A STUDY
OF SOME EFFECTS OF PROGESTERONE AND PREGNANT
MARES' SERUM (PMS) ON REPRODUCTIVE PHENOMENA
IN THE ANOESTROUS ROMNEY EWE

D. R. LAMOND

71081

- 1955 -

A thesis presented at Massey Agricultural College in
part fulfilment of the requirements for the Degree of
Master of Agricultural Science in the University of
New Zealand.

ACKNOWLEDGMENTS

The author wishes to thank his supervisor, Dr. J.I. Raeside, for his great interest, assistance and guidance. Thanks are also due to Prof. Rae and members of the Sheep Husbandry Department; the manager of the Longburn Freezing Works; and Mr L. Anderson and Mr H. Drake of Grasslands Division, D.I.S.R., for the photographs.

TABLE OF CONTENTS

<u>Chapter</u>		<u>Page</u>
I	INTRODUCTION	1
II	REVIEW OF LITERATURE	
	A. The Extent and Significance of the Ancestrous Period	
	1. Introduction	3
	2. Factors modifying the extent of the ancestrous period	6
	i. Breed	6
	ii. Latitude	7
	iii. Age	8
	iv. Plane of nutrition	8
	v. Presence of the ram	9
	vi. Other factors	10
	B. Methods Used to Alter the Ancestrous Period	
	1. Introduction	11
	2. Light	12
	3. Hormone administration	12
	C. Cyclical Changes in the Reproductive Tract	
	1. Introduction	16
	2. Macroscopic changes in the ovary	16
	3. Histological changes in the tract	19
	i. Fallopian tubes	19
	ii. Uterus	20
	iii. Cervix	21
	iv. Vagina	22
	D. The Response of the Reproductive Tract to Hormone Administration	23

E.	The Pituitary Gonadotrophins	
1.	The role of the anterior pituitary gonadotrophins in the anoestrous ewe	27
2.	The chick assay for pituitary gonadotrophins	29

III MATERIALS AND METHODS

A.	The Experimental Animals	
1.	Sheep	31
2.	Chickens	32
B.	The Hormones Used	
1.	Progesterone	33
2.	Pregnant Mares' Serum	33
C.	The Methods	
1.	Grouping	33
2.	The injections	33
3.	The detection of oestrus	34
4.	The slaughter and collection of specimens	34
5.	The examination of the ovaries	36
6.	The preparation of sections for histological examination	36
7.	The examination of sections	38
8.	Assay of the pituitary glands	42

IV RESULTS

A.	Manifestation of Oestrus	46
B.	Macroscopic Examination of the Ovaries	
1.	Ovulations	47

2.	The size of the experimental corpora lutea	49
3.	The graafian follicles	50
C.	Histological Changes in the Reproductive Tract	
1.	Fallopian tubes	55
2.	Uterus	59
3.	Cervix	63
4.	Vagina	66
D.	Examination of the Pituitary Glands	
1.	Weight of dried glands	73
2.	Study of Control chicks	74
3.	Distilled water injections	75
4.	Comparison of I/P and S/C routes of administration	76
5.	Effect of PMS injections on testes weights	77
6.	Results of assays of the pituitary glands for gonadotrophins	78

V	DISCUSSION	
A.	Manifestation of Oestrus	82
B.	Macroscopic Examination of the Ovaries	84
C.	Histological Changes in the Reproductive Tract	86
D.	The Assay of the Pituitary Glands	89
VI	SUMMARY AND CONCLUSION	92
VII	BIBLIOGRAPHY	94

LIST OF TABLES

<u>TABLE</u>		<u>PAGE</u>
1.	Length of anoestrus in different breeds of Domesticated sheep	4
2.	Experimental groups and treatments	35
3.	Sections of fallopian tubes examined	44
4.	The assay series	45
5.	The ewes which exhibited oestrus	46
6.	The ewes which ovulated	47
7.	Comparison of numbers of ewes ovulating in groups 4 a and 4 b	48
8.	Comparison of the total numbers of corpora lutea in groups 4 a and 4 b	49
9.	Comparison of normal and experimental corpora lutea	50
10.	Small and large follicles - all ewes	51
11.	Small and large follicles - group averages on a per ewe basis	52
12.	Group means and standard deviations of measurements of the fallopian tube - fimbriated portion	57
13.	Group means and standard deviations of measurements of the fallopian tube - mid-tube portion	57
14.	Group means and standard deviations of measurements of the fallopian tube - uterine portion	57
15.	Height of uterine epithelium	59a
16.	Vaginal characteristics - control ewes	67
17.	Vaginal characteristics - group 4	68
18.	Vaginal characteristics - groups 1, 2, 3	69
19.	Testes weights - control chicks	75
20.	Effect of distilled water injections on testes weights	76
21.	Comparison of I/P and S/C administration of pooled pituitary powder - Series 1 a	76
