THE PELLETING OF CLOVERS AND FERTILISER

The effects of the localized placement of fertiliser at seeding (pelleting) on germination, morphology and herbage yield of Trifolium species.

A THESIS presented in partial fulfilment of the requirements for the Degree of Master of Agricultural Science to the University of New Zealand, (Massey)

LIST OF CONTENTS

	<u>Page</u>
<u>CHAPTER I</u> - INTRODUCTION	1
Hill country ecology	2
Pelleting of seed	7
Organisation of presentation	8
Time and place of experiment	8
 <u>SECTION A</u> 	
The Preliminary Investigation into the Method of Pelleting and Germination Tests.	
<u>CHAPTER II</u> - REVIEW OF LITERATURE	9
Pelleting of seed & fertiliser	9
Fertiliser injury	11
Aerial sowing	13
<u>CHAPTER III</u> - THE EXPERIMENT, OBJECTIVES, MATERIALS AND METHOD OF PELLETING.	14
Objectives	14
Materials - seed	14
fertiliser	15
pellets	15
Pelleting	15
<u>CHAPTER IV</u> - GERMINATION TESTS AND STUDIES OF THE PHYSICAL CHARACTERISTICS OF THE PELLETS.	17
Germination tests	17
Solubility studies	21
Stability tests	22
 <u>SECTION B</u> 	
Pot Trials - Placement of Fertiliser at Seeding.	
<u>CHAPTER V</u> - REVIEW OF LITERATURE	26
General	26
Placement of fertiliser	27
Band placement	27
Coating seed with fertiliser	28
Granulation	28
Advantages of placement	29
Plant responses	30

	<u>Page</u>
<u>CHAPTER VI.</u>	
THE EXPERIMENT, OBJECTIVES, LAYOUT, MATERIALS AND METHOD.	32
The experiment	32
Objectives	33
Layout	36
Materials	38
Method	39
Potting	40
Sowing	41
Cutting	41
Weighing	41
Routine care and notes	42
 <u>CHAPTER VII.</u>	
RESULTS - POT TRIALS	43
General development	43
Compilation of results	45
Analysis of results	47
Summary of results	52
 <u>SECTION C</u>	
<u>ROOT STUDIES</u>	
 <u>CHAPTER VIII.</u>	
REVIEW OF LITERATURE	54
Root development	54
Effect of fertiliser placement	55
Nodulation	56
General - development of the nodules	56
Influence of plant nutrient relationships	59
on	
1. Host plant	60
2. <u>Rhizobia</u> spp.	62
 <u>CHAPTER IX.</u>	
ROOT STUDIES - OBJECTIVES, LAYOUT, MATERIALS AND METHOD.	63
Objectives	63
Layout	63
Method - Laying down the plots	64
Lifting	65
Root studies	66
Routine care and notes	68
 <u>CHAPTER X.</u>	
RESULTS - ROOT STUDIES	69
Establishment	69
Herbage Yields	70
Root weights	73
Root/Shoot ratio	76
Lateral root morphology	77
Nodulation -	80
Nodule numbers	80
Nodule distribution	83
Nodule colouration	84

	<u>Page</u>
<u>CHAPTER XI.</u>	
DISCUSSION	86
General	86
Preliminary pelleting trials	88
Pot trials	94
Root studies	101
SUMMARY OF RESULTS	109
CONCLUSIONS	112
ACKNOWLEDGEMENTS	114
REFERENCES	115
APPENDICES	

LIST OF TABLES

Table I	Results from germination tests	18
Table II	Solubility tests' results	21
Table III	Stability test	23
Table IV	Establishment assessment - Pot trial	43 44
Table V	Mean yields of main effects - Pot trials	46
Table VI	Analysis of Variance - Pot trial	48
Table VII	Table of varietal means	49
Table VIII	Analysis of variance of Ac 1st cut	50
Table IX	Analysis of variance of M 1st cut	51
Table X	Table of Means of M 1st cut	51
Table XI	Establishment assessment - Root studies	69
Table XII	Analysis of variance of herbage yields - Root studies	71
Table XIII	Table of differences between means of herbage yields - Root studies	71
Table XIV	Analysis of variance of root weights	73
Table XV	Table of differences between means of root weights	74
Table XVI	Lateral root numbers of plants of equal root weights	78
Table XVII	Treatment effects on lateral root numbers	79
Table XVIII	Analysis of variance of nodule numbers	81
Table XIX	Table of differences between means of nodule numbers	81
Table XX	Percentage of tap root nodules	84
Table XXI	Percentage of red nodules	84
