed product of factory/company as a whole country (Lao).
- Pro-active initiative by NPCC (Cambodia).
- It is possible to extent the partnership such as in research, consultancy and training
- Clear assignment of each designated staff to facilitate the Secretariat of NPB (Indonesia).
- MPO's mission and strategic objectives are consistent with the implementation of policy at the level of transactions. So it will be strong (Mongolia).
- Addressing the most important sector was public and would work to promote public well done (Mongolia).
- Improving operations base on customer satisfaction as regular surveys (Mongolia).
- Improving promotion activities /for disseminate productivity improvement activities (Mongolia).
- Include the key partners in dialogue and in all industry discussion forum's Fiji wide (Fiji).
- Partners can contribute to the delivery in their core areas and industry participation will enhance the NPO services (Fiji).
- Have more labor management cooperation type projects, refer data sheet for more (Fiji).
- The core partners should be included in all Industry Technical Advisory Committees (ITACs)—some do not attend now (Fiji).
- Partners can contribute to policy and some of these policies can be taken back to industry (Fiji).
- Partners can help sponsor some of the big events of the Centre (Fiji).
- Extend the cooperation in other services (Thailand).
- By maintaining a updated website and designing a very good communicational channel with partners (Sri Lanka).
- Relationship can be enhanced by providing more opportunities for training programs, conference and workshops (Sri Lanka).
- Communication (Sri Lanka).
- Constant dialogue with the stakeholders is necessary. At present the two ways communication is only one sided. Partner or stakeholder views should be encouraged. For action plans, the stakeholder dialogue should be made available for all. All partners should be used to attain the strategic goals of the NPS (Sri Lanka).
- Implementing joint training, research and consultancies (Sri Lanka).
- Organize conference for once in 3 months. Enhance training opportunities local

and foreign (Sri Lanka).

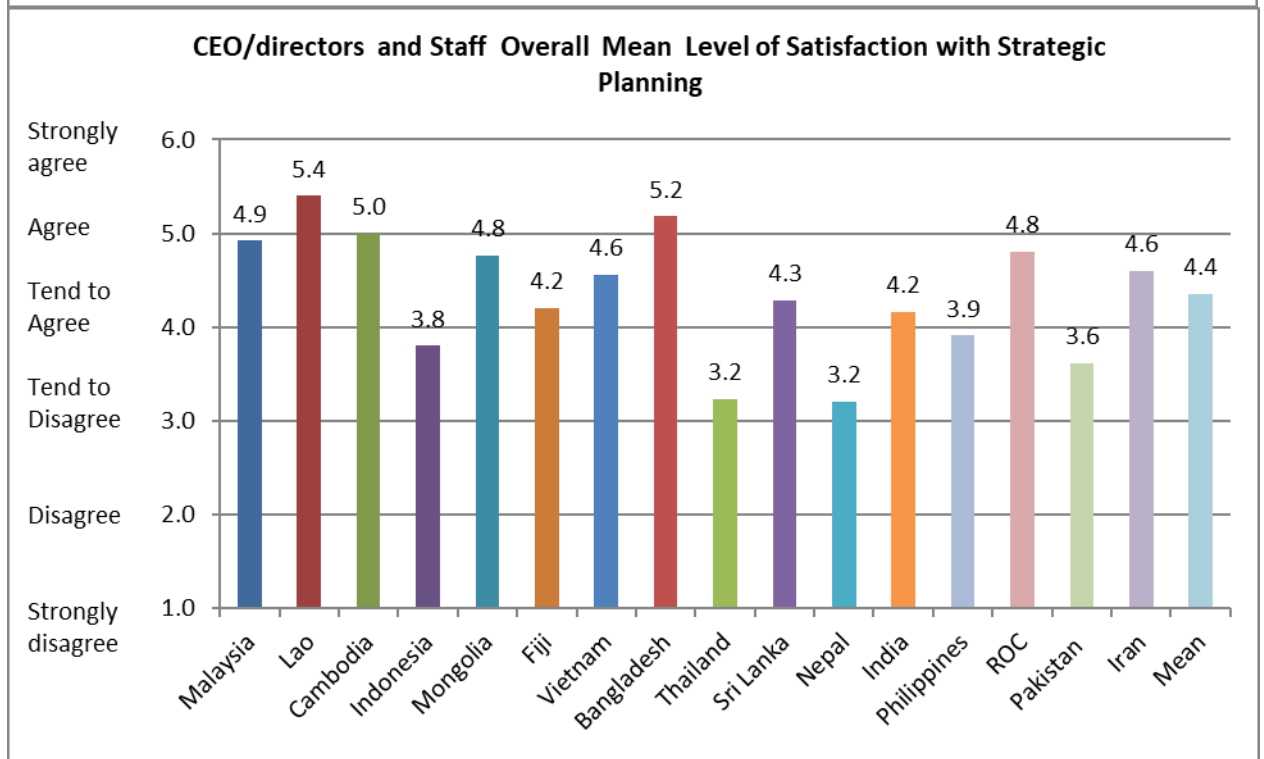

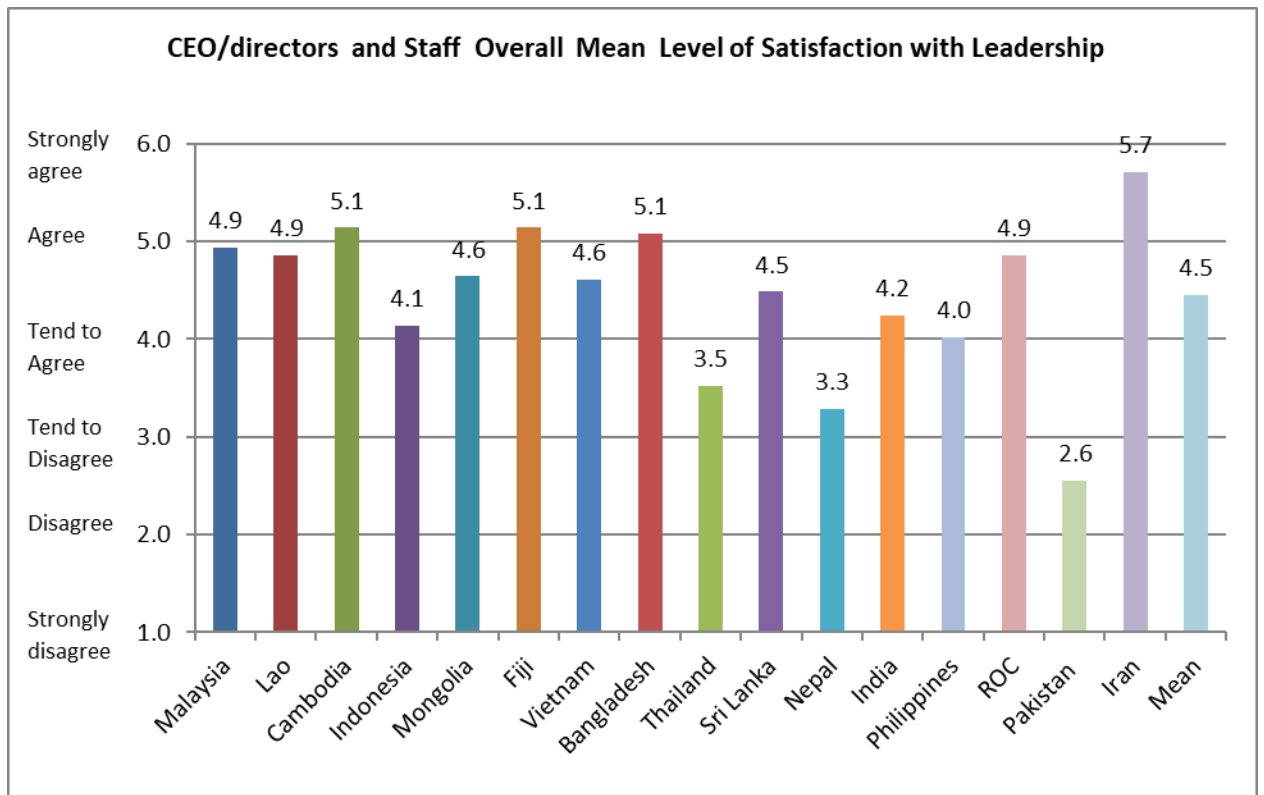

- Provide more time for involvement with NPS activities (Sri Lanka).
- NPS had to have an Event Calendar where any organization can access (Sri Lanka).
- The government should declare that the implementation of productivity tools and techniques as a mandatory requirement. Especially for the public sector (Sri Lanka).
- NPEDC needs to be strengthened first (Nepal).
- QCI's main objective is quality promotion and conformity assessment (India).
- Productivity and quality need to go hand in hand and both organizations could benefit from a robust partnership (India).
- Areas for cooperation could be in creating awareness, promoting quality / productivity tools in SMEs, consultancy in improving quality / productivity (India).
- NC can join hands with NITIE to offer executive education programs in specific areas and development of cases (India).
- Possibilities of utilizing lab facilities at both the institutes can be explored for the benefit of wider audience (India).
- Organizing more Joint Projects with partners (Pakistan).
- Arranging study missions for partners to have better understanding about APO and its mission/programs (Pakistan).
- Organizing programs as per Partner needs and preferences (Pakistan).
- Over time and by moving to more active projects, NIPO shall be more effective (Iran).
- In project productivity improvements can make NIPO very powerful (Iran).

APPENDIX 3: NPO PERFORMANCE RESULTS

This Appendix shows the performance of each NPO with respect to a balanced set of performance measures covering:

7. *Product and Process Outcomes*
8. *Customer Focused Outcomes*
9. *Workforce Focused Outcomes*
10. *Leadership and Governance Focused Outcomes*
11. *Financial and Market Outcomes (Indirect outcomes – national outcomes NPOs contribute to but it is difficult to measure their impact on. Some measures are repeated from Appendix 1)*
12. *Financial and Market Outcomes (Direct outcomes – outcomes the NPO can directly measure)*

If “No data” has been recorded it means that the NPO has not responded to the question. “Na” refers to the question being “Not applicable” for the NPO.

3.1 This question seeks information about your NPO’s performance results. For all calculations in the Workforce Focused Outcomes section include only full-time/professional/technical staff.

3.1.1 Product and Process Outcomes

3.1.1.1 Training course attendees

Country	Training course attendees * Result 2012	APO Ranking 2012	Country	Training course attendees * Result 2013	APO Ranking 2013

APPENDIX 4: NPO SWOT ANALYSIS

This Appendix shows each NPOs' most important strengths, weaknesses, opportunities and threats (SWOT) in relation to Government/Partners, Private Sector and Public Sector. The SWOT analysis was undertaken by the senior executive team of each NPO.

In addition, nine countries (Sri Lanka, Indonesia, Fiji, Malaysia, Nepal, Lao, Thailand, India and Bangladesh) ranked their three most important strengths, weaknesses, opportunities and threats with the most important strength, weakness, opportunity or threat ranked as "1", the second most important as "2" and the third most important as "3". This data is summarised at the end of the Appendix.

4.1 Bangladesh

Criteria: - What are the NPO's strengths in terms of its relationship with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What are the NPO's strengths that assist it in developing, delivering and improving services to the private sector and public sector? - What does the NPO do well? - What unique resources can you draw on? - What do others see as your strengths? (Strengths typically relate to practices, people, processes, that are INTERNAL to the NPO)	Strengths	Weaknesses	Criteria: - What are the NPO's weaknesses in terms of its relationship with government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What are the NPO's weaknesses when developing, delivering and improving services to the private sector and public sector? - What could the NPO improve? - Where do you have fewer resources or less technical ability than others? - What are others likely to see as weaknesses? (Weaknesses typically relate to practices, people, processes, that are INTERNAL to the NPO)
	Government/partners	Government/partners	
	<ol style="list-style-type: none"> 1. NPO has an opportunity for searching ideas, guidelines and package profile from the highest body named National Productivity Council (NPC) headed by Honorable Minister Ministry of Industries subject to need and utilities of the stakeholders. 2. Active networking with Ministries and different Government department. 3. Productivity wage commission. 	<ol style="list-style-type: none"> 1. NPC the Apex body of government to take long time change of productivity program to meet the requirement. 2. Absence of productivity policy/ rules/regulation to integrate other policies to productivity. 3. Take long time to implement policy, decision and implement program. 	
	Private Sector	Private Sector	
	<ol style="list-style-type: none"> 1. Private sectors are providing recurring expenditure and other facilities to perform NPO productivity activities in private sector. 2. Render Consultancy services to get better result. 3. Conduct benchmarking survey to identify their position. 	<ol style="list-style-type: none"> 1. To train and upgrade the skills of industrial personnel in the technical and managerial field. 2. Information technology is very weak to develop the partnership for sustainable development of productivity. 3. Lack of willingness to implement government decision and policy. 	
	Public Sector	Public Sector	
	<ol style="list-style-type: none"> 1. Render Consultancy services to get better result. 2. Quality Management: 5s, Kaizen, TQM, QCC, ISO 9000. 3. Creation of Consciousness building of productivity as normal way of life. 	<ol style="list-style-type: none"> 1. Low quality of raw materials and product, poor maintenance of machine/equipment, absence of cleaner production system, bad layout, want of harmonious labor management relation. 2. Labor incentive. 3. Information technology is very weak to develop the partnership for sustainable development of productivity. 	

<p>Criteria:</p> <ul style="list-style-type: none">- What opportunities are available to the NPO in terms of developing relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)?- What opportunities are available for developing, delivering and improving services to the private sector and public sector?- What opportunities are open to the NPO?- What trends could you take advantage of?- How can you turn your strengths into opportunities?- (Opportunities typically relate to the EXTERNAL environment that the NPO may have little control of))	Opportunities	Threats	<p>Criteria:</p> <ul style="list-style-type: none">- What threats may harm the NPO's relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)?- What threats may prevent the NPO to develop, deliver and improve services to the private sector and public sector?- What threats could harm the NPO?- What is your competition doing?- What threats do your weaknesses expose you to? (Threats typically relate to the EXTERNAL environment that the NPO may have little control of)
	Government/partners	Government/partners	
	<ol style="list-style-type: none">1. Ministries & Departments should have specific task for productivity improvement activities.2. Donor/government project may help NPO to implement new program.3. National conference on productivity program implementation.	<ol style="list-style-type: none">1. Most of the Ministries & Departments do not possess any specific task for productivity improvement.2. Government agencies are busy to solve their own problem and take long time to take decision.3. NPC decision is time consuming and enterprises have no obligation to follow NPC decision.	
	Private Sector	Private Sector	
	<ol style="list-style-type: none">1. Formulate mechanism for fair distribution of productivity gains.2. Link NPO with private apex body like FBCCI and other trade body.3. Arrange seminar, symposium and workshop.	<ol style="list-style-type: none">1. Private sector may not provide recurring expenditure and other facilities to perform productivity program.2. Private sector may not encourage with the new techniques and instruments of productivity and may think as burden to their work.3. Enterprise linked productivity with their performance.	
	Public Sector	Public Sector	
	<ol style="list-style-type: none">1. Establishing various productivity competitions and award.2. Counseling and interaction with the presence of management and base level people.3. Create productivity improvement cell in enterprises to implement integrated productivity strategies.	<ol style="list-style-type: none">1. Workers and unions are less motivated.2. Enterprise linked productivity with their performance.3. Public sector may not encourage with the new techniques and instruments of productivity and may think as burden to their work.	

4.2 Cambodia

Criteria: - What are the NPO's strengths in terms of its relationship with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What are the NPO's strengths that assist it in developing, delivering and improving services to the private sector and public sector? - What does the NPO do well? - What unique resources can you draw on? - What do others see as your strengths? (Strengths typically relate to practices, people, processes, that are INTERNAL to the NPO)	Strengths	Weaknesses	Criteria: - What are the NPO's weaknesses in terms of its relationship with government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What are the NPO's weaknesses when developing, delivering and improving services to the private sector and public sector? - What could the NPO improve? - Where do you have fewer resources or less technical ability than others? - What are others likely to see as weaknesses? (Weaknesses typically relate to practices, people, processes, that are INTERNAL to the NPO)
	Government/partners	Government/partners	
	<ul style="list-style-type: none"> NPCC is in the Ministry of Industry and Handicraft (MIH) of the Government of Cambodia which is a potential partners in official cooperation to support SMEs and Private sector) NPCC is an NPO of APO Implemented Productivity movement/Development Implemented MIH agenda by providing BDS to SMEs and implemented Rectangular Strategy III of Government Productivity Promotion BDS providing on productivity improvement and general management Government Budget and development partner's fund APO, JICA, IFC Effective organization Reliable Productivity Development Center 	<ul style="list-style-type: none"> Budget of Government is very limited Recruitment more staff for NPCC is not on demand Limited Facility and Space No freedom in income management Lack of Budget NPCC Consultants have limited in number and skills on Productivity improvement tools If Supporting by High leadership of MIH NPCC lack of flexible decision making authority. Limited ability to respond to the BDS demand Government looked NPCC as less important than others 	
	Private Sector	Private Sector	
	<ul style="list-style-type: none"> Proven reliable partners in cooperation for productivity promotion, implementation and productivity tool and techniques. (Strong cooperation with FASMEC, YEAC, CWEA and etc.) Some basic quality managements and Productivity tools (5S, GMP, HACCP and etc.) Training and consulting: 5S, GMP, HACCP Two programs per year and several programs of APO Productivity improvement resources, Government support and cooperative spirit 	<ul style="list-style-type: none"> Private Sector mind's set on free service Limited Consultants and skill on productivity tool and techniques Limited Facility and Budget If private sector support by sharing burden on budget and facility Limited Consultants and skill on productivity tool and techniques Private saw NPCC as on project based 	
	Public Sector	Public Sector	
	<ul style="list-style-type: none"> NPCC used to successfully introduced Knowledge Management (KM) has priority among ministries' members of Council of Administrative Reform (CAR) in council of Ministers Introduced Knowledge Management (KM) to the lines ministries Able to request lines ministries to use their own resource Productivity improvement resources, Line Ministry with cooperative spirit 	<ul style="list-style-type: none"> Free Service Expectation Limited Consultants and skill on productivity tool and techniques Limited Facility and Budget If concerned Ministries support by sharing burden on budget and facility Limited Consultants and skill on productivity tool and techniques Limited Facility and Budget Other ministries lack of awareness and/or confidence on NPCC capability 	

<p>Criteria:</p> <ul style="list-style-type: none"> - What opportunities are available to the NPO in terms of developing relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What opportunities are available for developing, delivering and improving services to the private sector and public sector? - What opportunities are open to the NPO? - What trends could you take advantage of? - How can you turn your strengths into opportunities? - (Opportunities typically relate to the EXTERNAL environment that the NPO may have little control of) 	<p>Opportunities</p> <p>Government/partners</p> <ul style="list-style-type: none"> • Having strong leadership support Leadership (Senior Minister, Secretary of State (SS), Under-Secretary of State (USS)) support and networking (Provincial Departments). • NPCC Consultants would be able to serve as focal/epic centered for productivity movement in Cambodia • Government Rectangular Strategy III • Government and APO support in attaining the assigned tasks and duties 	<p>Threats</p> <p>Government/partners</p> <ul style="list-style-type: none"> • Consistency of NPCC's Management and support from Capable leadership of MIH • Limited Budget support from government • In flow of oversea or international consultants • NPCC competitiveness so far has been doing fine with basic tools like 5S and GMP, HACCP, KM and etc. • NPCC competency has been still very limited 	<p>Criteria:</p> <ul style="list-style-type: none"> - What threats may harm the NPO's relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What threats may prevent the NPO to develop, deliver and improve services to the private sector and public sector? - What threats could harm the NPO? - What is your competition doing? - What threats do your weaknesses expose you to? (Threats typically relate to the EXTERNAL environment that the NPO may have little control of)
	<p>Private Sector</p> <ul style="list-style-type: none"> • NPCC has been so far credited by private sector and they are looking for innovative support from NPCC • NPCC success story from provide training and consulting: 5S, GMP, HACCP and etc. would be the models • Increasing Demand for Training and consulting: 5S, GMP, HACCP • Private sector willing to contribute 	<p>Private Sector</p> <ul style="list-style-type: none"> • Fragile economy and limited capability of local business (entrepreneurship capacity) • Lack of support (especially on budget) from government and stakeholders • Business development Service Providers from other countries 	
	<p>Public Sector</p> <ul style="list-style-type: none"> • Other ministries would cooperate with NPCC if they could benefit from certain programs • The Cambodia Government welcoming the Public Sector Improvement. KM (Knowledge Management) is the best product to launch to promote NPCC • Designing practical programs to convince public sector to enhance productivity 	<p>Public Sector</p> <ul style="list-style-type: none"> • Understanding on Benefit of Productivity enhancement among Leadership's of the others ministries • Public Sector Lacks of motivation in improving productivity 	

Note:

BDS: Business Development Service
FASMEC: Federation of Associations of Small and Medium Enterprises in Cambodia
MIH: Ministry of Industry and Handicraft,
NPCC: National Productivity Centre of Cambodia

4.3 India

Criteria:	Strengths	Weaknesses	Criteria:
	Government/partners	Government/partners	
<p>- What are the NPO's strengths in terms of its relationship with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/NPO Council Members/Governing Board/APO)?</p> <p>- What are the NPO's strengths that assist it in developing, delivering and improving services to the private sector and public sector?</p> <p>- What does the NPO do well?</p> <p>- What unique resources can you draw on?</p> <p>- What do others see as your strengths? (Strengths typically relate to practices, people, processes, that are INTERNAL to the NPO)</p>	<ol style="list-style-type: none"> 1. Tripartite arrangement where stakeholders cover government, employers, and labor – so NPC is seen as a fair, independent, unbiased, impartial organization: This is seen as a very positive strength across all sectors. 2. Large team of Multidisciplinary Consultants/ Knowledge workers: Competencies enable Consultants to provide interventions in diverse fields and offer total solutions to the client. 3. Long standing organization with Pan India presence, with offices in 12 ROs & 1 Training Center: This strength enables the organization to cater to Govt., Private Sector as well as to the Public Sector needs across the country. <ul style="list-style-type: none"> • Niche areas of work and developed strengths such as Energy, Environment, Process Audit, Impact evaluation, Quality auditing and Institution Building: This makes NPC a preferred organization for providing consultancy support in all sectors • Government funds part of the NPC budget and quite frequently awards assignments to NPC on nomination basis: NPC is always prepared to provide consultancy support when required by the Govt. • The reputation and size of NPC encourages international organizations like Deloitte, PwC, KPMG, E&Y like to sign MOUs / Collaborate with NPC, mutually benefitting both parties: This is a major strength and such collaborations benefit all stakeholders • Excellent relations with institutions of higher learning. The Director General is a member on the governing body of institutions like IIMs, AICTE. Collaborating with reputed institutions like IITD, for working on combined projects, studies: Qualitative improvement in research and project output through latest knowledge inputs benefits all sectors • Have MOU with NIT (Trichy) whose students can gain hands – on experience as Interns for 3 months in Energy Efficiency technology, at NPC's Center of Excellence, at AIP, which has state – of – the – art facility h) This hands – on experience enables such students to play a very professional role in the relevant field in all the 3 sectors. Such Centers of Excellence should be replicated in other locations with other reputed educational institutions • AIP Training Facility for in-house training and education of newcomers for continual supply of professionally trained workforce both for NPC requirements and industry requirements like Process Management (Industrial Engineering) Environment Management, Energy, HR and certain programs to further NPC's strengths) A 	<ol style="list-style-type: none"> 1. Ratio of Technical to Support staff is skewed /not favorable (1: 1.26). Because of carrying a large number of support staff and overheads, can't really bid at L1 level: This gets reflected in the costing as the ideal ratio for consultancy organizations is generally 1:0.5. There should be a regular intake of consultants at entry level, which is held up for the last around 4 years. 2. Need to increase visibility – Certain sectors / organizations know NPC as specialized in certain areas: Branding needs to be done which will help position NPC as a preferred Consultancy and Training organization. . 3. Not all are competent or self-motivated. The organization is being run as a government department and not as a professional set up: This is serious and making the organization professionally run will benefit all sectors and turnover will also grow. There should be mobility / collaboration between NPC & professional institutions like the IIMs in understanding as well as in demonstrating practical industrial experience in productivity. <ul style="list-style-type: none"> • Recognition for good work is not happening across the organization. Standardized increments seem to hinder performance and motivation: There is need to work within the government structure. • Sometimes much time is spent on administrative work / procedures losing out on quality time for core work: Ease of doing business and simplification of procedures needs to be looked into which will enhance productivity and thus benefit all sectors • Can't take up smaller assignments as it turns out to be cost ineffective while other organizations can clinch such deals due to their size: This impacts the bidding by NPC and thus in losing assignments all sectors lose out on the expert services that could have been provided by NPC. • Governing Body is too big – needs to be reshaped with 	<p>- What are the NPO's weaknesses in terms of its relationship with government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/NPO Council Members/Governing Board/APO)?</p> <p>- What are the NPO's weaknesses when developing, delivering and improving services to the private sector and public sector?</p> <p>- What could the NPO improve?</p> <p>- Where do you have fewer resources or less technical ability than others?</p> <p>- What are others likely to see as weaknesses? (Weaknesses typically relate to practices, people,</p>

	<p>clear strength for all sectors</p> <ul style="list-style-type: none"> • In depth experience of evaluation and impact assessment of government schemes: Great benefit to the government and enables any mid course correction • Good reputation with Public Sector , gel well with them in style of working as they too are tied up with government rules: This is a great strength to the Public Sector and fees too are generally in line and acceptable to the Public Sector • NPC brings out a monthly magazine “ Productivity News ” and also a quarterly Productivity Journal on contemporary themes and shares the activities and events that NPC has undertaken during the quarter as also dissemination of Productivity data: This is very informative and is widely used by all sectors • Consultancy fees are generally less than that of large private agencies: Seen as an important factor in awarding assignments to NPC 	<p>smaller number of members: Needs to be looked into for enhancing the efficiency of NPC</p> <ul style="list-style-type: none"> • Issue of leadership - DGs come for short durations – change in leadership hinders the stability: Increase the duration of their stay so that they are able to consolidate the growth / performance of the organization which will be beneficial across sectors • In some cases, private sector views NPC as a government organization. Their view is that NPC may not be able to deliver on time, quality may not be up to the mark. They may therefore prefer to assign the work to a private agency: Need to look at Public Private Partnership for synergy and strategic working • There are other competing Government Consulting companies like Agri Finance Corporation (AFC) promoted by Financial institutions, NABARD Consulting Services, IIM L etc. While NPC is on the top on the Technical competency, but can't give a lower quotation: NPC management needs to take a comprehensive look at the issue, the outcome of which will benefit all sectors 	<p>processes, that are INTERNAL to the NPO)</p>
	Private Sector	Private Sector	
	Similar as above	Similar as above	
	Public Sector	Public Sector	
	Similar as above	Similar as above	

<p>Criteria:</p> <ul style="list-style-type: none"> - What opportunities are available to the NPO in terms of developing relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What opportunities are available for developing, delivering and improving services to the private sector and public sector? - What opportunities are open to the NPO? - What trends could you take advantage of? - How can you turn your strengths into opportunities? - (Opportunities typically relate to the EXTERNAL environment that the NPO may have little control of) 	<p>Opportunities</p>	<p>Threats</p>	<p>Criteria:</p> <ul style="list-style-type: none"> - What threats may harm the NPO's relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/ NPO Council Members/Governing Board/APO)? - What threats may prevent the NPO to develop, deliver and improve services to the private sector and public sector? - What threats could harm the NPO? - What is your competition doing? - What threats do your weaknesses expose you to? (Threats typically relate to the EXTERNAL environment that the NPO may have little control of)
	<p>Government/partners</p>	<p>Government/partners</p>	
	<ol style="list-style-type: none"> 1. This will be mandatory and all sectors will enhance their productivity resulting in overall growth and development of the economy: Plans and projections reflect and assure this which will be a big opportunity. 2. There is appropriate environment for collaboration with other organizations and experts to bring in synergy: This will strengthen the contribution that NPC will make and will open up more opportunities for NPC. <ul style="list-style-type: none"> • To enhance the competitiveness of the organization through up gradating of knowledge, skills, competencies in new areas of work / new niche areas e.g. Risk management related to operations etc.: NPC to take a relook at present areas of work, to develop new areas which will be relevant to all sectors. • To have a comprehensive National Productivity Policy covering primary, secondary and the tertiary sectors of the economy with incentive schemes built in: This will be mandatory and all sectors will enhance their productivity resulting in overall growth and development of the economy • Government should create a corpus for Productivity promotion: This will facilitate the generation of greater awareness, which will become a thrust area for all sectors to focus on 	<ol style="list-style-type: none"> 1. Depletion of professional manpower and no replacement: New ideas missed out and average age becomes high. 2. On the one hand, not to spread too thin. But on the other hand, NPC on the lookout for assignments and therefore willing to take up anything which comes its way. So sometimes NPC does not take up assignments that are in the core competency or focus area of work: Focus on revenue generation and no creation of USPs. 3. Mushrooming of small or 1 man – show organizations (Private) who can afford to quote much less: Low overhead and manpower costs.

	Government/partners	Government/partners	
	<ul style="list-style-type: none"> Existence of Clearly Defined supra-governmental documents. There are several supra-governmental documents that have emphasized the importance of productivity and /or the ultimate power of productivity in long-term development of the country. The following show a list of these documents: -The country has a written vision document that is issued by the Leader and is valid up to 2025. Vision Document is issued by the Leader and is the only vision document of the country. -Meta policy documents issued by the leader. There are 43 current meta policy documents that are to be observed by all agents in the country. Meta Policies issued by the Leader are long-term documents on specific issues. These documents have no termination dates (except the meta policy documents related to the development plans). Any medium-term plan and all laws of the country are supposed to consider the contents of the meta policies. In a sense, the long-term vision document and all long-term plans are affected by meta policy documents. It is possible to have meta policies that affect the development plan and the current state of the economy as well. -Resilient Economy Meta Policy Document: This is a specific meta policy document that is almost entirely based on the role of productivity in making Iranian economy resilient to all sorts of shocks, external and internal. The importance of this meta policy is that all public sector organizations are obliged by the order of the Government, to make their action plans related to this meta policy. This means that the public sector is legally determined to facilitate movement of productivity rise. • Fifth Development Plan Meta Policy Document: This is a meta policy document setting the guidelines for national development of country. This document has assigned a role to productivity to provide one-third of the growth of the economy during the planning period Existence of medium-term development plan with clear assignments to productivity and NIPO as explained below: • Economic Development Plan: Iran's current development plan, Fifth Development Plan, has several articles about productivity. In particular, according to the article 79 of the 5th Development Plan of the country, National Iranian Productivity Organization (NIPO) was established as a public sector organization dependent on the Vice Presidency for Strategic Planning and Supervision (VSPS). The nature of supervision is not clearly defined in the law, however, being dependent means to have a legal obligation to receive formal approval of VSPS for legal issues. Recently a new organization chart of the NIPO is approved by VSPS and in this chart NIPO has become entitled to have its own independent financial department and to become independent of VSPS in financial issues. Regarding the activities of NIPO, VSPS is informed about all NIPO activities, internal and with regards to other national and international bodies. All assignments are done with the formal and/or verbal approval of 	<ul style="list-style-type: none"> Lack of independence of NIPO: NIPO is not officially an independent national office and this can affect the policies adopted by NIPO both from time and budget point of view. Being New: NIPO, as an organization, is established only recently and this means a good part of the effort of NIPO should be diverted to its own institutional setup. 	

<p>others see as your strengths ?</p> <p>(Strengths typically relate to practices, people, processes, that are INTERNAL to the NPO)</p>	<p>VSPS.</p> <p>Under the law, NIPO's main tasks include planning, policy-making, supervision and guidance, assessment and auditing of productivity of all factors of production, including labor force, capital, energy, water and soil. The 5th Development Plan requires that 30% of growth of the country come from productivity increase. NIPO is also assigned with the task of providing a "Productivity Master Plan" for the country. This plan naturally goes beyond the 5th Development Plan. This plan must be obeyed by all institutions and agents in the country and NIPO is legally ordered to publish the reports of progress regarding the master plan periodically.</p> <ul style="list-style-type: none"> • By-law for operational aspects of Article 79 of the 5th Development Law (1390-1394) [2011-2014] (Refer to http://rc.majlis.ir/fa/law/show/803382) • Roadmap to making the Resilient Economy Meta Policy Operative. This is a document to show how public sector should act to increase the resilience of the economy. (Refer to http://aftabnews.ir/fa/news/235267) • Strong relationship with the planning arm of the Government: According to the article 79 of the 5th Development Plan, NIPO is organized under the supervision of the Vice Presidency for Strategic Planning and Supervision (VSPS). This means NIPO has a close relationship with the planning arm of the Government and this provides a good influence for NIPO on planning activity of the country. It should be noted that, however, there is no official document or law to announce VSPS's policies, strategies and priorities related to NIPO activity except article 79 of the 5th Development Law of the country. However, in order to make resilient economy meta policy working, the president has assigned tasks to various departments and ministries, including VSPS. This way, VSPS has asked NIPO to provide its policies regarding the issue of productivity in the said meta policy document. The policies approved based on this initial proposal of NIPO shall form another set of policies issued by VSPS to NIPO. • Master plan for productivity of the country: NIPO is the authority responsible to design the master plan for productivity in Iran. Such document is finalized and it is to be the main guideline for productivity movement in the country. The role of NIPO and the need to strengthen NIPO is clearly stated in this master plan. 		<p>typically relate to practices, people, processes, that are INTERNAL to the NPO)</p>
---	--	--	--

	<p>Private Sector</p> <ul style="list-style-type: none"> • NIPO cooperation with NGO's and private sector in the field of productivity: NIPO has departments that work closely with NGO's and private sector organizations. They have regular meetings with the purpose of monitoring productivity movement. • NIPO's ability to provide technical support for productivity improvements: NIPO, in collaboration with national and international organizations (like APO) is able to provide technical support to the private sector with the goal of rising productivity. Examples: Technical support and model projects. • NIPO's ability to provide training at national and international level in the field of productivity: NIPO has close ties with various economic agents in the field of productivity and NIPO is able to provide training with the aim of raising the productivity of the agents. • Public relations: NIPO has a good public relation with both private and public sector of the country: This makes a good environment for NIPO influence on the agents. Furthermore, NIPO is able to use the good relationship with different agents to outsource many activities in the future. NIPO has established good relationship with semi-counterpart organizations in the private sector. • Technical Expertise: NIPO has a team of Technical advisors who are known for deep knowledge in their fields. Some of these experts have individual long-term relationship with some public and private sector offices. This gives NIPO a good chance to be accepted as a reference source in many cases. • Technical support from APO: APO is a unique source of help to NIPO and NIPO intends to use this source as a tool to tighten its close relationship with the economy. • Technical knowledge and expertise of the team working with NIPO: The team of NIPO consisting of its employees and consultants associated with NIPO, are able to provide unique advice to any public and private sector. • High respect and acceptance for NIPO: Both the public and the private sector believe that NIPO should provide them with the road map to productivity improvement both in their units and at national level. 	<p>Private Sector</p> <ul style="list-style-type: none"> • Limited tools to monitor and audit private sector productivity: NIPO has no instrument to monitor the productivity in the private sector. NIPO can provide assistance but cannot oblige the private sector to accept such assistance. • Being a small organization: NIPO is a very small organization. Even in the recently organization chart of NIPO, the maximum number of employees in this organization should be 53 employees. • Lack of productivity model to help NIPO is giving direction to productivity movement in the country: If NIPO should work towards improving the productivity of the country, it is essential to have a national level productivity model. NIPO is planning to make such a model but no outcome has come out yet. This weakens NIPO's authority and influence. • Limited management tools for productivity in the country: NIPO does not have enough of management tools to monitor productivity movement in the country. Legally the financial incentive is limited only to the public sector and not for the private sector. • Inability to influence Government policies: Many policies affect productivity movement of the country. NIPO is not considered as one of the main authorities exposed to other authorities' policies. External pressures out of control of NIPO are numerous. Devaluation and high inflation deeply affect the productivity activities in the country. • Limited financial budget: Present budget allocated to NIPO is very limited and this will limit the practical scope of NIPO activity. • Limited technical sources: Ideally NIPO should have a Reserve list of technical experts both at national and international level with a formal relationship, who can be called upon in case of need. To have such virtual human resource, NIPO should have some sort of financial power to make binding obligations to call the experts in case of need. This virtual technical power has not yet materialized. • Non-existence of enough of quantity parameters to make the plan a serious guideline for actions and policies. Most of macro-level variable did not have numerical and/or directional 	
--	--	---	--

		<p>targets</p> <ul style="list-style-type: none"> • Being too small: NIPO is too small to work at national level for productivity improvement. 	
--	--	---	--

	Public Sector <ul style="list-style-type: none"> • Existence of a legal financial incentive to monitor productivity changes of the public sector by NIPO: According to the 5th Development Plan law, a share of 3% of the budget of all institutions listed in the budget laws would be blocked and the release of this sum should be on the basis of receipt of a written approval of NIPO to VSPS regarding the performance of the institution in the field of productivity. • Existence of a legally-defined counterpart for NIPO in all public sector organizations: Under the 5th Development Plan law of the country, all public sector organizations are instructed to establish their own productivity offices. These offices shall be responsible for productivity changes in their organization. The offices are legally ordered to work close to the NIPO and to monitor their activities with NIPO. This means a strong legal relationship between NIPO and public sector organizations. • Existence of individual productivity plans in various offices of the public sector: Even before NIPO becomes active, various offices of the public sector have designed their own productivity plan and their productivity departments are now closely related to NIPO. This means at least in public sector there are several actions plans that are working plans of the time and they can be monitored by NIPO. • NIPO's ability to provide technical support for productivity improvements: NIPO is able to provide technical support for productivity improvement to the public sector with the help of experts locally and internationally. • NIPO's ability to provide training at national and international level in the field of productivity: NIPO is able to provide training services for productivity improvement to the public sector with the help of experts locally and internationally. 	Public Sector <ul style="list-style-type: none"> • Problems in management and monitoring ability: Public sector management suffers problems widespread inefficiencies that affects the relationship between NIPO and Government 	
--	---	---	--

<p>Criteria: - What opportunities are available to the NPO in terms of developing relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/NPO Council Members/Governing Board/APO)?</p> <p>- What opportunities are available for developing, delivering and improving services to the private sector and public sector?</p> <p>- What opportunities are open to the NPO?</p> <p>- What trends could you take advantage of?</p> <p>- How can you turn your strengths into opportunities?</p> <p>- (Opportunities typically relate to the EXTERNAL environment that the NPO may have little control of)</p>	<p>Opportunities</p> <p>Government/partners</p> <ul style="list-style-type: none"> Being close to a new national development plan: Given that NIPO is now active and has its master plan, it is very likely that NIPO can bargain a better position for productivity in the next development plan. 	<p>Threats</p> <p>Government/partners</p> <ul style="list-style-type: none"> Non-existence of enough of quantity parameters to make the plan a serious guideline for actions and policies. Most of macro-level variable did not have numerical and/or directional targets. This would reduce the ability of NIPO to monitor various developments towards productivity improvement. In cases NIPO shall not be able to act timely. International Sanctions that caused deep fall in the revenue obtained from petroleum export. This shall limit NIPO ability to seek technical assistance. Pursuing the law for targeting subsidies that caused deep divergence from normal path of economic life and a very high rate of inflation not foreseen in the plan. This shall divert efforts from productivity improvement to government financing. Soft budgeting policing that led to deficits not covered by law and led to further devaluation of national currency. This causes delays in financial flows to NIPO. Lack of binding auditing and supervision over policies and programs expected by the plan. This loosens NIPO's monitoring power. Lack of institutional support to run the plan due to changing the structure of the country's planning organization and converting it to an office of Presidency with the aim of elimination of independence of expert supervision and control. This loosens NIPO's monitoring power. Lack of institutional support to run the plan due to changing the structure of the country's planning organization and converting it to an office of Presidency with the aim of elimination of independence of expert supervision and control. This loosens NIPO's monitoring power. 	<p>Criteria: - What threats may harm the NPO's relationships with the government and other partners (e.g. Funders/Training Providers/Consultants/Employer Groups/Institutions of Higher Learning/Trade Union/NPO Council Members/Governing Board/APO)?</p> <p>- What threats may prevent the NPO to develop, deliver and improve services to the private sector and public sector?</p> <p>- What threats could harm the NPO?</p> <p>- What is your competition doing?</p> <p>- What threats do your weaknesses expose you to?</p> <p>(Threats typically relate to the EXTERNAL environment that the NPO may have little control of)</p>
	<p>Private Sector</p> <ul style="list-style-type: none"> Emphasis on private sector development: The authorities have realized the need to develop private sector in the country and to make this sector as strong as possible. This means NIPO has a good opportunity to continue its relationship with privatized organizations. Resilience economy meta policy: This is an absolutely positive trend in the sense that it puts productivity in the center of all positive events. NIPO should use this opportunity to enhance the productivity trends in the country. Materialization of Productivity Master Plan: Given the detailed plan designed for the productivity of the country, NIPO aims at realization of the plan. This means many new opportunities shall be provided during the implementation of the master plan that can lead to more efficient economic sectors. 	<p>Private Sector</p> <ul style="list-style-type: none"> Over-engagement of the private sector with economic problems: This would divert private sector attraction toward NIPO to other issues and NIPO shall lose grounds to help the sector to improve its productivity. Power struggle to take over NIPO: If NIPO cannot keep its independence and is reduced to an office of the planning sector of the country, NIPO's ability to implement the master plan for productivity shall be reduced considerably. This is a threat to successful implementation of productivity improvement in the country. Inability to run the productivity master plan and loss of general public confidence: If NIPO cannot overcome its technical and financial weaknesses, with all possibility the implementation of productivity master plan shall be threatened. In this case NIPO shall lose the confidence of the general public. Continuation of sanctions: This shall limit the ability of NIPO to receive international technical support Continuation of environmental destruction in the country: This would divert the attention of all economic and political groups to natural systems and may divert their attention from the positive role of productivity in environmental support. Inability of the Government to reduce corruption level: This would deteriorate the general air of cooperation between NIPO and the active agents in the country.

	<ul style="list-style-type: none"> • Requirements and orders of the government, ministries, industries, local about researching and calculating productivity, training human resources and building a demonstration models of improvement productivity in the framework of National program on Enhancing productivity and quality; • Changing the legal provisions related to implementation, audit and improvement QMS according to ISO 9000 in public agencies. • Changing name of Vietnam National Productivity Institute creates favorable conditions for promoting research and training activities, as well as coordination with the Institutes, Universities in developing training programs (example of training program for youth people, students...). 	<ul style="list-style-type: none"> • Developing external networking in order to complete methodology of productivity calculation to meet requirements of ministries, industries, localities; • Developing training, auditing and improving services QMS for public agencies. 	

4.17 Summary of SWOT Analysis

Nine countries (Sri Lanka, Indonesia, Fiji, Nepal, Lao, Malaysia Thailand, India and Bangladesh) ranked their three most important strengths, weaknesses, opportunities and threats with the most important strength, weakness, opportunity or threat ranked as "1", the second most important as "2" and the third most important as "3". This data is presented below.

Strengths

Sector: Government/partners

Rank	Reason
1	<ul style="list-style-type: none"> NPB/NPO is a public institution and directly responsible to The President where the membership consisting of cross sectorial ministries senior officers (Director General/Director level). Good cooperation with higher level decision makers. Strong ability to inculcate educational institutions with the concepts of productivity. Young and energetic staff those are eager to learn. Tripartite arrangement where stakeholders cover government, employers, and labor – so NPC is seen as a fair, independent, unbiased, impartial organization: This is seen as a very positive strength across all sectors. NPO has an opportunity for searching ideas, guidelines and package profile from the highest body named National Productivity Council (NPC) headed by Honorable Minister, Ministry of Industries subject to need and utilities of the stakeholders. Very good and strong support from Government in terms of increasing annual budget Formation of a separate ministry for productivity promotion.
2	<ul style="list-style-type: none"> Highly educated and well trained staff. Dissemination of the latest information through the network of international cooperation. Good linkages with APO and other NPOs. Good linkages with local business associations, academic and training institutions. Connection with government body that use business excellence frame work to drive organizations under them. (State enterprise policy office, Office of the higher education commission, Office of the public sector development commission, the healthcare accreditation institute). Large team of Multidisciplinary Consultants/ Knowledge workers: Competencies enable Consultants to provide interventions in diverse fields and offer total solutions to the client. Active networking with Ministries and different Government department. Active participation of other partners in MPC programs. Strong Networking local and International Availability of Productivity Policy for the Public and Private Sector.
3	<ul style="list-style-type: none"> NPB/NPO's programs and activities are supported by government budget. Connection with APO (source of knowledge). Long standing organization with Pan India presence, with offices in 12 ROs & 1 Training Center: This strength enables the organization to cater to Govt., Private Sector as well as to the Public Sector needs across the country. Productivity wage commission. Broad-based programs including innovation and Best Practices- integrated & focused in 5 areas of BE, EI, RR, GC and KM NPS is the only government organization and the focal point to disseminate the productivity.

Sector: Private

Rank	Reason
1	<ul style="list-style-type: none"> • Very strong relationship with Fiji Commerce and Employers Federation and all employers who pay Levy. • Had Good image in the past, as it provided capacity building services. • Assist various factory/company to follow the international guidelines by providing service to be a demonstration project in Good Manufacturing Practice in order to be prepared to join the ASEAN Economic Community (AEC) as well as the international standard like WTO in the future. • Well known productivity specialist organization, both public and private sector. • Private sectors are providing recurring expenditure and other facilities to perform NPO productivity activities in private sector. • Very good; Private sector in MPC BOD, Chairs and participate in Consultative Panels and Work groups • The Productivity Steering Committee consists of Trade Union members, Government and Private Sector members. • Strong linkage between private sector organizations • Productivity award competition • Dedicated staff
2	<ul style="list-style-type: none"> • Most of NPO's customers in private sector are satisfied to the services of NPO and assessed NPO has a good performance. • Wide national outreach of programs through the 41 centers around the country. • Good working relation and image with private enterprises, associations like Federation of Chambers and Industry, Management association of Nepal, other training institutions. • The strengths of NPO are doing others still see less importance. • Render Consultancy services to get better result. • Involvement of Business Associates/Consultants • Resource person pool consists of private sector members. • Training programs • Knowledgeable members of NPO
3	<ul style="list-style-type: none"> • Practical focus of all programs which are so short and skills oriented in nature. • Also good networks with International agencies, INGOs and Intergovernmental bodies like Techonet, Singapore, UNCTAD, UNIDO and APO. • Conduct benchmarking survey to identify their position. • Productivity, Quality, Innovation, Global Competitiveness incl.BP, BE, EI, RR , GC, • Possibility of granting APO scholarships to all sectors. • Model organizations • Capacity to provide consultancy

Sector: Public

Rank	Reason
1	<ul style="list-style-type: none"> • Though a Public Limited Company yet so far treated as. • Render Consultancy services to get better result. • Very good; Represented in MPC BOD, MPC secretariat to PEMUDA, RR and BPR Activities AND MoUs • Recruited 618 new graduates to cover all Divisional Secretariats established in island wide. • dynamic, young, knowledgeable & skilled NPO staff • Productivity dissemination in public offices, schools etc. • Dedicated staff
2	<ul style="list-style-type: none"> • Most of NPO's customers in public sector are satisfied to the services of NPO and assessed NPO has a good performance. • Direct linkage National Planning Commission, sectorial ministries, other public corporate bodies and institutions. • Quality Management: 5s, Kaizen, TQM, QCC, ISO 9000. • Involvement of agencies in RR and BPR activities • Funds have been allocated regularly for productivity enhancement by the treasury. • Availability of high quality and latest promotional materials • promotional materials • Knowledgeable members of NPO.
3	<ul style="list-style-type: none"> • Good and experienced working processes with public bodies agencies and international organizations. • Creation of Consciousness building of productivity as normal way of life. • Productivity, Quality, Innovation, Global Competitiveness incl.BP, BE, EI, RR , GC, • Positive attitudes and approach of Immediate decision makers towards the productivity movement • Well trained (locally and internationally) staff • Productivity award competitions and other competitions. • Capacity to provide consultancy

Weaknesses

Sector: Government/partners

Rank	Reason
1	<ul style="list-style-type: none"> There is unclear relationship dealing with position, task and responsibility among NPB and NPO in encouraging National Productivity Movement. Lack of an efficient mechanism for conducting training and consulting at all levels. Low salary of staff and their movement. Ratio of Technical to Support staff is skewed /not favorable (1: 1.26). Because of carrying a large number of support staff and overheads, can't really bid at L1 level: This gets reflected in the costing as the ideal ratio for consultancy organizations is generally 1:0.5. There should be a regular intake of consultants at entry level, which is held up for the last around 4 years. NPC the Apex body of government to take long time change of productivity program to meet the requirement. High staff turnover Need to further improve coordination with agencies Insufficient funds
2	<ul style="list-style-type: none"> Absence of productivity policy/ rules/regulation to integrate other policies to productivity. Lack of conceptual and systematic program and activities in promoting, driving and facilitating productivity improvement. Need to increase visibility – Certain sectors / organizations know NPC as specialized in certain areas: Branding needs to be done which will help position NPC as a preferred Consultancy and Training organization. Lack of business acumen and slow speed of some departments Limited reach < 1% of companies reached; Impact of its programs
3	<ul style="list-style-type: none"> Lack of participation of cross sectorial NPB's members in formulating policy, strategy and controlling National Productivity Movement. No partnership network to generate income. Not all are competent or self-motivated. The organization is being run as a government department and not as a professional set up: This is serious and making the organization professionally run will benefit all sectors and turnover will also grow. There should be mobility / collaboration between NPC & professional institutions like the IIMs in understanding as well as in demonstrating practical industrial experience in productivity. Take long time to implement policy, decision and implement program. More focused on Outcomes rather than output or activities (nos.?)

Sector: Private

Rank	Reason
1	<ul style="list-style-type: none"> Limited involvement and participation of private sector in National Productivity Movement. NPO still less convinces the government and other partner to see the importance of productivity. Lack of industry specific technical knowhow (priorities; food, automotive, electrical & electronics). To train and upgrade the skills of industrial personnel in the technical and managerial field. Need to collaborate more No enough trainers/consultants who can talk on advanced productivity techniques.
2	<ul style="list-style-type: none"> Limited services programs delivered to customers both in term of area as well as volume of services. Cannot develop consultant to catch new knowledge response to needs and market expectation). Information technology is very weak to develop the partnership for sustainable development of productivity. Training Portfolio overlaps;
3	<ul style="list-style-type: none"> Limited information and network dealing with NPB/NPO, National Productivity Movement and productivity improvement services. Practical focus of all programs which are so short and skills oriented in nature; Lack of willingness to implement government decision and policy. Limited P & Q promotional events

Sector: Public

Rank	Reason
1	<ul style="list-style-type: none"> • Low quality of raw materials and product, poor maintenance of machine/equipment, absence of cleaner production system, bad layout, want of harmonious labor management relation. • Need to further enhance collaboration • No frequent steering committee meetings due to different reasons • Turnovers of employees
2	<ul style="list-style-type: none"> • Labor incentive. • Need to train more subject experts e.g. in RR and BPR
3	<ul style="list-style-type: none"> • Information technology is very weak to develop the partnership for sustainable development of productivity. • Need to train more expertise in agencies to carry out BPR and RR

Opportunities

Sector: Government/partners

Rank	Reason
1	<ul style="list-style-type: none"> • There is a big opportunity to consolidate NPB/NPO and other stakeholders to become an "Integrated National Productivity Movement Organization and Network" • Creating new knowledge through research and studies and collaborating with industry, government, and academia to solve national issues like environment, energy, water, transportation and sustainable livelihood for all. • Learning from APO members. • Adaptation of advanced and sophisticated production technologies and skills to improve productivities. • Technological spill-over by foreign direct investment. • Increase in official aid and foreign direct investment. • Possibilities of expanding coverage of NPO services in agriculture and service sectors Possibilities to have more demand of training, research and consulting services related with productivity improvement from the stakeholders. • Vitality of SMEs. • This will be mandatory and all sectors will enhance their productivity resulting in overall growth and development of the economy: Plans and projections reflect and assure this which will be a big opportunity. • Ministries & Departments should have specific task for productivity improvement activities. • High relevancy of MPC activities that aligns to the national development plans • Peacefulness and the political stability of the Country • Government need to increase productivity and make aware every citizen on productivity drive
2	<ul style="list-style-type: none"> • Initiating MoUs with other NPOs and international partners; • Future development-oriented national age structure. • There is appropriate environment for collaboration with other organizations and experts to bring in synergy: This will strengthen the contribution that NPC will make and will open up more opportunities for NPC. • Donor/government project may help NPO to implement new program. • Elimination of waste for higher value creation and productivity programs • Blessing of the President's manifesto (Mahinda chinthana vision for the future)
3	<ul style="list-style-type: none"> • National conference on productivity program implementation. • Work on the use of appropriate tools for collaborative innovation Cabinet approved Productivity policy document as the roadmap

Sector: Private

Rank	Reason
1	<ul style="list-style-type: none"> • Productivity improvement is country goal and service sector is the new main focus sector. • Formulate mechanism for fair distribution of productivity gains. • Public and private sectors consultation in co-creating programs for higher productivity and competitiveness of nation, sector, industry and firms High demand of productivity programs from private sector. • Private sector has a hunger of productivity programs for their workers and hence there may be a high demand.
2	<ul style="list-style-type: none"> • The growing of middle class in the economic structure. • Trend in green society, social responsibility, risk management, business excellence framework. • Link NPO with private apex body like FBCCI and other trade body. • Heavy reliance on low -skilled foreign workers and labor market structure that is still aligned towards low skilled jobs. • Providing sponsorships for various kinds of programs from private sector.
3	<ul style="list-style-type: none"> • Improving image with state of the art facilities and establishment of centers of excellence; • More organization interest in organization development. • Arrange seminar, symposium and workshop. • Work with industry players on the best practice processes along the supply chain management • Existence of other productivity trainers as competitors

Sector: Public

Rank	Reason
1	<ul style="list-style-type: none"> • The acceptance and recognition of productivity award and Quality circle award. • Most of public sector organizations have been convinced the importance of application of productivity concepts and they have very good experiences. • Establishing various productivity competitions and award. • High relevancy of MPC activities that aligns to the national development plans • The acceptance and recognition of productivity award and Quality circle award. • The acceptance and recognition of productivity award and Quality circle award. • Willingness of other ministries and departments • Most of public sector organizations have been convinced the importance of application of productivity concepts and the have a very good experiences.
2	<ul style="list-style-type: none"> • Willingness of other ministries and departments. • Counseling and interaction with the presence of management and base level people. • Productive and efficient approach in managing labor market and foreign workers as a whole • Willingness of other ministries and departments
3	<ul style="list-style-type: none"> • Availability of related national productivity improvement programs (namely Biro racy Reformation Programs). • Create productivity improvement cell in enterprises to implement integrated productivity strategies. • Collaborate with agencies to identify best practices where the processes in public agencies interfaced with processes in industry for higher productivity

Threats

Sector: Government/partners

Rank	Reason
1	<ul style="list-style-type: none"> • Each ministry tends to work in sectorial wise. • Low saving rate and low domestic investment in R&D. • Negative impact on environment. • Lack of staff motivation. • Research and consulting services are negligible. • Have mission on productivity enhancement for the country but no government budget support. • Depletion of professional manpower and no replacement: New ideas missed out and average age becomes high. • Most of the Ministries & Departments do not possess any specific task for productivity improvement. • A number of new agencies established to deal with cross-cutting issues that hinder productivity • Frequent changes of top level • Unawareness of importance of productivity concepts of top level policy makers
2	<ul style="list-style-type: none"> • Small market and limited export. • Poor base of technology. • Low savings. • Weak banking and finance mechanism. • Lack of short-term work plan. • Lack of periodic strategic plan. • On the one hand, not to spread too thin. But on the other hand, NPC on the lookout for assignments and therefore willing to take up anything which comes its way. So sometimes NPC does not take up assignments that are in the core competency or focus area of work: Focus on revenue generation and no creation of USPs. • Government agencies are busy to solve their own problem and take long time to take decision. • Lack of critical mass of subject experts3.
3	<ul style="list-style-type: none"> • Mushrooming of small or 1 man – show organizations (Private) who can afford to quote much less: Low overhead and manpower costs. • NPC decision is time consuming and enterprises have no obligation to follow NPC decision. • Lack of support for productivity planning and implementation linked to productivity

Sector: Private

Rank	Reason
1	<ul style="list-style-type: none"> • Intense competition can drain our share of the market; • Private sector may not provide recurring expenditure and other facilities to perform productivity program. • Culture of over-reliance on the Government for assistance to improve business • Misunderstanding and wrong interpretation on productivity concepts due to lack of proper knowledge. • Lack of assistance of steering committee because of not meeting properly
2	<ul style="list-style-type: none"> • Majority of business units are in informal sectors such as self-employment, micro, small and medium enterprises (Their awareness and understanding in productivity and quality usually are still very weak) • More competitors with more competencies. • Private sector may not encourage with the new techniques and instruments of productivity and may think as burden to their work. • Lack of sustainable collaboration between public and private institutions.
3	<ul style="list-style-type: none"> • Big enterprise wants more advances & complicate product. • Enterprise linked productivity with their performance. • Economic programs that are not linked to actual productivity and sustainability

Sector: Public

Rank	Reason
1	<ul style="list-style-type: none"> • Bureaucratic procedures. • Misunderstanding and wrong interpretation on productivity concepts due to lack of proper knowledge. • Lack of assistance of steering committee because of not meeting properly. • Workers and unions are less motivated. • Getting buy-in to support holistic and whole one government initiatives
2	<ul style="list-style-type: none"> • Misunderstanding and wrong interpretation on productivity concepts due to lack of proper knowledge. • Change in government policies that may have adverse impact on us; • More competitors with more competencies. • Enterprise linked productivity with their performance. • Outdated or unnecessary regulations
3	<ul style="list-style-type: none"> • Lack of productive culture and tend to work in the manner of business as usual. • Removal of the Levy order will drain our resource base; • Public sector may not encourage with the new techniques and instruments of productivity and may think as burden to their work. • Overlapping functions on innovation and regulatory with no link to productivity

APPENDIX 5: APO STRATEGY AND ASSISTANCE

This Appendix shows how the APO's strategy and services are viewed by the NPOs' CEO/directors and staff.

Within the Appendix the survey questions are shown, followed by the aggregated responses in data and graphical format. If a "No data" has been recorded it means that the NPO has not responded to the question. "Na" refers to the question being "Not applicable" for the NPO.

5.1 a) CEO/directors assessment of the APO's vision:

APO Vision	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree
	1	2	3	4	5	6
To be the leading international organization on productivity enhancement, enabling APO economies to be more productive and competitive by 2020	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Malaysia	Lao	Cambodia	Indonesia	Mongolia	Fiji	Vietnam	Bangladesh	Thailand	Sri Lanka	Nepal	India	Philippines	ROC	Pakistan	Iran	Overall Mean
CEO/directors assessment of the APO's vision	6.0	6.0	5.0	5.0	5.0	5.0	5.0	6.0	5.0	4.0	6.0	4.0	5.0	6.0	5.0	6.0	5.3

5.1 b) Suggested changes

- The vision may be stretched to outside the membership as well, and for instance APO to become the leading global player on productivity. Also, some felt is it necessary to have a timeline (deadline?) of 2020? What happens thereafter? The mission/vision live a 100 years! (Fiji)

5.2 a) CEO/director's assessment of the APO's mission:

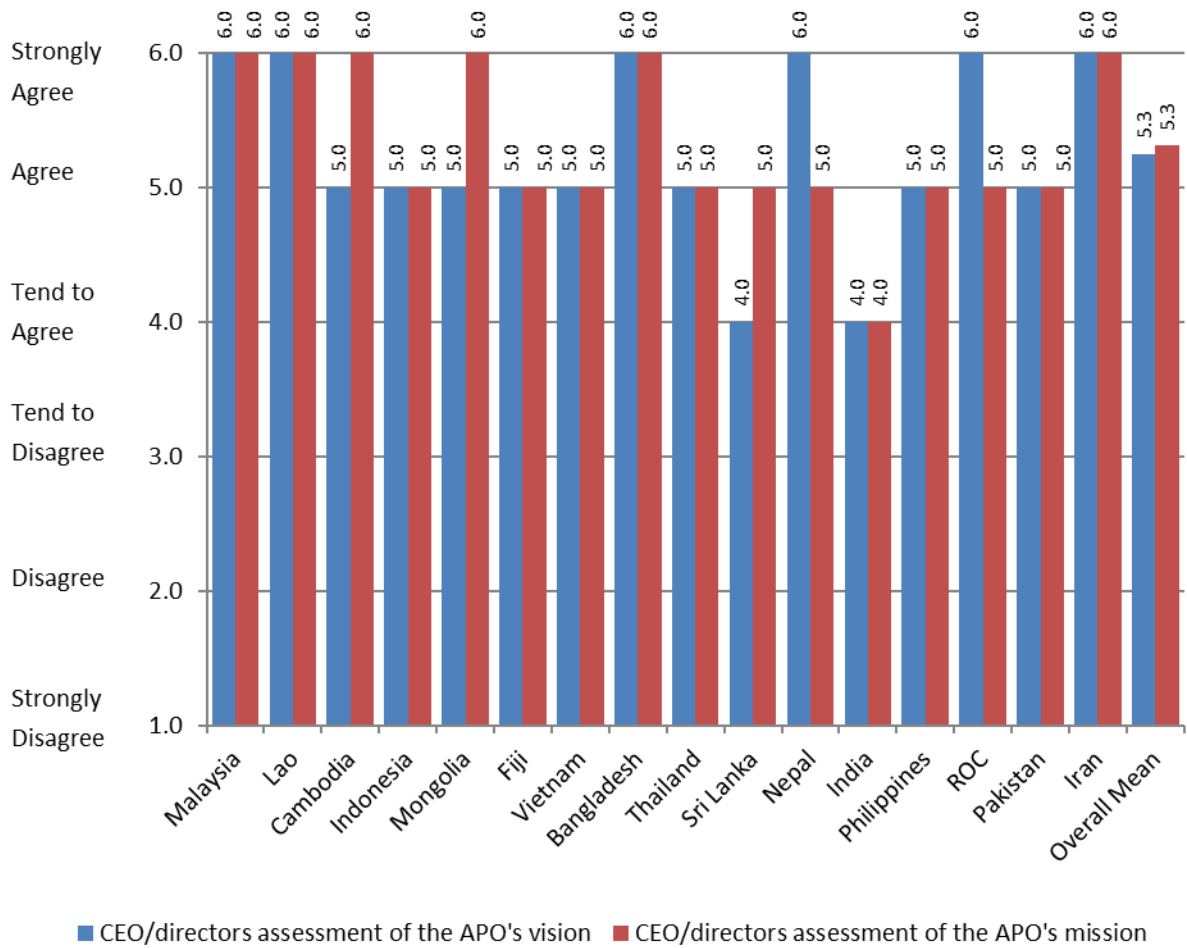

APO Mission	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree
	1	2	3	4	5	6
Contribute to the sustainable socioeconomic development of Asia and the Pacific through enhancing productivity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Malaysia	Lao	Cambodia	Indonesia	Mongolia	Fiji	Vietnam	Bangladesh	Thailand	Sri Lanka	Nepal	India	Philippines	ROC	Pakistan	Iran	Overall Mean
CEO/directors assessment of the APO's mission	6.0	6.0	6.0	5.0	6.0	5.0	5.0	6.0	5.0	5.0	5.0	4.0	5.0	5.0	5.0	6.0	5.3

5.2 b) Suggested changes

- Today APO outreach is well outside the Asia-Pacific region, e.g. in Africa, South America, it is known in US, Europe, etc and the new networks/collaborations/study missions/etc are spreading. Should the mission be restricted to the Asia-Pacific region? Some of my respondents feel this should be more global, e.g. 'To contribute to the socio-economic development of all countries through productivity,' or some variant thereof. (Fiji)

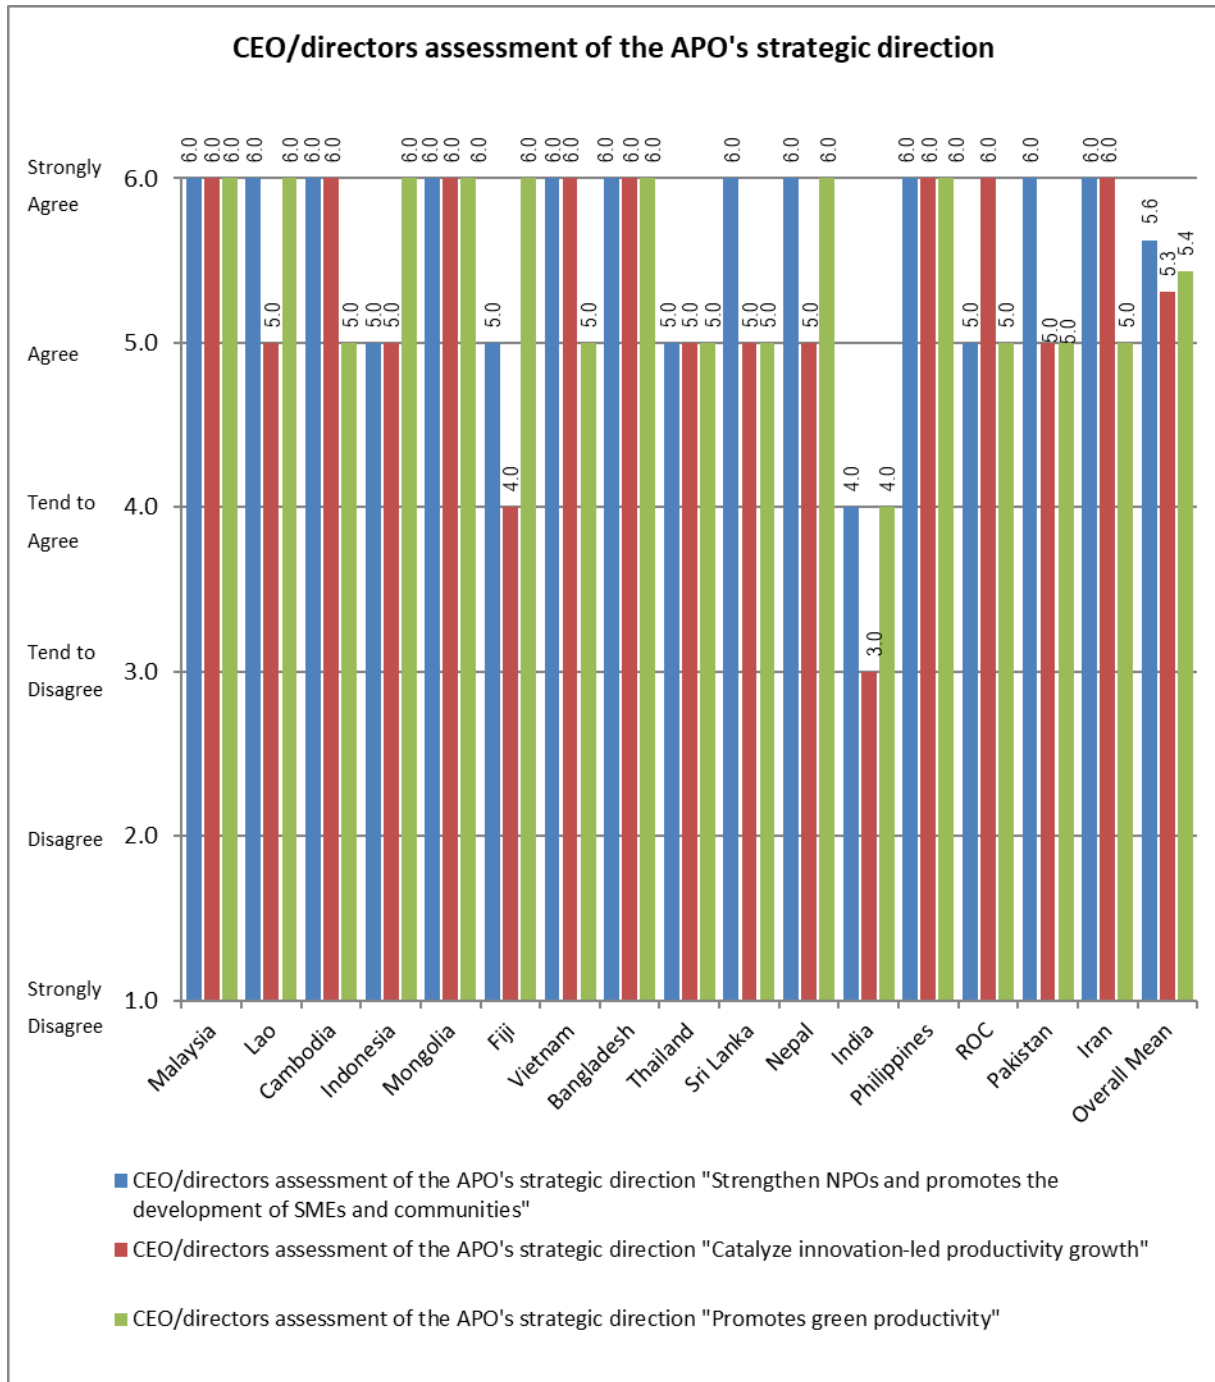

CEO/directors Assessment of the APO's vision and mission

5.3 a) CEO/director's assessment of the APO's strategic direction:

APO's Strategic Direction	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree
	1	2	3	4	5	6
Strengthen NPOs and promotes the development of SMEs and communities.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Catalyze innovation-led productivity growth	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Promotes green productivity	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

	Malaysia	Lao	Cambodia	Indonesia	Mongolia	Fiji	Vietnam	Bangladesh	Thailand	Sri Lanka	Nepal	India	Philippines	ROC	Pakistan	Iran	Overall Mean
CEO/directors assessment of the APO's strategic direction "Strengthen NPOs and promotes the development of SMEs and communities"	6.0	6.0	6.0	5.0	6.0	5.0	6.0	6.0	5.0	6.0	6.0	4.0	6.0	5.0	6.0	6.0	5.6
CEO/directors assessment of the APO's strategic direction "Catalyze innovation-led productivity growth"	6.0	5.0	6.0	5.0	6.0	4.0	6.0	6.0	5.0	5.0	5.0	3.0	6.0	6.0	5.0	6.0	5.3
CEO/directors assessment of the APO's strategic direction "Promotes green productivity"	6.0	6.0	5.0	6.0	6.0	6.0	5.0	6.0	5.0	5.0	6.0	4.0	6.0	5.0	5.0	5.0	5.4
CEO/directors assessment of the overall APO's strategic direction	6.0	5.7	5.7	5.3	6.0	5.0	5.7	6.0	5.0	5.3	5.7	3.7	6.0	5.3	5.3	5.7	5.5

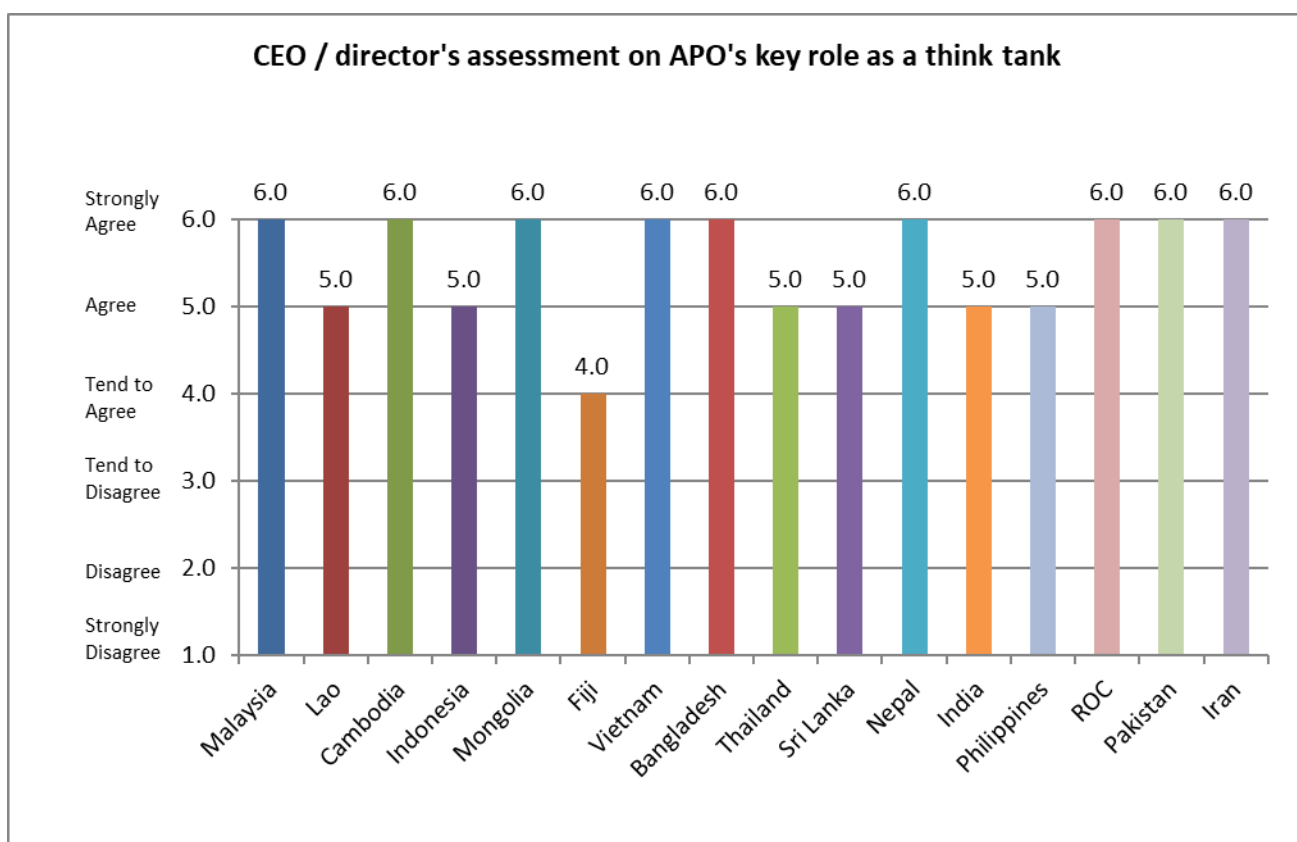

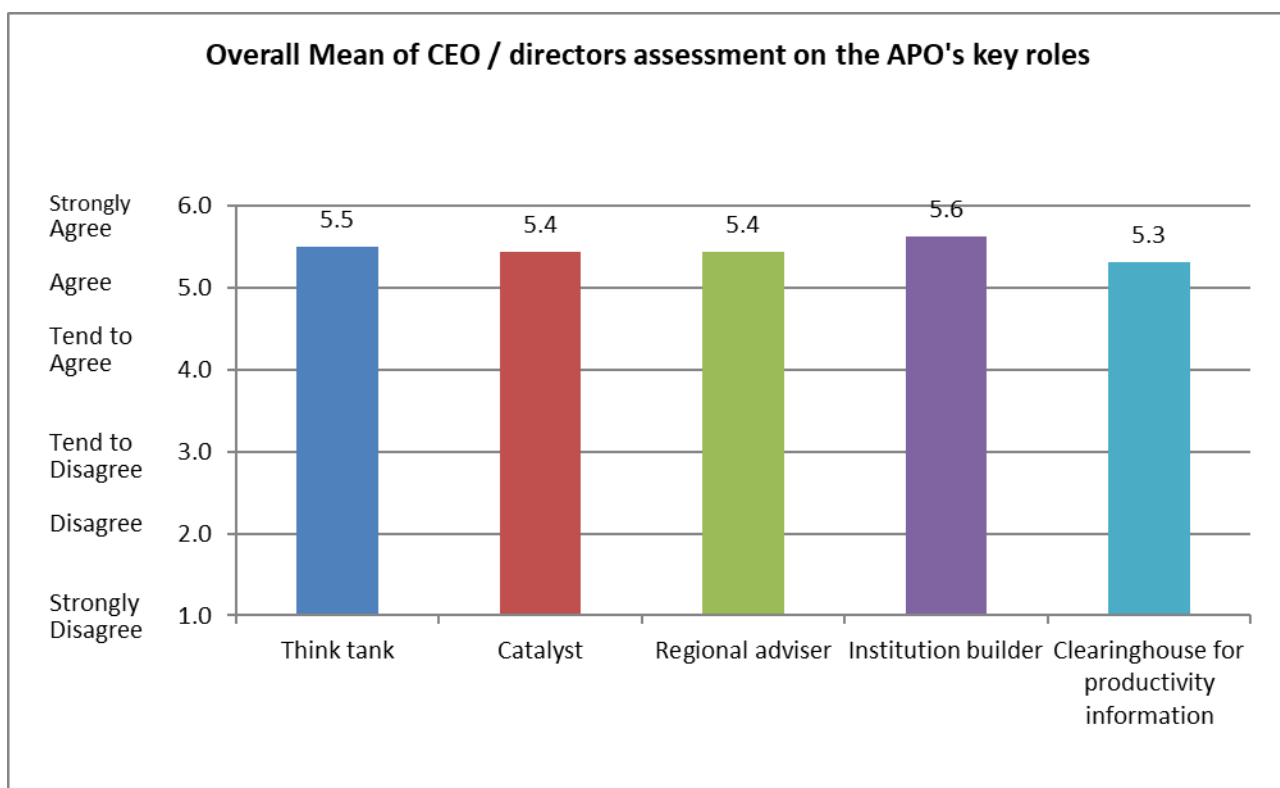

5.3 b) Suggested changes

- Green Productivity should be considered in a broader scope of “sustainable productivity” which covers not only environmental impact but also issues such as communicable diseases, road accidents, social security and work life balance (Malaysia)
- Emphasize more on country level productivity growth activities (Nepal)

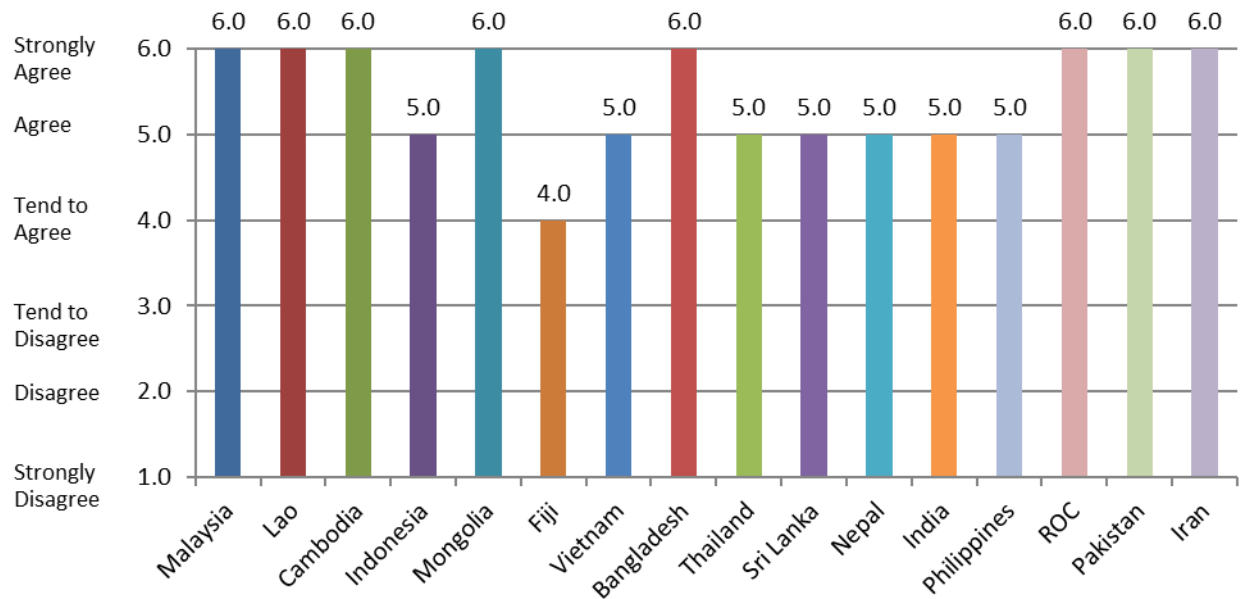

- Added 1 another strategic direction e.g. “Promote productivity experts competency based education and training system” (Indonesia)
- It is felt that “catalyze” is not self-explanatory, and that it be replaced by a better verb (promote?, etc) for greater clarity/understanding. (Fiji)
- Many around the membership do not understand Green Productivity (GP); so more effort should be made to bring about more clarity. (Fiji)
- Development of NPO capacities should be a separate strategic direction and it should not be mixed/bundled with development of SMEs. (Fiji)
- Green productivity is only a part of productivity based on sustainable development. APO should be a leading organization on promoting productivity based on sustainable development and more emphasize on effectiveness part in the productivity. (Iran)

5.4 a) CEO/director’s assessment of the APO’s key roles:

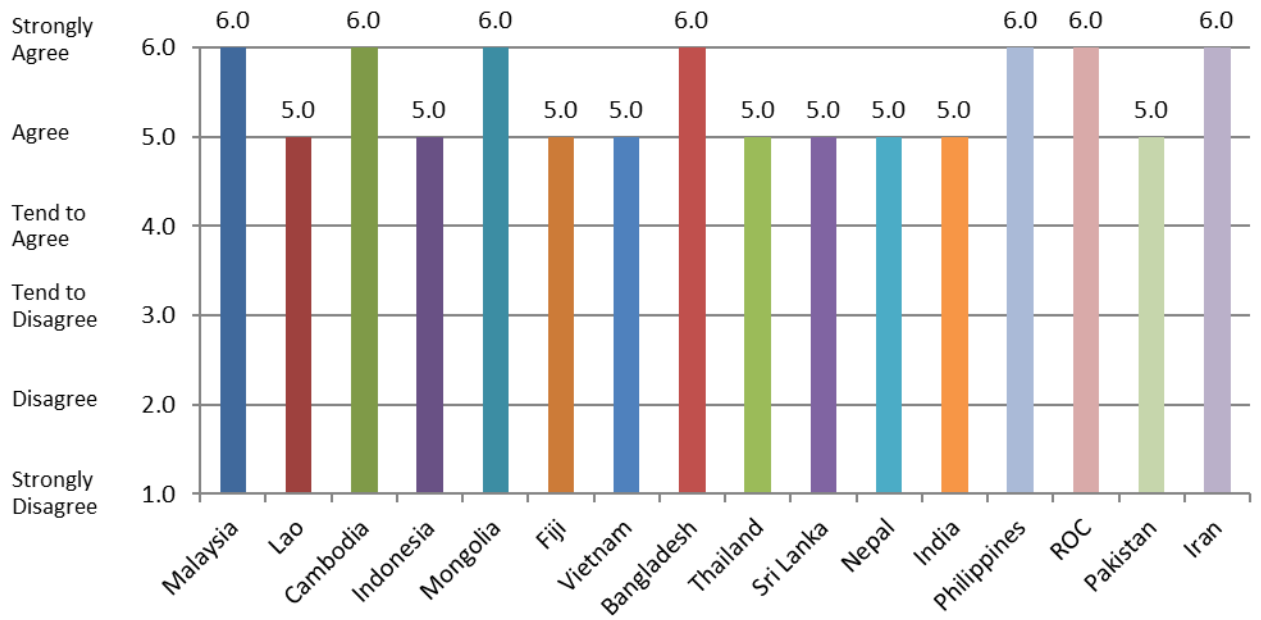

APO Key Roles	Strongly Disagree	Disagree	Tend to Disagree	Tend to Agree	Agree	Strongly Agree
	1	2	3	4	5	6
As a think tank , the APO conducts research on emerging needs of members for their follow-up and for determining appropriate assistance to them	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
As a catalyst , the APO promotes bilateral and multilateral alliances among members and between them and others outside the APO region for collaboration in productivity-related activities for mutual benefit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
As a regional adviser , the APO surveys the economic and development policies and performance of each member and assists in formulating strategic changes for enhanced productivity and competitiveness.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
As an institution builder , the APO strengthens the capability of the National Productivity Organizations (NPOs) and other institutions to provide productivity promotion, training, and consultancy services to the public and private sectors.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
As a clearinghouse for productivity information , the APO facilitates the dissemination and exchange of information on productivity among its members and other stakeholders.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

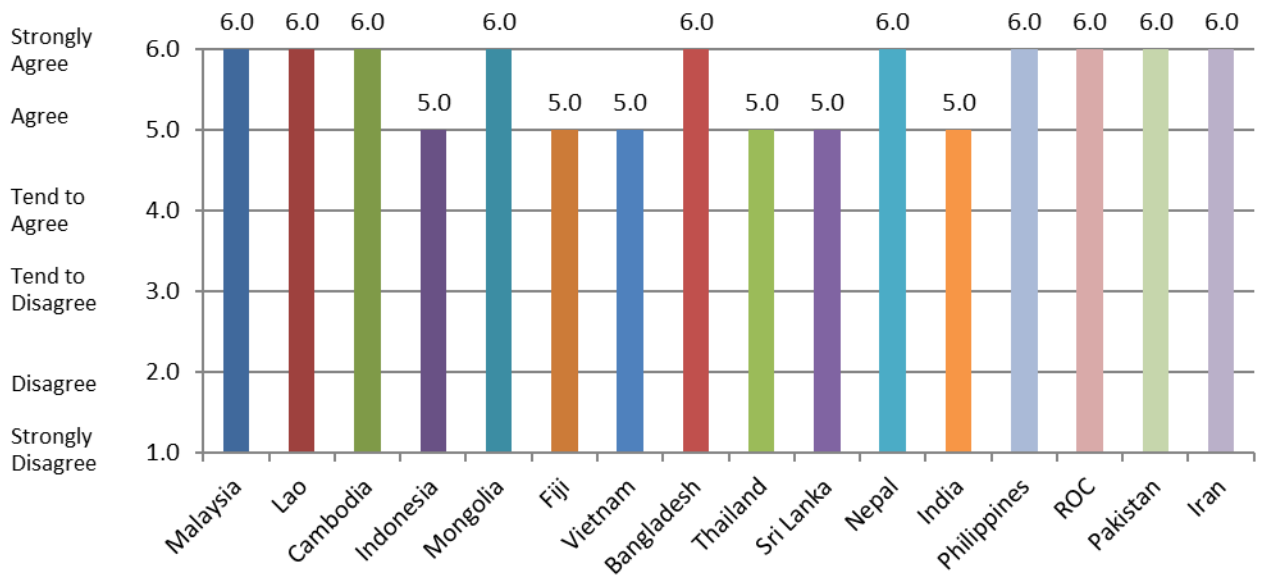

CEO / director's assessment on APO's key roles as catalyst

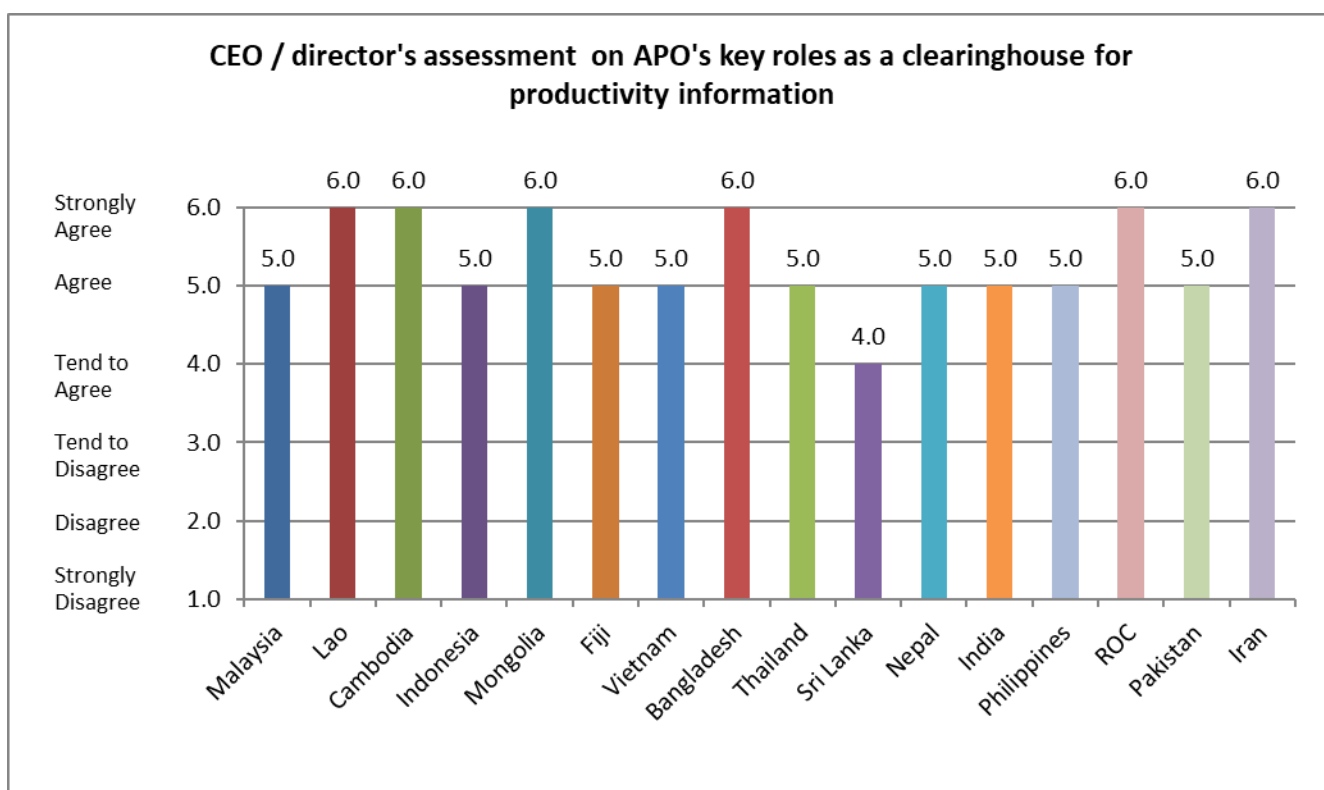

CEO / director's assessment on APO's key roles as a regional advisor

CEO / director's assessment on APO's key roles as an institution builder

5.4 b) Suggested changes:

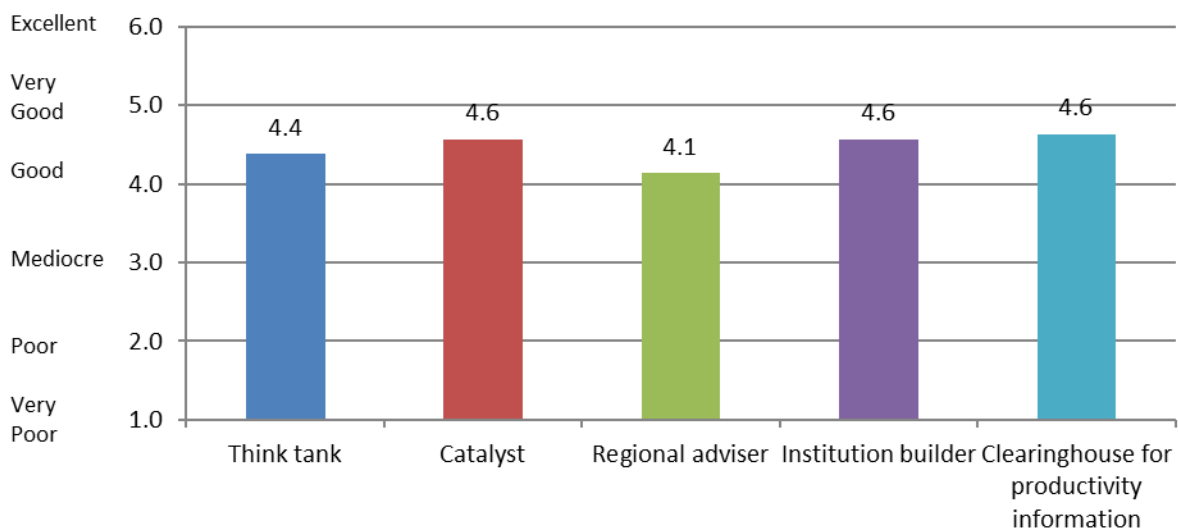

- You may need to clarify what “clearinghouse” means. The role seems mainly about dissemination of information (Philippines)
- The think tank role should be wider than just doing research on needs of members and doing follow-up, etc. It should be doing or collaborating with others to undertake cutting edge research in a variety of areas (including policy) and have this as the product that the world would look forward to APO for! Some of these works become the foundation for providing regional advisories! The latter work is seen as lacking now (Fiji)
- Not much alliance/networking is seen done especially outside the APO region and it is here we can define APO work to the rest of the world (Fiji)
- NPO capacity development work is good; but it tends to be affected by weak budgets. Smarter and more cost effective ways of delivering this will have to be conceived (on more in-country basis and as category C type projects) (Fiji)

5.5 CEO/directors assessment of the current performance of the APO:

	Very Poor	Poor	Mediocre	Good	Very Good	Excellent
	1	2	3	4	5	6
Think tank	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Catalyst	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Regional adviser	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Institution builder	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Clearinghouse for productivity information	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

5.10 b) Suggested changes/comments for areas in need of improvement:

- TES Expert Deputation: Synchronization of APO deputation of Technical expert, considering APO member needs. (If more than one MC request for the same expert for similar program, the schedule of deputation could be synchronized to be more cost effective.)(Philippines)
- Productivity Database: Perhaps the database can be reviewed with a view to making it more useful to target users and member countries (Philippines)
- There is no coaching by the senior management team of the APO, perhaps this is a good role to have for better relationship building and cohesiveness.(Fiji)
- International outreach needs strengthening; so is the work to expand and get in new members.(Fiji)

- There needs to be more in-country projects to help with MCs needs on ground and this will be better customization of services to the members; thus a better allocation of resources to Category C projects is designed (Fiji)
- It is noted by respondents that some PNs are sent late. Some are not written well to give an indepth appreciation of what would be the content.(Fiji)
- Better reports out of the learnings from the projects need to be made. At present this is not captured and the learning's from different projects are not captured, leading to a waste of opportunity for others and also resources. Key highlights can be for instance captured and shared with all stakeholders, esp. the NPOs for using these in our training programs, newsletters, inputs to speeches, policy, etc.(Fiji)
- Selection of more resource persons from Sri Lanka (Sri Lanka)

Overall Mean Impact of APO's activities

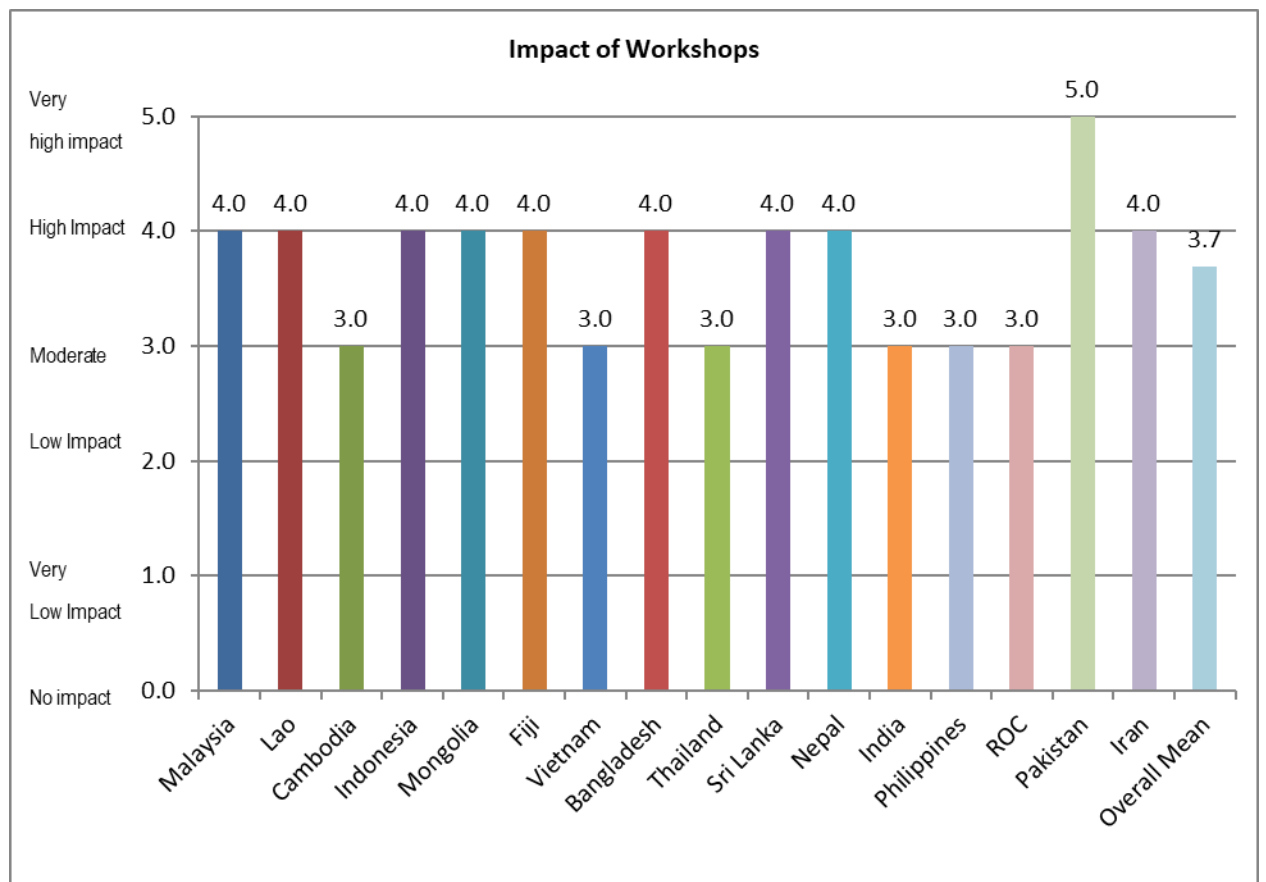

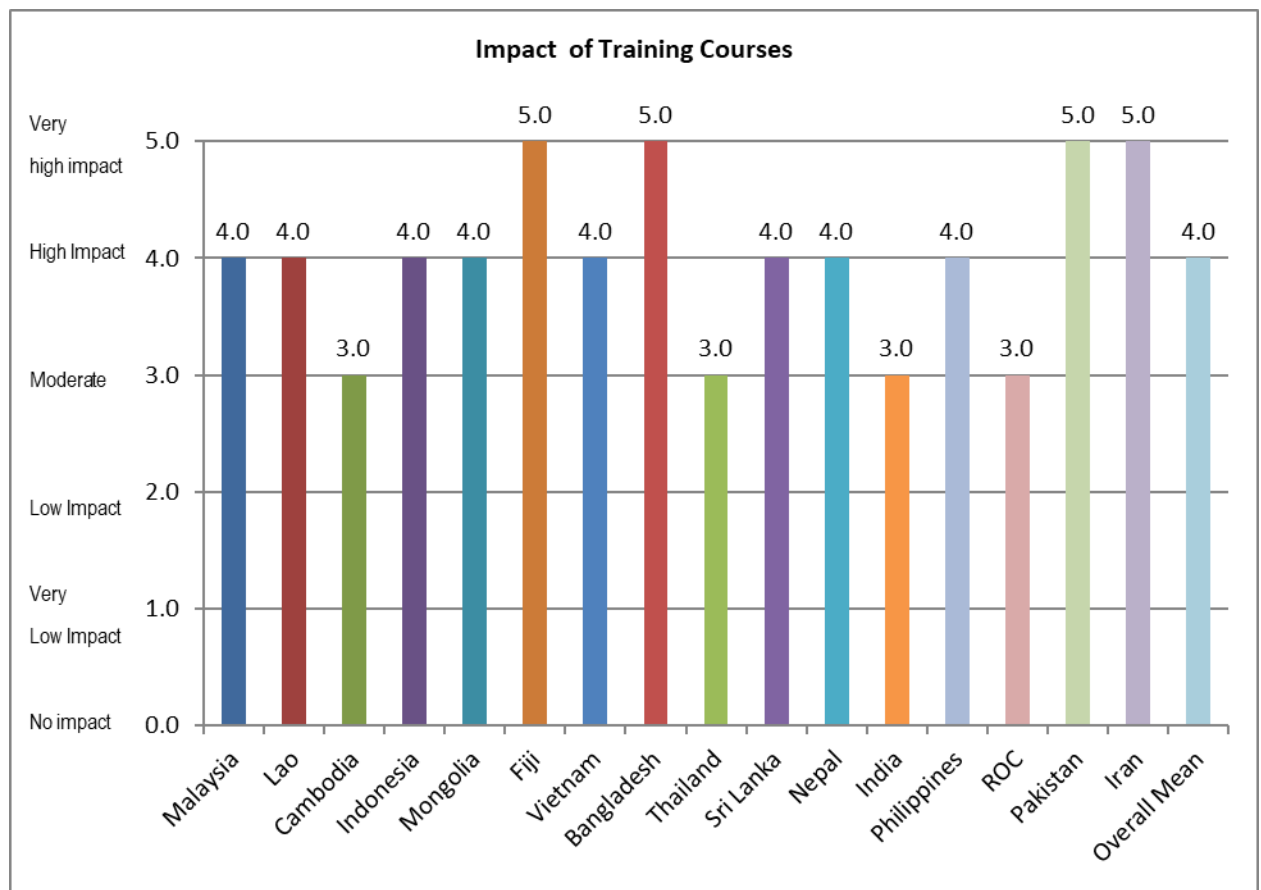

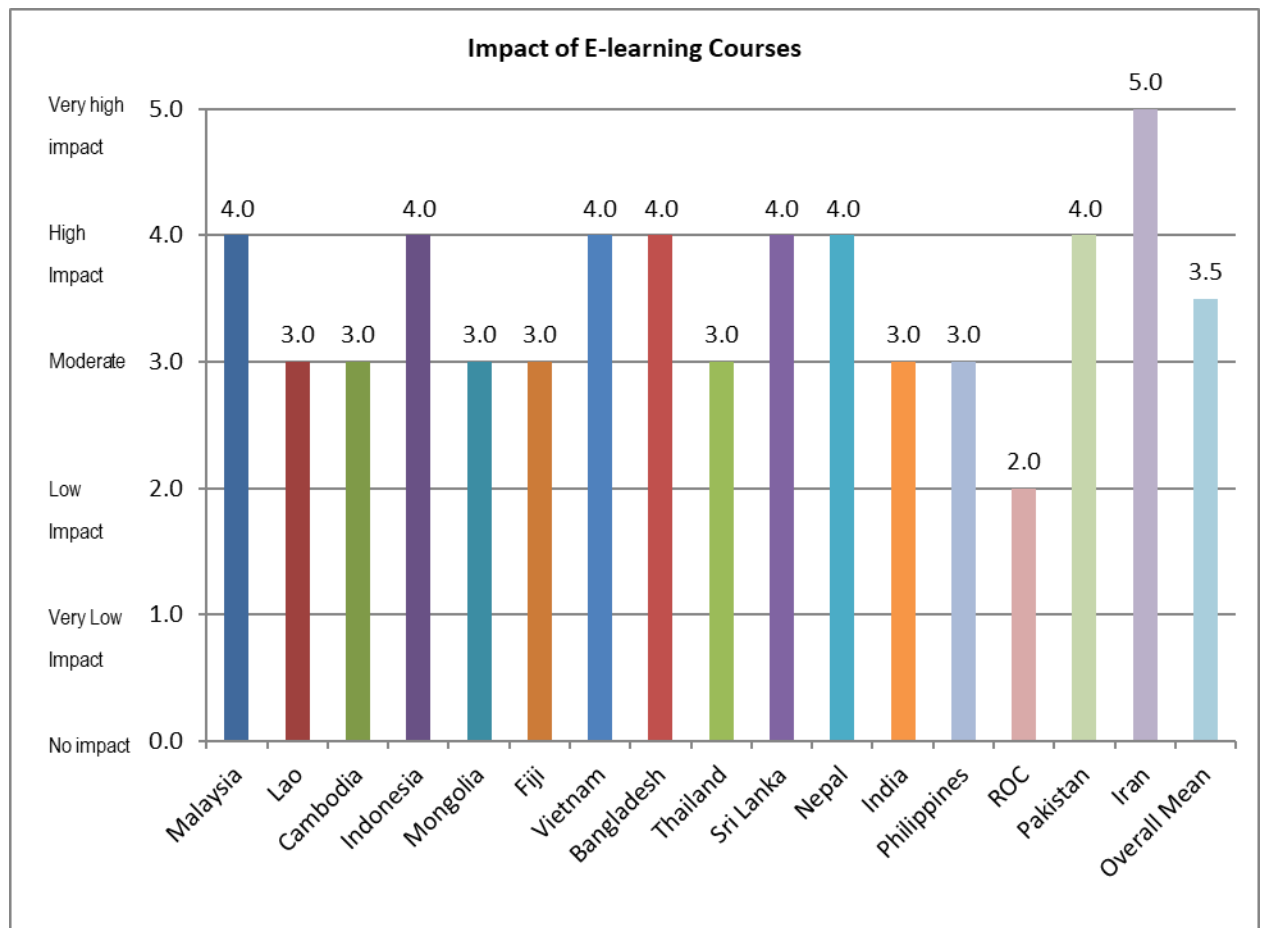

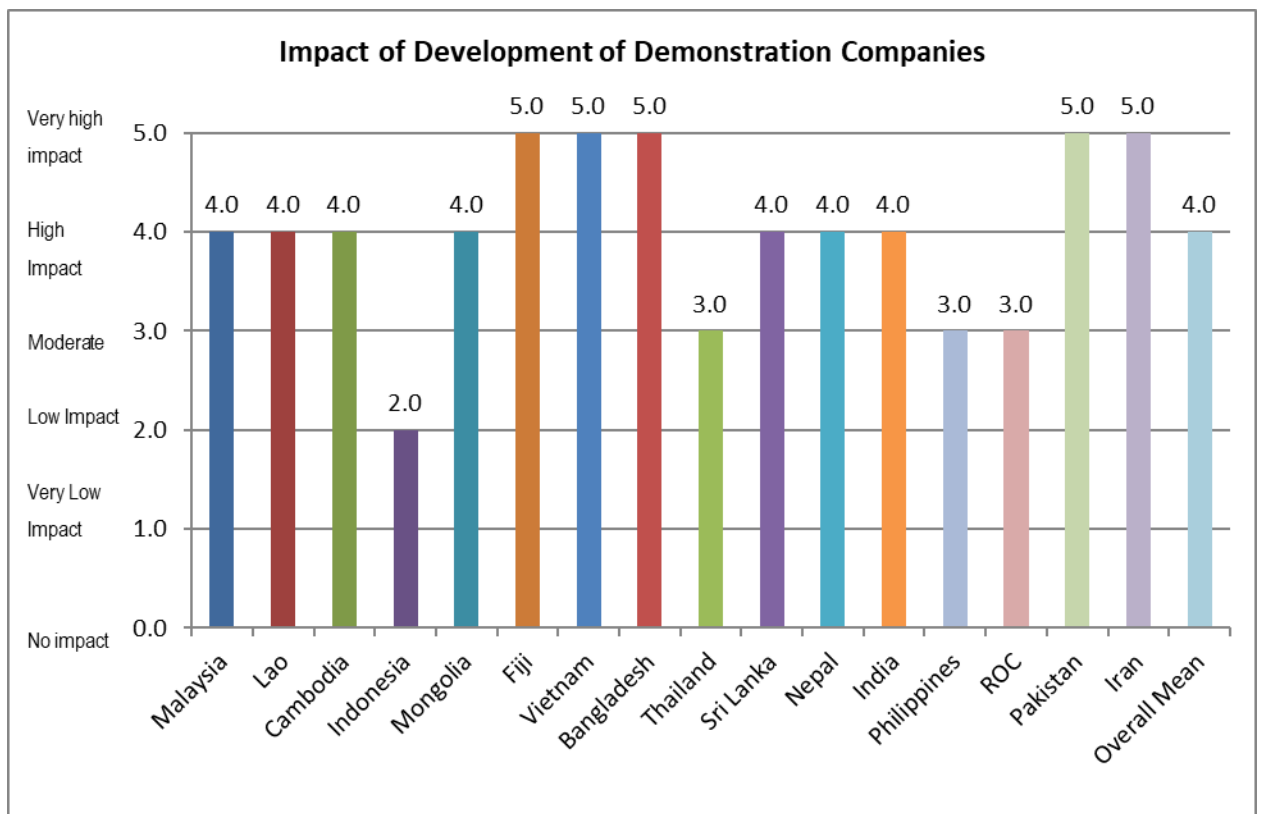

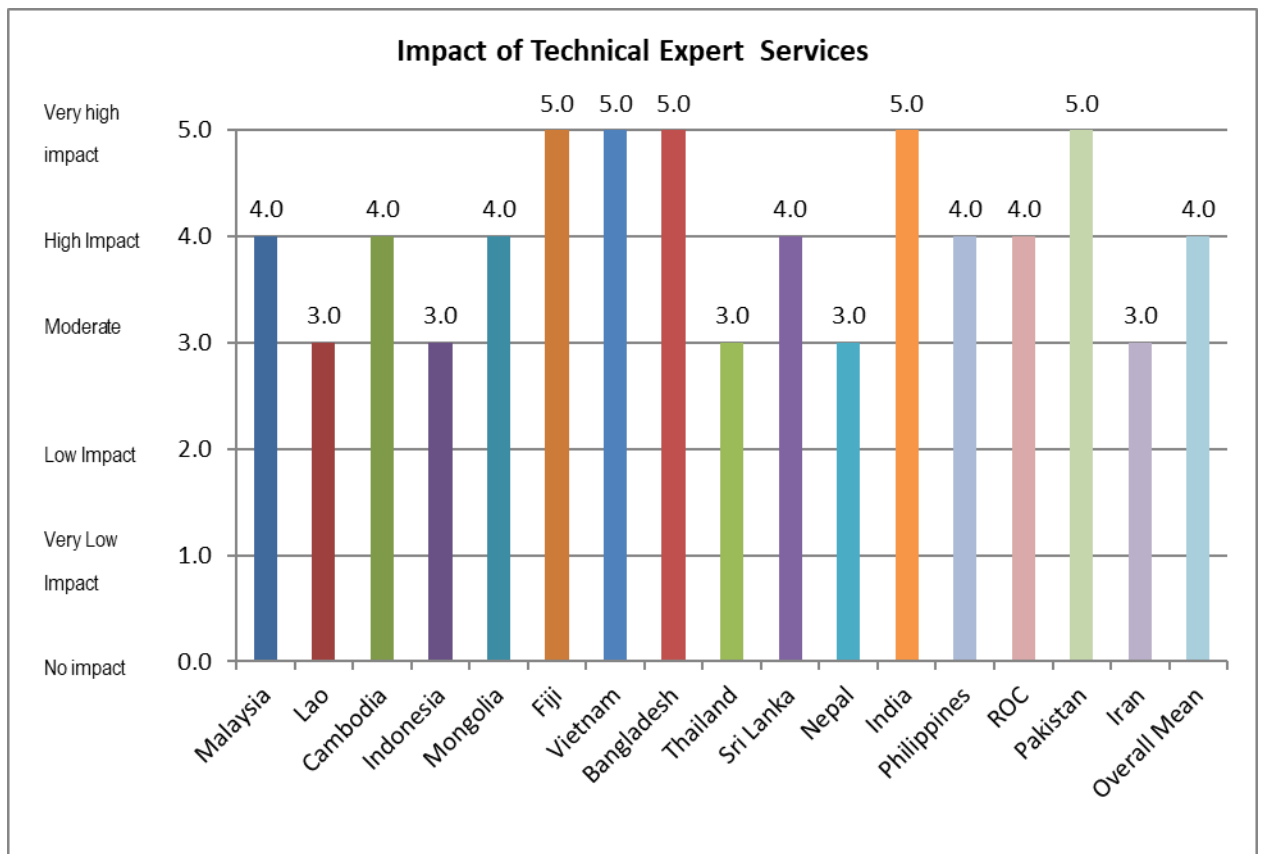

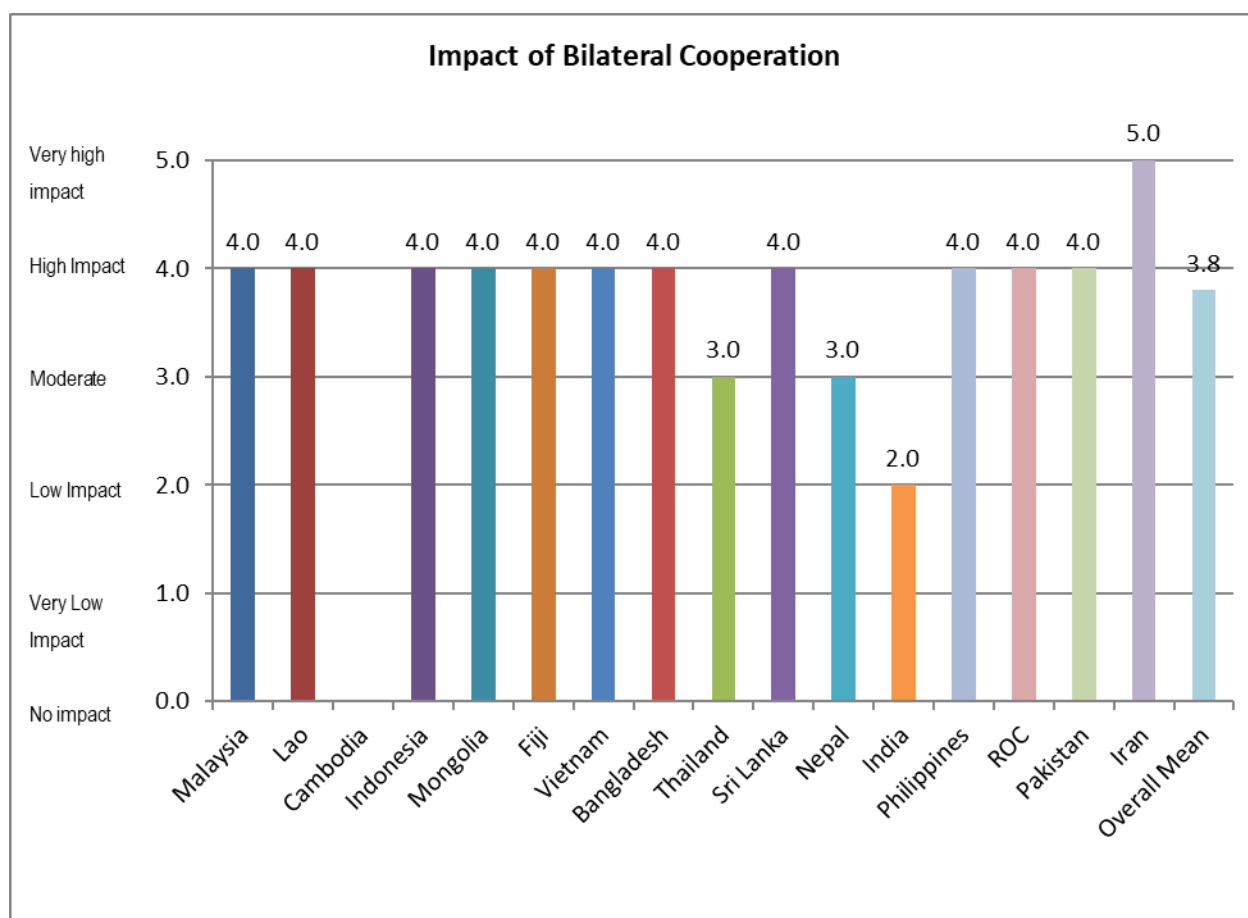

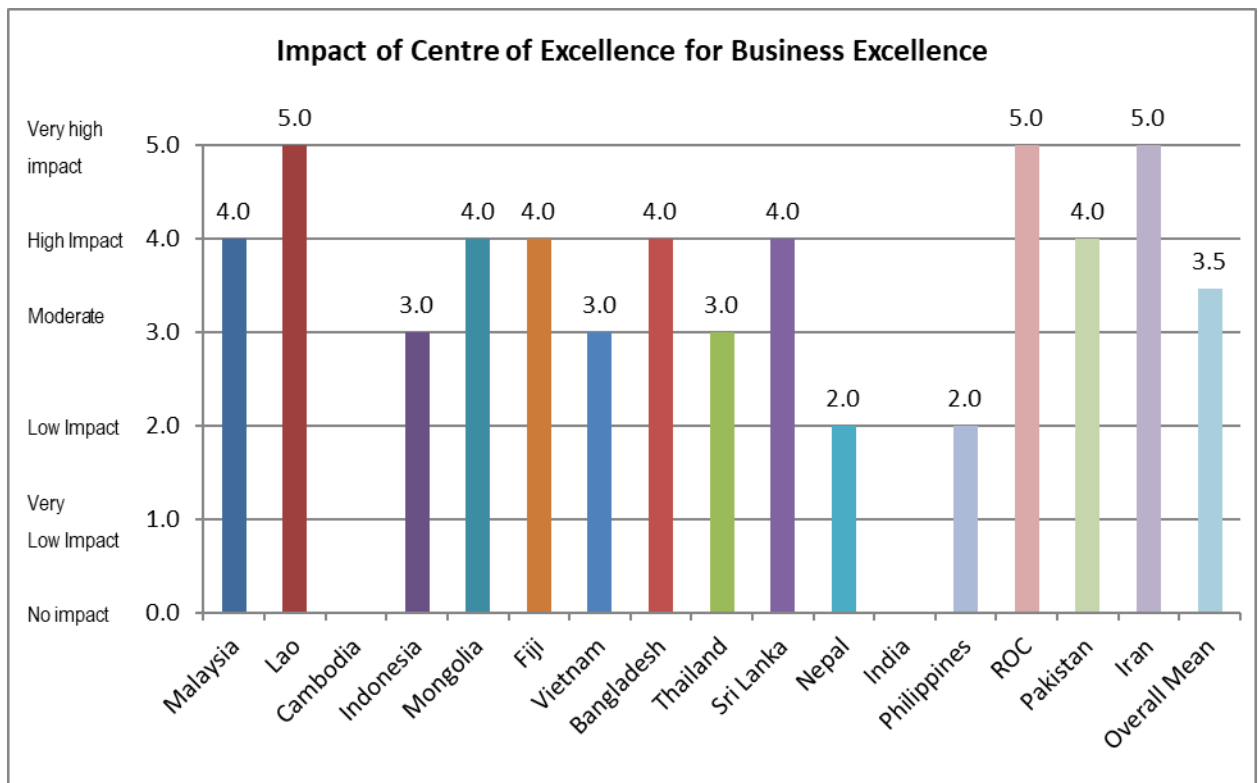

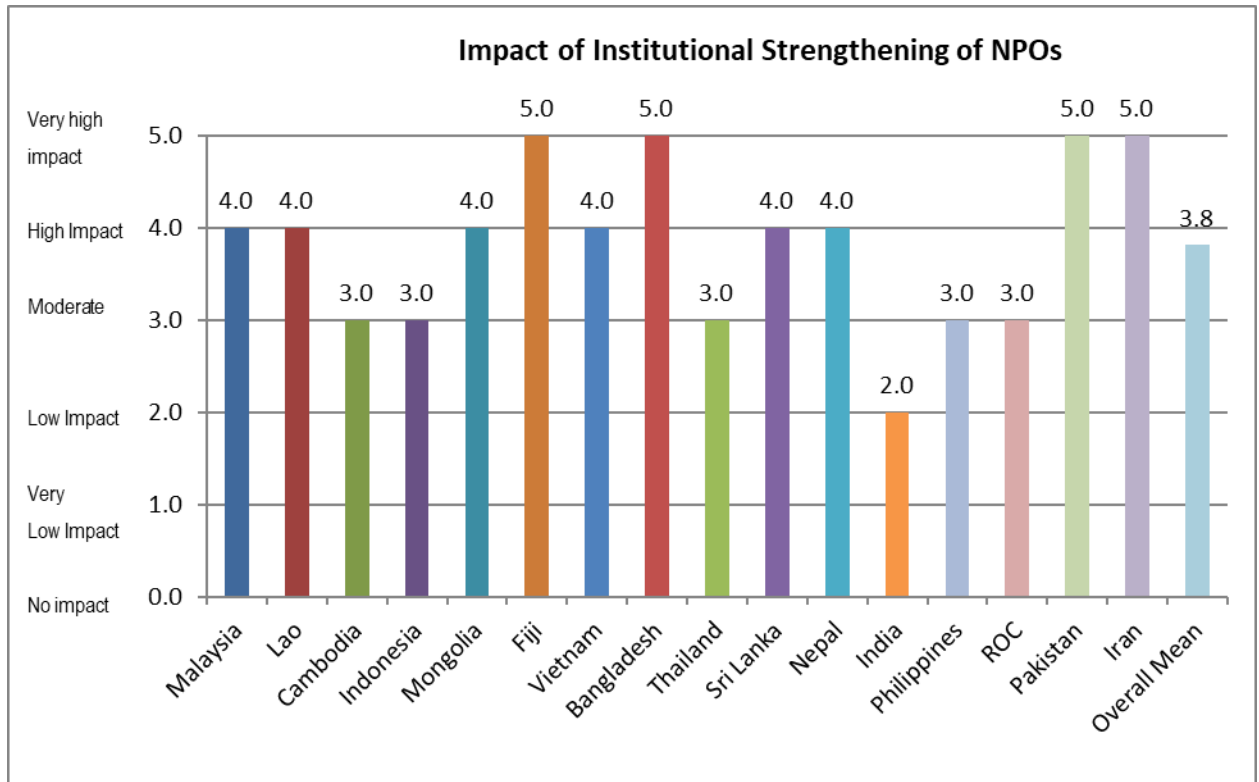

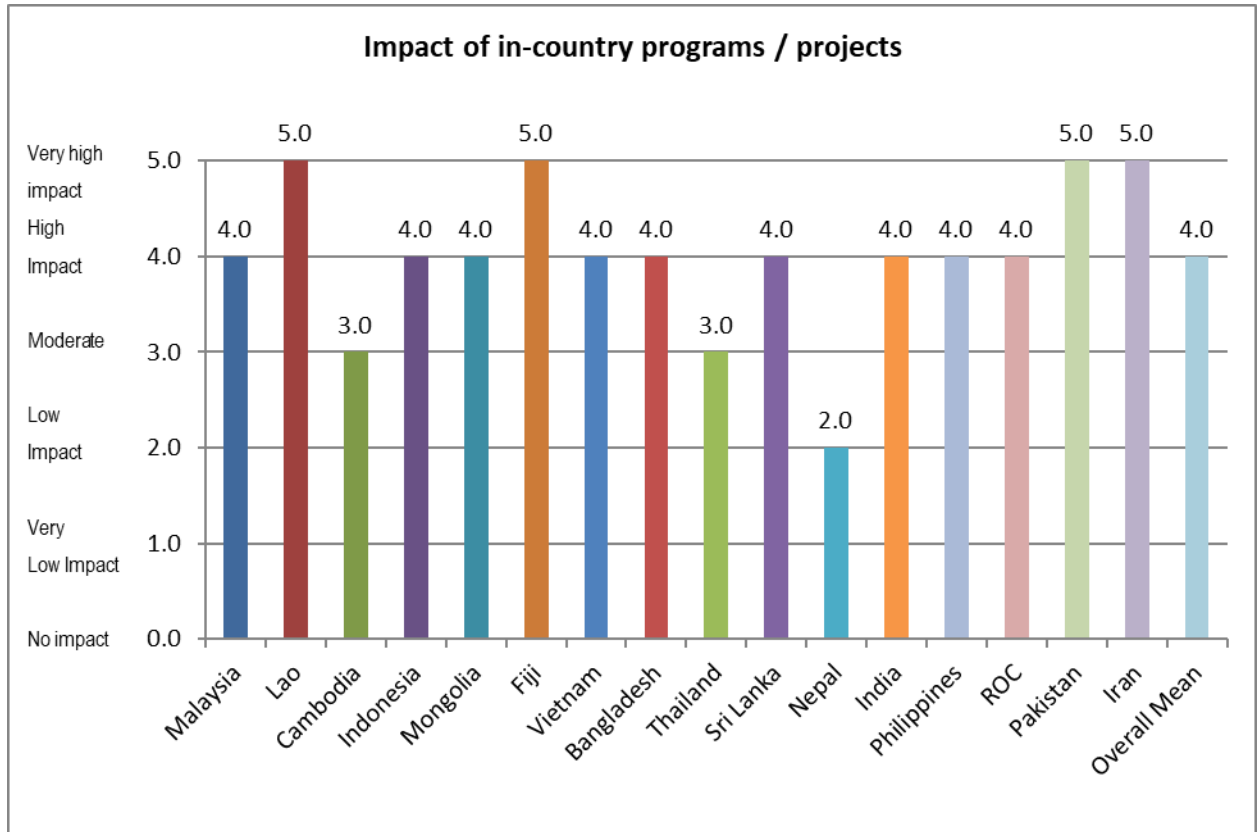

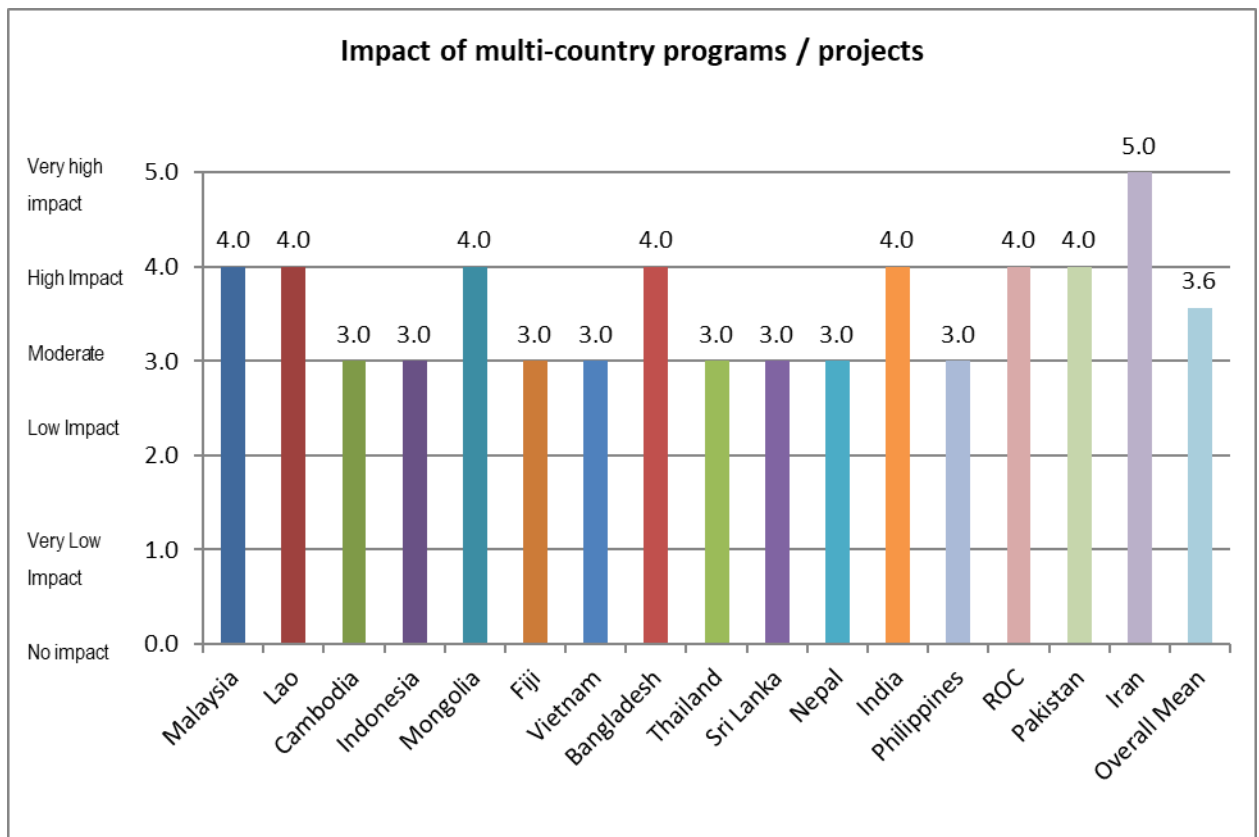

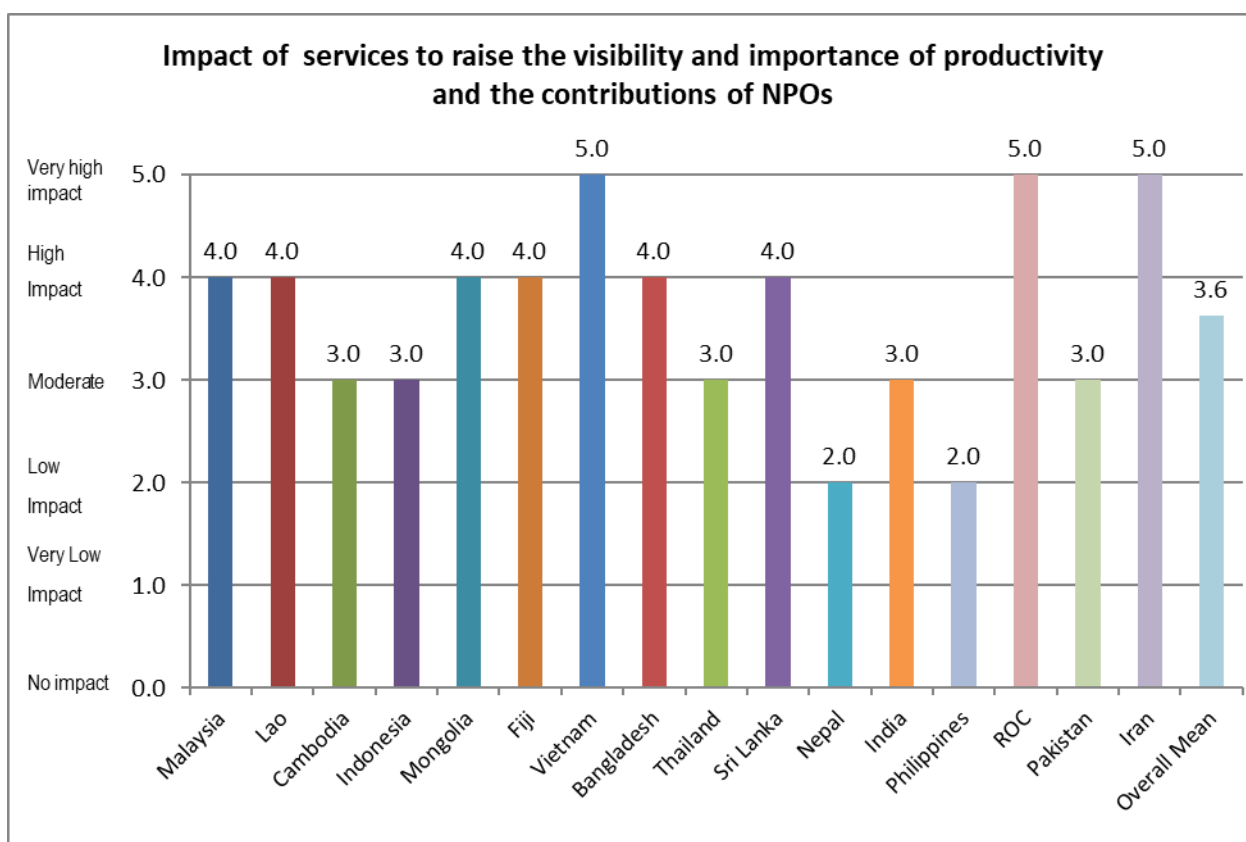

5.11 b) Suggested changes/comments for areas in need of improvement:

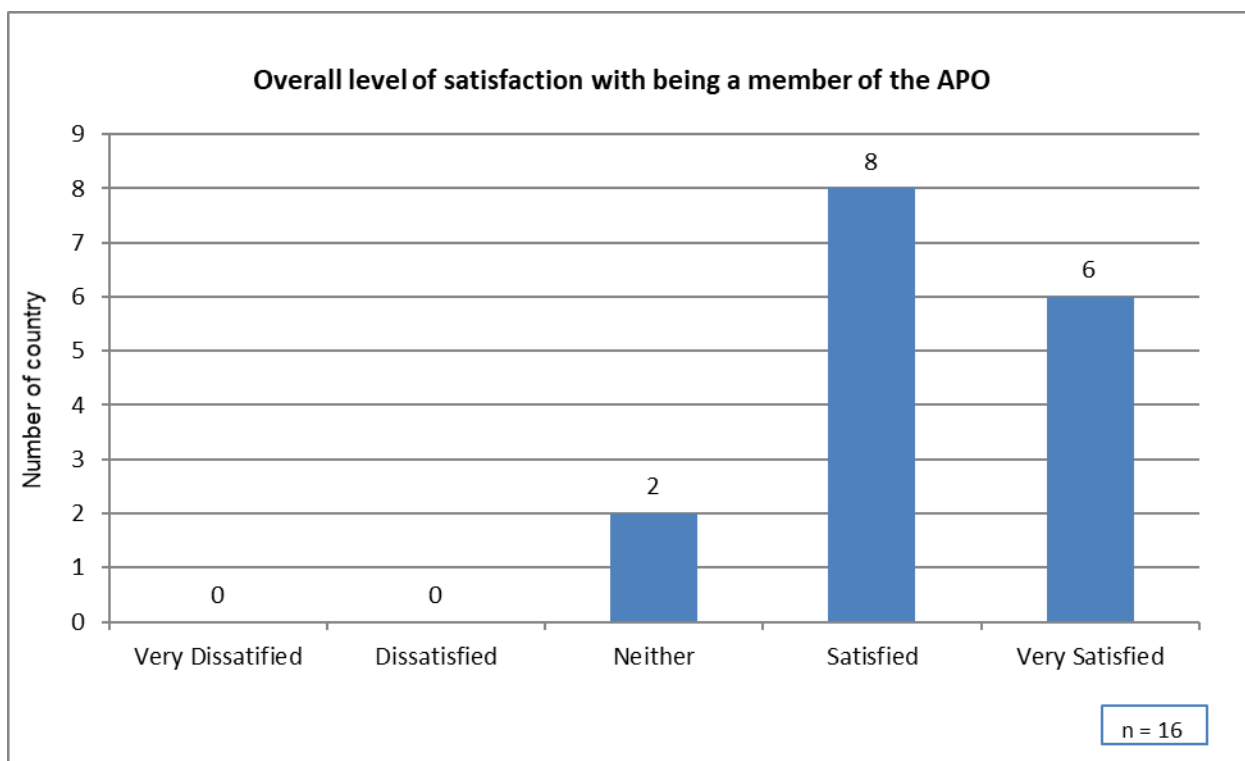

- Request for more in country programs/projects; meeting MPC needs and having a more balance between in-country to multi country projects (Malaysia)
- More programs/projects on Knowledge Management; supports innovation and productivity enhancement activities for enhancing competitiveness and service quality (Malaysia)
- Assist in institutional strengthening (Nepal)
- Increase in country programs (Nepal)
- BCBN could be longer term say 3 to 6 months at least (Philippines)
- It is clearly felt and seen that the category C programs are more effective, efficient (cost-wise) and impactful (greater multiplier effects) to drive the productivity message at the country level thus make it imperative to concentrate more resources here.(Fiji)
- The TES and demonstration projects often leave tangible and visible results behind and this is much appreciated by the governments and stakeholders.(Fiji)

- APO may consider taking staff from MCs and training them and leaving them in the respective countries to work and manage projects from there using the virtual technologies and collaborative work spaces available today, and without having to stay in an expensive city like Tokyo. This can cut costs down substantially and they carry the APO flag in the respective countries!(Fiji)
- APO projects should also aim to build the capacity of local experts and formalize their participation as active local counterparts, who not only supervise and assist in (demo) projects, but initiate demonstration projects and model companies as part of the capacity building effort spread over a few years rather than short periods of time as is the case now.(Fiji)
- There is a need to revamp the APO with the changing times (India)
- APO should make efforts to generate revenue in order to be self – sustainable in long term (India)
- APO must align, tie – up, collaborate with Institutions of Excellence in major APO member countries as regards to the Research projects undertaken by APO (India)
- APO renewed its Vision and Mission in 2011 but there is no roadmap to achieve them. In view of the same, it should develop a detailed roadmap with clear indication of output and outcome besides resource requirement.(India)
- APO should leverage ICT in its activities and for productivity movement. (India)

5.12 a) Level of satisfaction with being a member of the APO:

Satisfied	1		1	1			1			1	1		1		1		8
Very Satisfied		1			1	1		1						1		1	6

5.12 b) Comments:

- The opportunities for human resources development accorded through the participation in APO activities are invaluable and most appreciated by the respondents.(Fiji)
- It is not easy to satisfy diverse and sometimes conflicting interests. APO has done a good job and best wishes for future program preparations. (Fiji)
- There is a need for more technology demonstration projects that may be facilitated by APO (and the GPAC) across various sectors where specific technology applications may be especially focused upon (such as Supercritical CO2 applications, Plasma Technology, Microwave based heating / drying and robotics and others). These may be via new range of advanced Green productivity Demonstration projects and use of new tools and techniques.(India)
- APO may facilitate genuine efforts to establish capabilities in NPC / NPOs to undertake international technology collaboration projects or strategic management oriented consultancy including facilitating mergers and acquisitions and enabling internationalization initiatives for domestic firms (possibly in partnership with APO and other NPO's and also other international agencies and Large and SME consulting organizations across countries). These could also help strengthen NPC contribution towards facilitating manufacture of eco-friendly products and the domain of eco-innovation. Here, not only investments from various ministries and sectoral agencies could be involved but also mechanisms would be needed for obtaining funding from other financial institutions. Infact incubators may be established to also further the cause of entrepreneurship in the country(ies)and intrapreneurship across NPOs by involving suitable partnerships.(India)
- Advancement in the training frontier with newer more current and important areas for imparting training to officials and staff. This may include training in research capabilities (including software applications such as SPSS / SAS and on research methods), international technology transfer areas, vast range of management consulting areas including project management, besides areas such as GIS technologies and their applications.(India)
- Development of a Productivity Volunteers programme that will strengthen the engagement of NPC in India in multiple ways (and also possibly in other countries), to strengthen the process of employment generation and building competitiveness of SMEs and institutions which would enhance NPC, DIPP and APO visibility as well. (India)
- There can be a well organized Chemicals Management Programme for India in which NPC may seek to be a key consortium member along with other implementing agencies.(India)
- It is submitted that APO and inter NPOs related linkages must be deepened beyond liaison officers and other top management officials serving essentially as gate keepers. Indeed little engagement has been seen between NPOs / NPCs across countries beyond tokenism or some expert services being facilitated as per APO and liaison officer and management wishes, which too happening occasionally. Accordingly, a seamless inter- NPO linkage at all levels is the need of the hour such that the APO / NPO system becomes dynamic with prospects of knowledge creation and exchange and experience sharing and expertise identification and application (with ICT support and on the ground action) and project execution across countries. Else the whole system will continue to be opaque and the international bureaucracy of

the APO system self limiting as in the past. Indeed, the engagement of officials across the NPOs at all echelons will add much value to APO initiatives. (India)

- There is also scope for developing new toolkits such as financial productivity analytics and management productivity analytics domains that the APO must seek to finance along with other interested organizations such that new ISO standards could also emerge.(India)
- There is also a need for a good suggestion system to be established in the APO framework where potentially useful suggestions are given due consideration and not frowned upon or dismissed summarily with an all out campaign to discredit the personnel / employees who make suggestions and share their perspectives. The boundary scanning capabilities of various employees for potential project areas identification etc must be positively encouraged and facilitated.(India)
- There is further a need for 360° evaluation system (or still better systems with third party engagement in the process for enhanced fairness) to be put into place atleast in NPC India at the earliest such that fair and all round evaluations occurs for personnel in the years ahead, and that merit and devotion to duty gets due attention beyond mere loyalty arrangements across hierarchies.(India)
