MEAT STUDIES IN THE ROMNEY EWE
(IN TWO PARTS)

A THESIS PRESENTED IN PARTIAL FULFILMENT OF THE
REQUIREMENTS FOR THE DEGREE OF MASTER OF AGRICULTURAL SCIENCE
IN THE UNIVERSITY OF NEW ZEALAND

BY
ALAN HENRY KIRTON
MASSEY AGRICULTURAL COLLEGE
APRIL, 1957

LIST OF CONTENTS

PART I

OBESITY IN THE EWE

	<u>PAGE</u>
CH. I INTRODUCTION	1
CH. II REVIEW OF LITERATURE.	
(A) THYROXINE EFFECTS ON BODY WEIGHT AND ITS COMPONENTS	4
(B) EFFECTS OF STARVATION ON BODY WEIGHT AND COMPOSITION	9
(1) Body fat	10
(2) Muscular tissue	11
(3) Bony tissue	11
(4) Organ weights	12
(C) BODY COMPOSITION	14
(1) Body weight	14
(2) Prediction of body fatness from subcutaneous fat	14
(3) Chemical approach	14
(D) CARCASS COMPOSITION	18
(1) Carcass weight	18
(2) Percentage cuts	18
(3) Dissection work (British)	18
(4) Dissection work (American)	18
(5) Chemical analysis on the edible carcass components	19
(6) Chemical work on the complete carcass	20
CH. III MATERIALS AND METHODS	
(A) SELECTION OF EXPERIMENTAL ANIMALS	21
(B) PRE-EXPERIMENTAL MANAGEMENT	21
(C) HORMONE USED	22
(D) EXPERIMENTAL DESIGN	22
(E) METHOD OF IMPLANTATION	25
(F) MANAGEMENT AND RECORDS DURING THE EXPERIMENTAL PERIOD	25
(G) SLAUGHTER TECHNIQUES AND RECORDS	26
(H) POST SLAUGHTER MEASUREMENT AND SPECIFIC GRAVITY DETERMINATION	27
(I) CARCASS DATA	27
(1) Carcass treatment	27
(2) Chemical analyses	28
(3) Physical methods of analysis on the left half carcass	30
(J) STATISTICAL METHODS	31
CH. IV TREATMENT EFFECTS ON LIVELWEIGHT AND ANIMAL HEALTH	
RESULTS	35

LIST OF CONTENTS (CONTD.)

	<u>PAGE</u>
(A) TREATMENT EFFECTS ON LIVEWEIGHT	33
(B) ANIMAL HEALTH	35
DISCUSSION	38
CH. V TREATMENT EFFECTS ON CARCASS WEIGHT AND COMPOSITION	
RESULTS	41
(A) CARCASS WEIGHT	41
(B) CHEMICAL COMPONENTS OF CARCASS WEIGHT	42
(1) Chemical fat	42
(2) Fat free carcass weight	43
(3) Carcass protein weight	44
(4) Carcass water weight	44
(C) PHYSICAL COMPONENTS OF CARCASS WEIGHT	47
(D) TREATMENT EFFECTS UPON LEG, LOIN, RIB CUT AND PERIRENAL FAT	49
(1) Leg	49
(2) Half loin	52
(3) The 9-10-11 rib cut	54
(4) Perirenal fat	58
(E) RESIDUAL IODINE DETERMINATIONS	59
DISCUSSION	60
CH. VI TREATMENT EFFECTS UPON WEIGHT OF GASTROINTESTINAL CONTENTS AND WEIGHT OF TRACT	67
RESULTS	67
DISCUSSION	73
CH. VII TREATMENT EFFECTS ON WEIGHTS OF INTERNAL FAT DEPOTS AND SELECTED ORGANS	76
RESULTS	
(A) INTERNAL FAT DEPOTS	76
(1) Omental fat	76
(2) Mesenteric fat	77
(B) SELECTED ORGAN WEIGHTS	77
(1) Thyroid gland	77
(2) Liver	78
(3) Kidneys	79
(4) Spleen	80
(5) Heart	80
DISCUSSION	81
CH. VIII GENERAL DISCUSSION	83
CH. IX SUMMARY AND CONCLUSIONS	87

LIST OF CONTENTS (CONTD.)

PART II

INDICES OF CARCASS COMPOSITION

	<u>PAGE</u>
CH. I	INTRODUCTION 90
CH. II	REVIEW OF LITERATURE
(A)	INFORMATION ON THE ENTIRE CARCASS AND ENTIRE JOINTS 92
(1)	Carcass weight 92
(2)	Carcass measurements 92
(3)	Carcass specific gravity 92
(4)	Dressing percentage 95
(B)	INFORMATION ON PART OF THE CARCASS 96
(1)	The rib cut 97
(2)	Leg and the loin 98
(3)	Carcass chemical components as indices of carcass composition 98
(4)	Coring device 99
(C)	INFORMATION FROM THE OFFAL PORTION OF THE ANIMAL
(1)	Internal fat depots 99
(2)	Internal organs 99
(3)	Cannon bones 100
CH. III	MATERIALS AND METHODS 101
CH. IV	RESULTS
(A)	INFORMATION ON THE ENTIRE CARCASS AND ENTIRE JOINTS 102
(1)	Carcass weight 102
(2)	Specific gravity of the carcass and of the joints 103
(3)	Dressing percentage 106
(B)	INFORMATION ON PART OF THE CARCASS
(1)	The 9-10-11 rib cut 107
(2)	Leg and loin 108
(3)	Carcass chemical components 109
(C)	INFORMATION FROM THE OFFAL PORTION OF THE ANIMAL 110
(1)	Internal fat depots 110
(2)	Information from the internal organs 111
CH. V	DISCUSSION 112
CH. VI	SUMMARY AND CONCLUSIONS 116
	BIBLIOGRAPHY 118

LIST OF TABLES

<u>TABLE NO.</u>		<u>PAGE NO.</u>
1	Liveweight (lb.) at the beginning and end of the experimental period	33
2	Mean liveweight loss of the treatment groups (lb.)	33
3	Analysis of variance of liveweight change (lb.)	34
4	Weight loss in the DT:LP group	35
5	Hot carcass weight (lb.)	41
6	Analysis of variance of hot carcass weight (lb.)	41
7	Weight of chemical fat in the carcasses (lb.)	42
8	Analysis of variance of weight of chemical fat in the carcasses (lb.)	42
9	Fat free carcass weight (lb.)	43
10	Analysis of variance of fat free carcass weight (lb.)	43
11	Carcass protein (lb.)	44
12	Analysis of variance of weight of carcass protein (lb.)	44
13	Carcass water (lb.)	45
14	Analysis of variance of weight of carcass water (lb.)	45
15	Water as a percentage of the fat free carcass	46
16	Analysis of variance of water expressed as a percentage of the fat free carcass	46
17	Correlations between water as a proportion of the fat free carcass and percentage and weight of carcass fat, in the ewe	47
18	Relationship between dissectible components of leg + loin and the same carcass component for 25 ewes	48
19	Total dissectible fat in carcasses (lb.)	48
20	Total dissectible muscle in carcasses (lb.)	48
21	Analysis of variance of carcass dissectible muscular tissue (lb.)	49
22	Leg weight (g.)	49
23	Analysis of variance of leg weight (g.)	50

LIST OF TABLES (CONTD.)

<u>TABLE</u> <u>NO.</u>		<u>PAGE</u> <u>NO.</u>
24	Weight of dissectible muscle (g.) in the leg	50
25	Analysis of variance of weight of dissectible muscle (g.) in the leg	50
26	Weight of dissectible fat (g.) in the leg	51
27	Weight of dissectible bone (g.) in the leg	51
28	Weight of the half loin cut (g.)	52
29	Analysis of variance of the weight of the half loin cut (g.)	52
30	Weight of dissectible muscle (g.) in the half loin	53
31	Analysis of variance of weight of dissectible muscle (g.) in the half loin	53
32	Weight of dissectible fat (g.) in the half loin	54
33	Analysis of variance of weight of dissectible fat (g.) in the half loin	54
34	Weight of the rib cut (g.)	55
35	Analysis of variance of weight of the rib cut (g.)	55
36	Weight of dissectible muscle in the rib cut (g.)	55
37	Analysis of variance of weight of dissectible muscle (g.) in the rib cut	56
38	Weight of protein (g.) in the rib cut	56
39	Analysis of variance of weight of protein (g.) in the rib cut	56
40	Weight of water (g.) in the rib cut	57
41	Analysis of variance of weight of water (g.) in the rib cut	57
42	Weight of dissectible fat (g.) in the rib cut	58
43	Weight of perirenal fat (g.) from the left half carcass	59
44	Analysis of variance of weight of perirenal fat (g.) from the left half carcass	59
45	Weight of gastrointestinal contents (lb.)	67
46	Analysis of variance of weight (lb.) of gastrointestinal contents	67
47	Weight of gastric contents (mainly ruminal) (lb.)	68
48	Analysis of variance of weight of gastric contents (mainly ruminal) (lb.)	68

LIST OF TABLES (CONTD.)

<u>TABLE</u> <u>NO.</u>		<u>PAGE</u> <u>NO.</u>
49	Weight of intestinal contents (lb.)	68
50	Analysis of variance of weight of intestinal contents (lb.)	69
51	Weight of gastrointestinal tract (lb.)	69
52	Analysis of variance of weight of gastrointestinal tract (lb.)	70
53	Gastric weight (lb.)	70
54	Analysis of variance of gastric weight (lb.)	71
55	Intestinal weight (lb.)	71
56	Analysis of variance of intestinal weight (lb.)	71
57	Weight of omental fat (lb.)	76
58	Analysis of variance of weight of omental fat (lb.)	76
59	Weight of mesenteric fat (lb.)	77
60	Analysis of variance of weight of mesenteric fat (lb.)	77
61	Weight of thyroid glands (g.)	77
62	Analysis of variance of weight of thyroid glands (g.)	78
63	Liver weight (g.)	78
64	Analysis of variance of liver weight (g.)	
65	Kidneys weight (g.). (Two per ewe)	
66	Analysis of variance of weight of two kidneys per ewe	79
67	Spleen weight (g.)	80
68	Heart weight (g.)	80
69	Analysis of variance of heart weight (g.)	80
70	Correlation coefficients between cold carcass weight (lb.) and between body weight (lb.) at the beginning of the experimental period, and components of carcass weight	102
71	Regression equations for estimating weight of carcass fat from carcass weight (lb.)	103

LIST OF TABLES (CONTD.)

<u>TABLE</u> <u>NO.</u>		<u>PAGE</u> <u>NO.</u>
72	Specific gravities, fat and water percentages. Means and ranges	103
73	Correlation coefficients between specific gravities of the carcasses and other variates. (Chemical data unless otherwise stated)	104
74	Correlations between joint specific gravities and state of fatness of the joints	104
75	Regression equations for predicting carcass composition from carcass specific gravity	105
76	Estimated values for specific gravity of fat and specific gravity of fat free carcass	105
77	Correlations between carcass chemical fat and dressing percentage	106
78	Regression equations for predicting carcass chemical fat percentage from dressing percentage	107
79	Correlations between components of the rib cut and other rib and carcass components	107
80	Regression equations for estimating rib and carcass components of the ewe from components of the rib cut	108
81	Correlations between the dissectible components of the carcass and the same components of the leg and loin	109
82	Regression equations for estimating dissected carcass components from dissected components of the leg and loin of 25 ewes	109
83	Correlation coefficients estimated between weight of some internal fat depots and estimates of carcass fatness for 48 ewes	110
84	Correlations between some internal organ weights and the weight of the fat free carcass, carcass weight, weight of muscle from the leg + loin, and carcass weight, for 48 ewes	111
85	Correlations between the weight of the fat free carcass and organ weights calculated within the nutritional planes	111
86	Standard errors of estimate of regression equations for predicting chemical carcass fat.	112
87	Standard errors of estimate of regression equations for predicting dissectible carcass fat.	112

ACKNOWLEDGEMENTS

The author wishes to acknowledge with gratitude the constant interest and assistance of Mr. R.A. Barton at whose suggestion this project was carried out. The advice of Prof. A.L. Rae and guidance in statistical matters is also gratefully acknowledged.

Microchemical iodine analyses were kindly carried out by Dr. G.W. Butler, Plant Chemistry Laboratory, and fat specific gravity values were determined by Dr. F.B. Shorland, Fats Research Laboratory. Prof. C.R. Barnicoat was helpful with suggestions on chemical methods. Mr. H. Drake undertook the photography.

Mr. T.S. Ch'ang kindly supplied transport for the carcasses. The workers in the slaughter and dissection teams helped to make this project possible.

Miss M.G. Campbell and her library staff were of great assistance in obtaining the material for the literature review, much of which had to be obtained on inter-loan.

Glaxo Laboratories, Palmerston North, supplied the l-thyroxine implant tablets used in this project.

The author was assisted by scholarships provided by the N.Z. Wool Board and the Shell Oil Company. The labour for the dissection work was financed by a D.S.I.R. grant.
