INVESTIGATIONS INTO SOME EFFECTS
OF CYSTEINE ADMINISTRATION TO THE
NEW ZEALAND ROMNEY.

A thesis presented in partial fulfilment
of the requirements for the
Degree of Master of Agricultural Science
in Animal Science.

by

G. McL. Dryden
Massey University, New Zealand
January, 1968.

ACKNOWLEDGEMENTS.

I wish to thank my supervisors, Drs. F.R.M. Cockrem and G.A. Wickham for their encouragement and assistance over the course of this Masterate.

My thanks are also due to Mr. L. Hawthorne for his assistance in caring for the animals used in these experiments.

I also wish to acknowledge the assistance and advice given by members of the Sheep Husbandry, Veterinary Clinical Sciences and Dairy Husbandry Departments and Library staffs of Massey University, and by members of the staffs of the Palmerston North Hospital and the Department of Scientific and Industrial Research.

Gordon Dryden.

CONTENTS.

	page.
CHAPTER 1. INTRODUCTION.	
Historical Summary	1
The Present Work	2
Nomenclature	3
CHAPTER 2. REVIEW OF LITERATURE.	
I. THE PROTEIN NUTRITION OF WOOL GROWTH.	
Protein Metabolism in the Rumen	5
The Utilisation of Digested Protein	10
Protein Nutrition and Wool Production	11
II. THE METABOLISM OF THE SULPHUR CONTAINING AMINO-ACIDS.	
The Intermediary Metabolism.	14
(a) the conversion of methionine to cysteine	14
(b) the interconversion of cysteine and cystine	15
(c) the main pathways of cystine and cysteine degradation	16
(d) the formation of bile acids	21
(e) the excretion of cyst(e)ine degradation products and the detoxification mechanism.	21
The Incorporation of Cyst(e)ine into wool and Hair Keratin.	22

	page
III. THE EFFECT OF SULPHUR CONTAINING AMINO-ACID ADMINISTRATION TO THE SHEEP.	
The Effect of Cyst(e)ine Administration on Wool Growth and Body Weight	28
The Effect of Sulphur Containing Amino-Acid Administration on the Character of the Wool Grown	34
(a) the chemical composition and topography of the wool fibre	34
(b) fibre diameter	35
(c) the physical properties of the fibre	35
 CHAPTER 3 METHODS.	
Introduction	37
Animals	37
Digestibility Determinations	37
(a) collection	38
(b) nitrogen analyses	39
(c) dry matter determinations	39
Feeding Regimes	39
Cysteine Experiments	40
(a) dose level response experiment	40
(b) protein level experiment	42
Wool Sampling and Measurement Methods	42
Methods of Data Analysis	45
(a) dose level response experiment	45
(b) protein level experiment	46

CHAPTER 4. RESULTS.	
Dose Level Response Experiment.	51
(a) wool growth rate response	52
(b) fibre diameter response	53
Protein Level Experiment	54
(a) wool growth rate response	54
(b) fibre diameter response	57
(c) the effect of cysteine infusion on the digestibility of the basal feed	58
(d) the effect of cysteine infusion on liveweight	58
CHAPTER 5 DISCUSSION.	
General	59
Experimental Results	61
The Mechanism of the Cysteine Effect	67
SUMMARY	72
BIBLIOGRAPHY	74
ACKNOWLEDGEMENTS	i.
LIST OF TABLES	v.
LIST OF FIGURES	viii.
LIST OF PLATES	x.
ERRATA	x.

LIST OF TABLES.

(Note: 'f' means 'facing' throughout).

2.1.	Sulphur Containing Amino-Acid Concentrations in the Rumen Contents.	9
2.2.	Occurrence of Label in Wool Fibres after ³⁵ S cystine Injection.	24
2.3.	The Effect of Sulphur Containing Amino-Acid Dosage on Wool Production.	32
2.4.	Liveweight Gain Response to Sulphur Containing Amino-Acid Administration.	33
3.1.	Timetable of Events over the Experimental Periods.	37f.
3.2.	Allotment of Treatments in the Protein Level Experiment.	41
3.3.	Sampling Rotation During the Dose Level Response Post-experimental Period.	44
3.4.	Sampling Rotation for the Protein Level Experiment.	44
3.5.	Notation Used in Computations for Analysis of Variance Sums of Squares.	49
4.1.	Mean Daily Wool Growth from Patch 2.	52f

	page
4.2. Analysis of Variance of Data from 15 Hune Sampling	52f
4.3. Analysis of Covariance of Data from 15 June Sampling.	52f
4.4. Mean Daily Wool Growth from Right Mid-Side Patch.	54f
4.5. Analysis of Variance of Data Taken at the End of the Infusion Period.	55f
4.6. Analysis of Covariance of Data Taken at the End of the Infusion Period.	55f
4.7. Test of Difference Between Subclasses.	55f
4.8. Analysis of Covariance of Data Taken at the End of the Post-experimental Period.	55f
4.9. Adjusted Means and Multiple Range Tests.	55f
4.10 Showing the Subclass Means of Each Body Region and Their Ranking.	56f
4.11. Regressions of Mean Fibre Diameter against Wool Growth Rate for Data Taken at 7 Sept.	57f
4.12. Regressions of Mean Fibre Diameter against Wool Growth Rate for Data Taken at 28 Sept.	57f

4.13. Mean Crude Protein and Dry Matter Digestibilities. 58f

4.14. Analysis of Variance of Crude Protein
Digestibility Data. 58f

4.15. Analysis of Variance of Dry Matter
Digestibility Data. 58f

LIST OF FIGURES.

page

2.1.	Digestion of Protein in the Rumen	7
2.2.	Proposed Pathways of Microbial Synthesis of Cysteine from Sulphate.	10
2.3.	Flow Chart of the More Important Reactions of Cyst(e)ine.	21f
2.4.	Occurrence of Label in Plasma.	22f
2.5.	Label Concentration Changes over Time.	23f
3.1.	The Relationship Between the Two Determinations Used to Make Up the Protein Level Control Wool Growth Rate Values.	43f
3.2.	The Separation Of the Subclass Wool Growth Rates Given by the Control Values Used.	43f
3.3.	Sampling Rotation for the Dose Level Response Experiment.	44
4.1.	Wool Growth Rate Responses to Cysteine Infusion.	52f
4.2.	Fibre Diameter Response to Cysteine Infusion	53f
4.3.	Relationship Between Sample Standard Deviations and Fibre Diameters.	54f

	page
4.4. Wool Growth Rate Responses Obtained in the Protein Level Experiment.	54f
4.5. Fibre Diameter Responses Obtained in the Protein Level Experiment.	57f
4.6. Fibre Diameters and Their Relationship to Their Sample Standard Deviations.	58f
4.7. Liveweight Responses to Cysteine Infusion.	58f
5.1. Proposed Flow Chart for Abomasaly Infused Cysteine.	59
5.2. Proposed Flow Chart for Venous Infused Cysteine.	60
5.3. The Metabolism of Cyst(e)ine for Wool Growth.	71f

	page
<u>LIST OF PLATES.</u>	
3.1. The Metabolism Crate Showing Collection and Infusion Apparatus.	40f
3.2. The Catheter in Position in the Jugular Vein.	40f
3.3. The 'Tuta' Infusion Apparatus with Catheter Attached.	40f

ERRATA.

page	line	
6	1	not a new paragraph.
22	22	'Eagle, 1960' should read 'Eagle, <u>et al.</u> , 1960'.
59		Fig.(5.1) no arrow from 'protoplasmic protein to 'urine'.
71	3	'De Bevasques' should read 'De Bersaques'.
72	19	'high protein-saline' should read 'high protein-saline subclass'.
