**ANALYSING AND PREDICTING SELECTION RESPONSE  
IN TRIBOLIUM**

By

**William Emsball**

**A THESIS**

**Submitted in partial fulfilment  
of the requirements for the degree of**

**DOCTOR OF PHILOSOPHY**

**Sheep Husbandry Department  
Massey University**

**November 1966**

## I N D E X

	<u>Page</u>
INTRODUCTION .....	1
ESSAY ON SELECTION THEORY .....	4
Concept of additive variance .....	4
Effect of selection .....	6
Calculating the genetic components of variation .....	8
Plant vs animal application .....	13
History of selection theory .....	15
Other factors affecting selection response .....	17
Predicting selection response .....	21
Analysing selection response .....	23
Value of computers .....	26
PART ONE : ANALYSING SELECTION RESPONSE .....	30
1.1 Literature review .....	30
1.2 Materials and methods .....	36
Organism .....	36
Description of <u>Tribolium</u> laboratory .....	37
Programme .....	43
Control .....	45
Replication .....	46
Selection procedure .....	48
1.3 Results .....	51
(A) Presentation of basic data .....	53
Mean weight .....	54
Phenotypic variance .....	56
Coefficient of variation .....	57
Realised heritability .....	59
(B) Methods of analysing data .....	62
Average rate of response .....	62
Fluctuations of response .....	74
Trends of response .....	77
(C) The selection response .....	80

			<u>Page</u>
	Response mean	.....	80
	Standard deviation	.....	89
	Regression coefficient	.....	93
	(D) Differences between replications	.....	96
1.4	Discussion	.....	105
PART TWO : PREDICTING SELECTION RESPONSE			107
2.1	Literature review	.....	107
2.2	Methods	.....	113
	Prediction from first-generation response	.....	113
	Prediction from base population	.....	114
2.3	Results	.....	120
	Prediction from base population	.....	120
	Selection differential	.....	127
	Prediction from first-generation response	.....	128
	Prediction of limit response	.....	135
2.4	Discussion	.....	138
PART THREE : EFFECTS OF SELECTION INTENSITY			140
3.1	Literature review	.....	140
3.2	Methods	.....	140
	Organism	.....	142
	Programme	.....	142
	Control	.....	143
	Replication	.....	143
	Selection procedure	.....	144
3.3	Results	.....	146
	3.31 Analysing selection response	.....	147
	(A) Presentation of basic data	.....	147
	Mean weight	.....	147
	Phenotypic variance	.....	148
	Realised heritability	.....	148

			<u>Page</u>
(B) Methods of analysing data	....	....	150
Average rate of response	....	....	150
Fluctuations of response	....	....	153
Trends of response	....	....	153
(C) The selection response	....	....	155
Response mean	....	....	155
Standard deviation	....	....	158
Regression coefficient	....	....	161
(D) Differences between replications	....	....	166
3.32 Predicting selection response	....	....	172
Prediction from base population	....	....	172
Prediction from first-generation response	....	....	175
3.4 Discussion	....	....	179
GENERAL DISCUSSION	....	....	181
SUMMARY	....	....	188
APPENDIX ONE : CORRESPONDENCE	....	....	191
ACKNOWLEDGMENTS	....	....	192
REFERENCES	....	....	193
