ACKNOWLEDGEMENTS

I am indebted to my two supervisors, Dr J. C. Hawke and Dr A. T. Johns, Plant Chemistry Division, D.S.I.R., for their help and encouragement.

I also wish to thank

1. The Department of Scientific and Industrial Research for granting me leave on full salary.
2. Dr M. P. Bryant, United States Department of Agriculture, Beltsville, Maryland, for details of the dry-ice box for culture storage and for the L34 strain of Ramibacterium.
3. Dr G. Lubinsky, University of Manitoba, Winnipeg, for comments on the identification of the ciliates.
4. Dr R. W. Bailey for the analyses of total soluble sugars of forage materials.
5. Mr A. C. Glenday for the statistical analyses of the ciliate counting method.
6. Miss M. Soulsby for the photographs of the "camera lucida" drawings of ciliates.
7. Dr B. H. Howard, Rowett Research Institute, Aberdeen, for many helpful discussions.

CONTENTS

	<u>Page</u>
PREFACE	1
1. <u>THE RUMEN CILIATES</u>	
A. <u>IDENTIFICATION OF SPECIES</u>	
Introduction	7
Materials and Methods	11
Results	14
Discussion	40
B. <u>OCCURRENCE AND POPULATION DENSITY</u>	
Introduction	45
Materials and Methods	47
Experimental and Results	48
Discussion	49
C. <u>SEASONAL VARIATION IN EPIDINIUM</u>	
Introduction	57
Materials and Methods	59
Experimental and Results	59
Discussion	62
2. <u>THE CULTURE OF SOME RUMEN CILIATES</u>	
Introduction	66
Materials and Methods	68
Experimental and Results	
(a) The Culture of Oligotrichs	71
(b) The Culture of Holotrichs	77
Discussion	78

3.	<u>THE ISOLATION, IDENTIFICATION AND CHARACTERISTICS OF SOME RUMEN BACTERIA</u>	
	Introduction	85
	Materials and Methods	90
	Experimental and Results	96
	Discussion	110
4.	<u>MANOMETRIC STUDIES ON RUMEN ACTIVITY</u>	
	Introduction	120
	Materials and Methods	123
	Experimental and Results	125
	A. Experiments with whole rumen liquor	125
	B. Experiments with fractionated rumen liquor	135
	Discussion	143
