The practice of evaluative reasoning in the
Aotearoa New Zealand public sector

HEATHER NUNNS

A thesis presented in partial fulfilment of the
requirements for the degree of Doctor of Philosophy
at Massey University, Wellington, New Zealand

ABSTRACT

This study argues that sound evaluative reasoning, defined as “the systematic means for arriving at evaluative conclusions . . . the principles that support inferences drawn by evaluators” (Fournier, 1995, p.1), is an essential element of evaluation quality. As such, evaluative reasoning is a lens through which to consider how to improve the quality of evaluations undertaken or commissioned by the Aotearoa New Zealand public sector. The argument is grounded in the theory of evaluation derived from western philosophy, specifically, informal logic. This theory underpins the conceptualisation and design of this study examining how evaluative reasoning is understood and practised by professionals who undertake public sector evaluation in Aotearoa New Zealand. A multiple method research design is used to generate diverse understandings of the topic and offer opportunities for abductive thinking. The methods used are Q methodology, meta-evaluation, and key informant interviews with local and international evaluation experts.

The findings from this study point to three ways in which evaluative reasoning has an impact on the quality of evaluation. It increases the robustness of the reasoning chain from value claim to evaluative conclusion/judgment; underpins the professional competencies required of evaluation practitioners; and reinforces the ethical dimensions of evaluation practice in a public sector context. Lastly, two abductively-derived conjectures point evaluators toward diverse ways of knowing in their reasoning from evaluative claim to evaluative conclusion/judgment. Amplifying the work of previous theorists, it is suggested that expert intuition and abductive inference provide further paths of evaluative knowing in addition to inductive logic and probative inference.

ACKNOWLEDGEMENTS

This thesis represents a six year journey, combining study with work and family life. It is fitting therefore that my first thanks is to my husband Ray who has provided emotional support as well as practical support in day-to-day household activities. I am truly in your debt. Thanks also to our daughter Megan who since the age of five has been accustomed to a mother with her head in a book as I have worked through post graduate studies. Thank you Megan for your understanding and patience.

I also thank my supervisors Associate Professor Robin Peace and Professor Karen Witten. Your helpful guidance, together with your enthusiasm about my study and confidence in me has been hugely encouraging and kept me going during the times when I questioned whether my thinking made any real sense.

My sincere thanks are also due to my valued colleagues - Mathea Roorda, Robyn Bailey, Rae Torrie, and Vicki Wilde. Since 2008 we have met quarterly for professional support and development purposes. Your ongoing interest in my study, willingness to listen to my latest mental block, and feedback on my work is greatly appreciated.

Lastly, I want to thank Massey University's Distance Library Service. Their behind-the-scenes support of distance students is of immense value.

This thesis is dedicated to my mother Barbara, who like many of her generation growing up in England in the war years did not have the opportunity for education beyond 14 years of age.

GLOSSARY

Aroha	Love, affection, sympathy, charity, compassion.
Evaluan	A generic term for whatever is being evaluated.
Fono	Councils or meetings. Applies to national assemblies and legislatures, as well as local village councils or any type of meeting between people.
Haka	To dance, perform the haka - vigorous dances with actions and rhythmically shouted words.
Hiko	Step, march, hike.
Iwi	Extended kinship group, tribe, nation, people, nationality, race.
Kanohi ki kanohi	Face to face, in person.
Karakia	Prayer, grace, blessing.
Kaumātua	Elders, man or woman, who are held in high esteem.
Kaupapa Māori	Customary practice, principles incorporating the knowledge, skills, attitudes and values of Māori society.
Kāwanatanga	Government, dominion, rule, authority, governorship.
Koha	Gift, offering, donation, contribution.
Mana	Prestige, authority, control, power, influence, status, spiritual power, charisma.
Manaakitanga	Hospitality, kindness, generosity, support. The showing of respect, generosity and care for others.
Māori	The indigenous people of Aotearoa New Zealand.
Marae	The open area in front of the wharenuī (the main building of a marae) where formal greetings and discussions take place. Often also used to refer to the complex of buildings around the marae.
Mātauranga	Knowledge, wisdom, understanding, skill.
Pākehā	New Zealander of European descent.
Palagi	A person of European descent.

Pasifika	Pasifika does not refer to a single ethnicity, nationality, gender or culture. The term is one of convenience used to encompass a diverse range of peoples from the South Pacific region now living in Aotearoa New Zealand who have family and cultural connections to their South Pacific countries of origin.
Pōwhiri	Welcome ceremony on a marae.
Rangatira	Chief.
Tangata whenua	Local people, hosts, indigenous people - people born of the whenua (land).
Taonga	Treasure, anything prized. Applied to anything considered to be of value including socially or culturally valuable objects, resources, phenomenon, ideas and techniques.
Tapu	That which is sacred, prohibited, restricted, set apart.
Te Ao Māori	Māori world.
Te Puni Kōkiri	Ministry of Māori Development.
Te Reo	Māori language.
Te Tiriti o Waitangi	The Treaty of Waitangi.
Tikanga	The customary system of values and practices that have developed over time and are deeply embedded in the social context.
Tino Rangatiratanga	Self-determination.
Tūrangawaewae	Place where one has the right to stand. Place where one has rights of residence and belonging through kinship and whakapapa.
Va	Va is a Samoan concept relating to the space between, which is not empty or void but is relational and sacred.
Wairuatanga	Spirituality.
Whakapapa	Genealogy, lineage, descent.
Whānau	Extended family, family group.
Whānaungatanga	A relationship through shared experiences and working together which provides people with a sense of belonging.

INTRODUCING THE STUDY

This study explores how evaluative reasoning is understood and practised in the context of public sector evaluation in Aotearoa New Zealand. My argument is that evaluative reasoning is a lens through which to consider how to improve the quality of evaluations being conducted or commissioned by Aotearoa New Zealand public sector agencies. The objectives of the study are to (i) present a theoretical account of evaluative reasoning from western philosophy and evaluation literatures; (ii) examine the practice of evaluative reasoning in the Aotearoa New Zealand public sector (the public sector); (iii) identify contextual factors that influence how evaluative reasoning is being practised in the public sector; (iv) generate insights into how evaluative reasoning practice can be improved.

The research questions are: (i) How is evaluative reasoning understood and practised by professionals working in or commissioned by the public sector? (ii) How do contextual factors influence how evaluative reasoning is practised in the public sector? and (iii) How can evaluative reasoning practice be strengthened in the public sector context?

This study is presented in four parts: Part A (chapters 1, 2 and 3) situates the thesis and describes the research methodology, Part B (chapters 4 and 5) provides a theoretical foundation for the study, Part C (chapters 6, 7 and 8) offers three perspectives on evaluative reasoning in the Aotearoa New Zealand public sector, and Part D (chapters 9 and 10) integrate and interpret the findings from these three perspectives.
