### TABLE OF CONTENTS

### PART I

### COMPARISONS OF GROWTH AND BODY COMPOSITION OF SHEEP GRAZING FOUR DIFFERENT PASTURES

Chapter			Page
I	INT	RODUCTION	1
II	REV	IEW OF LITERATURE	2
	1.	MEASUREMENT OF GROWTH AND DEVELOPMENT	2
	2.	THE PATTERN OF GROWTH AND DEVELOPMENT WITH PARTICULAR REFERENCE TO THE SHEEP	8
		<ul><li>(1) Change in Anatomical Components</li><li>(2) Change in Chemical Components</li></ul>	8 12
	3.	EFFECT OF NUTRITION ON BODY COMPOSITION	17
		(1) Change in Anatomical Components (2) Change in Chemical Components	17 23
	4.	EVALUATING PASTURES BY MEANS OF SHEEP	25
	5.	EFFECT OF BIRTHRANK ON BODY COMPOSITION	30
III	MAT	ERIALS AND METHODS	33
	1.	INTRODUCTION	33
	2.	EXPERIMENTAL DESIGN	34
		(1) Pastures (2) Sheep	34 34
	3.	MANAGEMENT	36
		(1) Pro-experimental (2) Experimental	36 36
	4.	THE SELECTION AND MANAGEMENT OF THE ANIMALS USED FOR CARCASS ANALYSIS	40
		(1) Selection (2) Management	40 41

Chapter			Page
	5.	PRE-SLAUGHTER TECHNIQUES	42
	6.	SLAUGHTER TECHNIQUES AND RECORDS	42
	7.	POST-SLAUGHTER TECHNIQUES	43
	8.	CARCASS DATA (1) Whole Carcass Treatment (2) Right Side (3) Left Side	ЦЦ ЦЦ Ц5 Ц7
	9.	STATISTICAL METHODS	48
IV	RES	ULTS	53
	1.	LIVEWEIGHT GROWTH	53
	2.	CARCASS WEIGHT AND COMPOSITION	56
		<ul><li>(1) Carcass Weight</li><li>(2) Carcass Composition</li></ul>	56 57
		<ul> <li>(a) Chemical Data <ul> <li>(1) Weight Components</li> <li>(i1) Percentage Components</li> </ul> </li> <li>(b) Dissection Data <ul> <li>(1) Weight Components</li> <li>(i1) Percentage Components</li> </ul> </li> </ul>	57 57 58 60 60 60
	3.	ORGAN AND GASTRO-INTESTINAL CONTENT WEIGHTS	61
		<ul><li>(1) Organ Weights</li><li>(2) Gastro-intestinal Content Weights</li></ul>	61 62
	4.	THE FAT-FREE CARCASS AND ITS COMPONENTS	63
	5.	INTERACTION	63
	6.	DISCUSSION	64

#### ACKNOWLEDGEMENTS

The author wishes to thank his supervisor Mr. R.A. Barton for the assistance and advice given throughout this project. The interest and guidance of Professor A.L. Rae, particularly in statistical matters, is also gratefully acknowledged. Mr. A.H. Kirton gave much invaluable help and advice.

The author is indebted to many members of the Massey Agricultural College and D.S.I.R. staffs, and particularly to: Dr. R.H. Jackman for conducting the Kjeldahl enalyses; Mr. M.F. McDonald for information on liver damage caused by facial eczema; Drs. D.S. Flux, G.W. Butler and F.R. Cockrem for constructive advice and criticism, and Miss M.G. Campbell and her library staff for assistance in obtaining literature.

Special acknowledgement is due to Mrs. F. Fuckey for typing this thesis.

Plant Chemistry Laboratory, D.S.I.R. supplied the sheep used in this project.

This work was carried out while the author was assisted by N.Z. Wool Board, Shell Oil Company and University Senior Scholarships.
