THE RELATIONSHIP BETWEEN LEARNER CONTROL AND ONLINE LEARNING SELF-EFFICACY

A thesis presented in partial fulfilment of the
requirements for the degree of

Doctor of Philosophy
in
Education

at Massey University, Manawatu Campus,
New Zealand

Widchaporn Taipjutorus

ABSTRACT

Online learning has been growing rapidly in recent years, providing increased opportunities for tertiary institutes to reach out to learners who previously may have had limited access to a traditional university. Although students frequently use information technologies in their daily life, online learning requires considerably more competencies than basic computer skills. Many students are unsuccessful in their learning without face-to-face contact and collaboration with lecturers and peers. They can feel isolated and doubt their ability to succeed in the online course. To increase online learner success, support is needed, especially to improve learner self-efficacy. Very few studies have focused on student self-efficacy in an online learning environment and especially those conducted in an authentic setting. Learner control is thought to facilitate students in online learning, but the relationship between learner control and learner self-efficacy is still unclear. Therefore, this study intends to examine this relationship using an embedded-correlational mixed method design to answer the research question, what is the relationship between learner control and online learning self-efficacy? The quantitative approach was used to find the correlations among learner control, online learning self-efficacy, and related variables such as age, gender, prior online experience, and computer skills. An online Learning Self-efficacy Scale (OLSES) was constructed and validated with an internal consistency of 0.895. Open-ended questions were added to the questionnaire to gain a greater level of insight of online learning experience in relation to self-efficacy and learner control. Seventy-five students in a four year teaching online programme at a New Zealand tertiary institute participated in the online survey. Data analyses revealed that the relationship between learner control and online learning self-efficacy was confirmed, $r = .526$, $p < .01$. Age and gender had no effect on the relationship while prior online experience, computer skills for social and academic purposes did. The multiple linear regression showed that learner control and computer skills for academic purpose are good predictors of online learning self-efficacy. Analyses of the qualitative data not only confirmed the quantitative findings, but also provided insight into the nature of self-efficacy and importance of feedback in the online setting. As a result of this study, the embedded framework for successful line learners (SUCCESS) was developed and is recommended as a set of guidelines for online learning developers.

DEDICATION

I would like to dedicate this thesis to my dad who gave me my blood and soul. He was the one who showed me the great strength of self-efficacy which inspired and led me into a long lonely but the enjoyable PhD journey. Though we did not spend quality time during the past years, I was touched by his love.

Learning is a never-ending process. Those who wish to advance in their work must constantly seek more knowledge, or they could lag behind and become incompetent.

(H.M. Bhumibol Adulyadej, 1961)

ACKNOWLEDGEMENTS

First of all, I wish to express my sincere gratitude for my research supervisors, Associate Professor Sally Hansen, my main supervisor, and Professor Mark Brown, my co-supervisor. You both have been particularly kind and supportive throughout the process. This thesis is completed with your professional guidance and tirelessly insightful critiques. The opportunities you have given me to present my works on several occasions, both nationally and internationally, have made my PhD journey very rich, precious, and pleasant.

I also wish to express my appreciation to Dr. Benjamin Kehrwald, my first main supervisor, Dr. Lone Jorgenson and Dr. Brian Finch, my previous co-supervisors, for helping me get started with my study, develop my research proposal, and get through the confirmation process. My appreciation also goes to Professor Christine Stephens, the Convenor, and the doctoral oral examiners, Dr. Maggie Hartnett, Associate Professor Mary Simpson, and Dr. Panos Vlachopoulos, who read every line of my thesis and provide valuable comments.

Special thanks to Mrs. Lois Wilkinson at the Centre for Teaching and Learning who help me improve my academic writing skills. I really appreciate your willingness to read through my broken English patiently, help me develop the idea, and provide very helpful feedback to my work. This thesis would not be possible without you. My appreciation also goes to Dr. Julia Rayner at the Graduate Research School who help me develop writing skills from the writing group and gave me opportunities to share my perspectives and PhD experiences with others on several occasions.

My appreciation also goes to the paper co-ordinators of my sample groups. Thanks to the academic staff who helped me with the distribution of my questionnaire during the pilot study and remind me about the ethical issues. Many thanks to all participants who give valuable reflections of the online learning experience. Your responses were truly appreciated. I also grateful for Mrs. Carita Yalden and Mrs. Julie Sakai who helped me juggle in between my supervisors' busy schedule, and coordinated many tasks related to my PhD process. Many thanks to my MOMs here, Mrs. Josie Griffiths, Mrs. Sharon Simmons, and Mrs. Roseanne MacGillivray, who took care of our postgraduate room

and all functions related to us, the PhD students in the Institute of Education. I would like to say thank you to Mrs. Phillippa Butler, the Research Officer at the Institute of Education who affirmed me about the statistical technique and went through my thesis at the final stage of my writing. My thankfulness also goes to the people at the International Student Support who extremely supportive. You have helped me resolve all the hiccups along my path, thus, made my journey smoother.

I am really appreciative of Associate Professor Siriwan Sereesat, my previous boss, who encouraged me to get into this profession and gave me a small grant to set up my life in New Zealand. Many thanks to my PhD Colleagues; Ms. Shutiwat Purinthapibal, who shared all kinds of fun and valuable experiences in various activities we had together, including many trips around New Zealand and the support we gave to each other during up-and-down moments at Massey. I would like to thank Assistant Professor Quantar Banthip and Dr. Catootjie Nalle, who helped me during the first few months in Palmerston North. A million thanks to my PhD friends at the Institute of Education who walked with me during the PhD journey, especially Mrs. Marie-Pierre Fortier. Without you guys, my journey would be really lonely and boring.

Special thanks to my yoga teachers, Mrs. Ruth Hodgson, for your training that helped keep my mind and body balance so I could move well along the PhD route. Also, thanks to the delightful class members who kindly gave me some writing and oral examination tips. I would also like to give my sincere thanks to the people at the Centre, especially Ms. Victoria Sibley, for providing English classes, exchanging our beliefs, and being friends with me.

Most of all, my appreciation goes to my mom, Mrs. Suda Taipjutorus, who was taking care of my financial matters and my two little monkeys. Special thanks to my beloved husband, Mr. Sorawit Kiatsrisiri, who helped out all the legal matters and supported me emotionally. I would not have this chance if you did not allow me to walk on this journey. Last but not least, I would like to thank my four children, Weena (Mai), Sasitorn (Fai), Pattama (Pear), and Nanta (Pan) Wangspa. I am really grateful for your understanding of what I was doing. You are growing maturely and doing amazingly well during my four years studying overseas. I am very proud of you all.

กิตติกรรมประกาศ

ขอขอบคุณมหาวิทยาลัยเทคโนโลยีราชมงคล พระนคร ที่ให้ทุนการศึกษาตลอดระยะเวลา ๔ ปี ทำให้ผู้รับทุนมีโอกาสไปพัฒนา ไปศึกษาหาความรู้ และเก็บเกี่ยวประสบการณ์ในประเทศนิวซีแลนด์ จนสำเร็จการศึกษาระดับปริญญาเอก

ขอกราบขอบพระคุณท่านคณบดี คณะเทคโนโลยีสารสนเทศ รongศาสตราจารย์ วิมลพรรณ อาภาเวท ที่ได้เห็นศักยภาพของผู้รับทุน และเสนอชื่อผู้รับทุนต่อทางมหาวิทยาลัยฯ ขอกราบขอบพระคุณท่านอธิการบดี รongศาสตราจารย์ ดวงสุตา เตโชติรส และ ผู้ช่วยศาสตราจารย์ ดร. นุชลี อุปภัย รongอธิการบดี ด้านวิจัยและบริการวิชาการในขณะนั้น ที่ให้การสนับสนุน และให้ความสะดวกในการมาศึกษาที่ประเทศนิวซีแลนด์ในครั้งนี้

ขอขอบคุณเจ้าหน้าที่กองบริหารงานบุคคล โดยเฉพาะอย่างยิ่ง คุณวันใหม่ สุกใส ขอขอบคุณเจ้าหน้าที่การเงิน กองคลัง และเจ้าหน้าที่สายสนับสนุน คณะเทคโนโลยีสารสนเทศทุกท่าน ที่ช่วยเหลือในการส่งหนังสือ ทำเรื่องเบิกจ่าย และอื่นๆ ในขณะที่ผู้รับทุน ศึกษาอยู่ที่ประเทศนิวซีแลนด์ ผู้รับทุนเดินมาได้จนถึงจุดหมาย ด้วยการสนับสนุนของบุคคลากรทุกฝ่าย ขอขอบคุณอีกครั้งมา ณ ที่นี้ด้วย
