I am particularly grateful to Professor A. R. Frampton of the Agricultural Economics and Farm Management Department Massey University, for his guidance and interest in this study.

I would also like to thank Messrs. J. N. Hodgson, W. G. Payne and A. H. Hughes of the Agricultural Economics and Farm Management Department for helpful discussions with the author.

For assistance in the compilation of the cost data, I am indebted to Mr. D. G. Hogg of Hogg and Cardiff, Quantity Surveyors, Palmerston North and to Messrs. J. Luxton and W. S. Sloane, Department of Agriculture, Palmerston North.

Special thanks are due to Mr. A. Weber and Miss R. McCaughan of the Computer Unit, Massey University, for their advice in the writing and testing of the computer programmes.

The ready and willing co-operation of all survey farmers is gratefully acknowledged and I thank the Extension Officers of the New Zealand Dairy Board for the assistance and time they gave to the farm survey.

Particular appreciation is extended to Mrs. R. Donovan for her careful and patient typing of the thesis, and to Miss M. van Hove who was responsible for the figures.

Financial assistance from the New Zealand Dairy Board and from the Bank of New South Wales is acknowledged with gratitude.
