THE POTENTIAL
FOR INCREASED PRODUCTION
ON SHEEP FARMS IN
WAIROA COUNTY

by

R.W. CARTWRIGHT

Thesis Presented in Partial Fulfilment
of the Requirements for the
Degree of Master of Agricultural Science
in Massey University

January, 1967.

ACKNOWLEDGEMENTS

The author wishes to thank Professor W.V. Candler for his advice and encouragement during this study. The author benefited from several discussions with Messrs. J.N. Hodgson and N. Watson.

The efforts of the many people who assisted with this study, are appreciated. Special thanks are due to many farmers in Wairoa County for their unstinting co-operation during the Farm Survey.

During the early part of this study, the author was employed by the New Zealand Department of Agriculture which also met the full cost of the Farm Survey. This support is gratefully acknowledged, as is the financial assistance provided by scholarships from the Bank of New South Wales and the New Zealand Wool Board.

Thanks are due to Mesdames M. Clifford and A. Smith, who typed this thesis and to Mrs. J. Cartwright who traced the figures and assisted with proof-reading. Thanks are also due to the library staff for their assistance in obtaining references.

CHAPTER 1 INTRODUCTION AND THESIS GUIDE	1
1.1 Introduction	1
1.2 Objectives of the Study	2
1.3 Sources of Information	4
1.4 Thesis Guide	5
 CHAPTER 2 WAIROA COUNTY	 7
2.1 Introduction	7
2.11 Location	7
2.2 Natural Features	7
2.21 Topography	7
2.22 Soil types	8
2.221 Main soil types	10
2.23 Climate	13
2.231 Rainfall	13
2.232 Temperature	14
2.233 Wind conditions	14
2.3 Land Use and Tenure	14
2.4 Auxiliary Services	16
2.41 Roads	16
2.42 Telegraphic services	16
2.43 Transport services	17
2.44 Agricultural contracting services	17
2.45 Farm supply and trading services	18
2.46 Stock slaughtering and meat freezing facilities	20
2.47 Sources of farm credit	20
2.48 Farm advisory services	21
2.481 Managerial advice	21
2.482 Financial advice	22
2.483 Technical advice	23
 CHAPTER 3 FARM MANAGEMENT RESEARCH AND FARM SURVEYS	 24
3.1 Introduction	24
3.2 Farm Management Research	24
3.3 Farm Surveys	27
3.31 Descriptive or recording surveys	28
3.32 Interview or management surveys	29

3.4	The Wairoa County Farm Survey	32
3.41	The nature of the survey	32
3.42	Selection of farms	33
3.43	Selection of Random Group farms	33
3.44	Selection of Purposively Selected farms	36
3.45	Interviewing procedure and experience	38
3.5	Analysis of Survey Data	39
3.51	Basic information	39
3.52	Management practices	39
3.53	Financial analysis	40
3.531	Standardised costs and prices	40
3.532	Profits and profitability	41
3.533	<u>Ex poste</u> and <u>ex ante</u> analysis of profitability	43
3.54	Attitudes to development	45
CHAPTER 4	PRODUCTION AND INCOMES ON WAIROA HILL COUNTRY FARMS	46
4.1	Introduction	46
4.2	Farm Organisation	46
4.21	Size of farms	46
4.22	Tenure of farms	49
4.23	Responsibility for management	50
4.3	Farm Labour in Wairoa County	51
4.31	Labour used	51
4.32	Availability of labour	52
4.4	Farm Topography	53
4.5	Land Use on Farms	57
4.6	Farming Enterprises and Stocking Rates	59
4.61	Stocking rates	59
4.7	Production	63
4.8	Farm Incomes	65
4.9	Capital Structure of Random Farms	72
4.10	Recent Production Increases in Wairoa County	75
4.11	Future Levels of Production	77
4.12	Restraints on Production Increases	78
4.13	Summary and Conclusions	80
CHAPTER 5	MANAGEMENT PRACTICES ON WAIROA FARMS	83
5.1	Introduction	83

5.2	Stock Management	83
5.21	Breeding ewes	84
5.22	Hoggets	89
5.23	Other dry sheep	91
5.24	Breeding cows	92
5.25	Dry cattle	94
5.26	An atypical cattle management system	95
5.3	Pasture Management	97
5.31	Topdressing practices	98
5.32	Subdivision and grazing management	102
5.4	The Control of Weeds and Pests	103
5.41	Weeds	104
5.42	Pests	105
5.5	Technical Problems Encountered by Wairoa Farmers	106
5.51	'Clover ill-thrift'	106
5.52	Copper deficiency	108
5.6	Farm Development Techniques in Wairoa County	108
5.61	Fencing techniques	109
5.62	Pasture improvement by oversowing and topdressing	111
5.63	Establishment of pastures on unproductive land	112
5.631	Development from manuka	113
5.632	Development from manuka and blackberry	118
5.633	Development from blackberry	119
5.64	Changes in stocking policies during farm development	122
5.65	Finance used for farm development	123
5.7	High Production on Hill Country Outside the County	124
5.71	State experimental farms	125
5.711	Tangoio and Waerenga-o-kuri	125
5.712	Te Awa	127
5.72	Experience of innovating farmers	129
5.721	'Wairere'	130
5.722	'Ratahiwi'	132
5.8	Summary and Conclusions	133
CHAPTER 6	THE EVALUATION OF HILL COUNTRY DEVELOPMENT PROGRAMMES	136
6.1	Introduction	136
6.2	Definitions	136
6.3	The Need for Evaluation of Development Programmes	137

6.31	Evaluation by farmers	137
6.32	Evaluation by planning agencies	139
6.4	The Development Model	141
6.41	Temporal considerations	142
6.42	Production	142
6.43	Profits	142
6.44	Overdraft	144
6.5	Expressing the Profitability of Development Programmes	145
6.51	The present value of profits	146
6.52	Estimating asset increments	147
6.53	Return on Investment	149
6.54	Increase in Owner's Drawings	150
6.6	Objectives Other Than Profit	151
6.7	A Worked Example of Development Programme Evaluation	151
6.71	The raw data	152
6.72	Preliminary computations	155
6.721	Base Year computations	155
6.722	Development year 1 computations	158
6.73	Computation of profitability	161
6.731	Present Value of Development Cash Profits	162
6.732	Return on Investment	162
6.733	Asset Increment	163
6.734	Additional information	163
6.8	Conclusion	164
CHAPTER 7	HILL COUNTRY DEVELOPMENT PROGRAMMES IN WAIROA COUNTY	165
7.1	Introduction	165
7.2	Assumptions in Programme Analysis	166
7.21	Costs and prices	166
7.22	Taxation	167
7.221	Standard values	168
7.222	Personal and family exemptions	168
7.223	Life insurance premiums	169
7.224	Spreading-forward exemptions	169
7.23	Living expenses	170
7.3	Case Development Programmes	171
7.4	Case Development Programme I - Farm 21	173
7.41	The development programme	173

7.42	Evaluation of Programme I	180
7.421	Evaluation under Condition A	180
7.422	Evaluation under Condition B	181
7.5	Case Development Programme II - Farm 22	181
7.51	The development programme	182
7.52	Evaluation of Programme II	185
7.521	Evaluation under Condition A	185
7.522	Evaluation under Condition B	188
7.6	Case Development Programme III - Farm 24	188
7.61	The development programme	189
7.62	Evaluation of Programme III	193
7.621	Evaluation under Condition A	197
7.622	Evaluation under Condition B	197
7.7	Case Development Programme IV - Farm 25	198
7.71	The development programme	198
7.72	Evaluation of Programme IV	204
7.721	Evaluation under Condition A	204
7.722	Evaluation under Condition B	204
7.8	Case Development Programme V - Farm 26	205
7.81	The development programme	205
7.82	Evaluation of Programme V	209
7.821	Evaluation under Condition A	209
7.822	Evaluation under Condition B	210
7.9	Summary and Conclusions	213
CHAPTER 8	A MODEL DEVELOPMENT PROGRAMME FOR WAIROA COUNTY	218
8.1	Introduction	218
8.2	The Hypothetical Farm	220
8.21	Size of the farm	220
8.22	Natural features of the farm	221
8.23	Pre-development physical condition	221
8.3	Pre-development Situation	223
8.31	Improvements	223
8.311	Fencing	223
8.312	Buildings	223
8.313	Water supplies	223
8.314	Tracking	223
8.32	Stock policy	224
8.4	The Development Programme	224

8.41	The stocking policy	224
8.42	The land development programme	233
8.421	Land development techniques	235
8.4211	Fencing techniques	235
8.4212	Pasture improvement	236
8.4213	Pasture establishment	237
8.4214	Installation of water supplies	237
8.422	A summary of the land development programme	238
8.43	Other resources for development	241
8.5	Financial Analysis of the Development Programme	243
8.51	The price assumptions	244
8.52	Derivation of the budgetary response surface	247
8.53	Acceptance of the budgetary response functions	252
8.54	Interpretation of the budgetary response surface	255
8.541	Point responses	255
8.542	The sensitivity of budgetary responses	257
8.543	'Break-even' points	262
8.55	A review of the response surface approach	270
8.6	Conclusions	270
CHAPTER 9	THE IMPACT OF TAXATION ON THE PROFITABILITY OF FARM DEVELOPMENT	273
9.1	Introduction	273
9.2	A Review of Empirical Results	274
9.3	A Theoretical Explanation	277
9.4	The Implications for Farm Development	281
9.41	The misallocation of resources	282
9.42	The restriction on funds	284
9.5	Conclusion	284
CHAPTER 10	THE POTENTIAL FOR INCREASED PRODUCTION IN WAIROA COUNTY	285
10.1	Introduction	285
10.2	Potential Increases in Stock Numbers	285
10.21	Stock increases in Wairoa County	286
10.22	Stock increases on adjacent hill country	287
10.3	Potential Production Increases	288
10.4	A Comment on the Value of Production Increases	289
10.5	Additional Resource Requirements	290

10.51	Fertiliser requirements	290
10.52	Farm labour requirements	291
10.53	Requirements for long-term credit	291
10.54	Advisory services	292
10.55	Transport services	292
10.56	Aerial topdressing services	292
10.57	Farm supply and trading services	293
10.6	Summary	293
CHAPTER 11 CONCLUSIONS AND SUGGESTIONS FOR INCREASING PRODUCTION		295
11.1	Introduction	295
11.2	The Feasibility of Increasing Production	295
11.3	Changes in Farm Management	295
11.4	Production Potentials	298
11.5	The Profitability of Increasing Production	298
11.6	Resources Required to Attain Potential Production	299
11.61	Advisory services during development	299
11.62	Credit for development	301
11.63	Farm labour for development	303
11.7	Stimulating Increased Production	303
11.71	The case for a management demonstration farm	304
BIBLIOGRAPHY		306
APPENDICES		
A	Letter Sent to Survey Farmers	
B	The Data Sheet	
C	Iso-stocking Rate Curves	
D	Analysis of Farm Incomes	
E	Comments on Two Measures of Profitability	
F	Spreading Tax Exemptions	
G	Budgets for Case Development Programmes	
H	The Effect on Tax of Spreading Exemptions Near-optimally	
I	Flow Diagram of an Algorithm for Obtaining Break-even Levels of Independent Variables in a Budgetary Response Function

LIST OF TABLES

Table		Page
1.1	Sources of Background Information	4
2.1	Major Soil Types in Wairoa County	12
2.2	Mean Monthly Rainfall 1921 to 1950	13
2.3	Tenure of Land Held for Pastoral Farming Purposes	15
2.4	Tenure of Land Held for Purposes other than Pastoral Farming	16
2.5	Proportions of Different Bulk Fertilisers Railed to Wairoa Bulk Stores (1964/65)	19
3.1	Fate of Random Selections	36
4.1	Size, Tenure, and Responsibility for Management of Random Farms	47
4.2	Size, Tenure, and Responsibility for Management of Purposive Farms	48
4.3	Topography of Random Farms	55
4.4	Topography of Purposive Farms	56
4.5	Land Use on Random Farms	58
4.6	Stock Conversion Coefficients for Stock Wintered	59
4.7	Stocking Rates on Random Farms (Winter 1965)	61
4.8	Stock Production on Random Farms	64
4.9	Expected Future Wool and Stock Prices	68
4.10	Analysis of Incomes on Random Farms	69
4.11	Capital Structure of Random Farms	74
4.12	Stocking Rate Increases on Purposive Farms	76
5.1	Fertiliser Usage on Random Farms (1964/65)	99
5.2	Estimated Costs of Fences	110
5.3	Production on Tangoio Grazing Trial	126
5.4	Production on Waerenga-o-kuri Grazing Trial	127
5.5	Production on Te Awa	128
6.1	Expenditure Items from a Hypothetical Profit and Loss Account	153
6.2	Non-deductible Cash Expenditure Items from a Hypothetical Balance Sheet	154
6.3	Data Extracted from Hypothetical Stock and Wool Accounts	155
6.4	Preliminary Computations	160
6.5	Pre-tax and Post-tax Development Cash Profits	161
7.1	Case Programme I - Land Development Programme	175
7.2	Case Programme I - Land Use	176

7.3	Case Programme I - Stocking and Production	177
7.4	Case Programme I, Condition A, Preliminary Computations	178
7.5	Case Programme I, Condition B, Preliminary Computations	179
7.6	Case Programme II - Land Development Programme	183
7.7	Case Programme II - Other Resource Requirements	183
7.8	Case Programme II - Stocking and Production	184
7.9	Case Programme II, Condition A, Preliminary Computations	186
7.10	Case Programme II, Condition B, Preliminary Computations	187
7.11	Case Programme III - Land Development Programme and Land Use	192
7.12	Case Programme III - Stocking and Production	194
7.13	Case Programme III, Condition A, Preliminary Computations	195
7.14	Case Programme III, Condition B, Preliminary Computations	196
7.15	Case Programme IV - Land Development Programme	200
7.16	Case Programme IV - Stocking and Production	201
7.17	Case Programme IV, Condition A, Preliminary Computations	202
7.18	Case Programme IV, Condition B, Preliminary Computations	203
7.19	Case Programme V - Land Development and Land Use	207
7.20	Case Programme V - Stocking and Production	208
7.21	Case Programme V, Condition A, Preliminary Computations	211
7.22	Case Programme V, Condition B, Preliminary Computations	212
7.23	Evaluations of Case Development Programmes Under Condition A - Summary	213
7.24	Evaluations of Case Development Programmes Under Condition B - Summary	214
8.1	Model Development Programme - Stock Wintered	227
8.2	Model Development Programme - Stock Sales and Purchases and Wool Production	228
8.3	Model Development Programme - Initiation of Land Development	239
8.4	Model Development Programme - Topdressing, Land Use, and Feed Reconciliation	240
8.5	Model Development Programme - Miscellaneous Resources	242
8.6	Design of Observations for the Budgetary Response Surface	249
8.7	Evaluations of the Model Development Programme at Various Price Levels	250
8.8	Model Development Programme - Budgetary Response Functions	251
8.9	Comparison of Budgetted Responses with Responses Estimated by the Derived Functions	254
8.10	Sensitivity of Present Value of Post-tax Development Cash Profits (P.V.) to Changes in Stock Price	259

8.11	Sensitivity of Present Value of Post-tax Development Cash Profits (P.V.) to Changes in Wool Price	260
8.12	Sensitivity of the Present Value of Post-tax Development Cash Profits (P.V.) to Changes in Fertiliser Price	262
8.13	The Sensitivity of Present Value of Post-tax Development Cash Profits (P.V.) to Changes in Stock Price, Wool Price, and Fertiliser Price under Condition A Assumptions	264
8.14	Break-even Levels of Stock Price	266
8.15	Break-even Levels of Wool Price	267
8.16	Break-even Levels of Fertiliser Price	268
8.17	Break-even Levels of Stock Price, Wool Price, and Fertiliser Price Under Condition A Assumptions	269
