# **A study of Non-Contact Knife Sharpness Analysis.**

A thesis presented in partial fulfilment of the  
requirements for the degree of

**Master of Engineering**

**In**

**Product Development Engineering**

At Massey University, Albany, New Zealand.

**Stefan van Woerden**

**B.E. (Hons)**

February 22, 2016

# TABLE OF CONTENTS

Table of Figures .....	4
1 Introduction .....	5
1.1 Background and Motivation .....	5
1.2 Research Objectives.....	6
1.3 Main Contributions .....	7
1.4 Thesis Organization.....	8
2 Review of Current Knife Sharpness Testing Technologies .....	9
2.1 Definition of Sharpness.....	9
2.2 Factors affecting Performance of Knives .....	10
2.3 Patent research.....	15
3 Vision System for Knife Edge Imaging .....	18
3.1 Edge Imaging – how it works .....	18
3.2 Single image, proof of concept .....	19
3.2.1 Research questions.....	19
3.2.2 Aim.....	19
3.2.3 Method .....	19
3.3 Continuous Knife Edge Imaging .....	20
4 Capacitance probe measurement system.....	22
4.1 Research questions.....	22
4.2 Aim.....	22
4.3 Equipment .....	22
4.4 Method .....	22
5 Laser reflection and light intensity test.....	24
5.1 Research questions.....	24
5.2 Aim.....	24
5.3 Method .....	24
6 Results and discussions .....	27
6.1 Vision detection edge analysis results .....	27
6.2 Laser light reflection results.....	29
7 Conclusions .....	35
7.1 Vision detection edge analysis conclusions .....	35
7.2 Laser light reflection experiment conclusions .....	36

7.3	Capacitive measuring experiment conclusions.....	36
7.4	Acknowledgements .....	38
8	Appendix .....	39
8.1	Appendix 1: Sketches of testing setup concepts .....	39
8.2	Matlab code – Laser light reflection creating the plots .....	42
8.3	Microscope edge detection code .....	43
8.4	KST comparison test data of knives .....	49
9	References .....	51

## TABLE OF FIGURES

---

Figure 1: Illustration of BSI calculation. McCarthy (2010) .....	9
Figure 2: Blades used in McCarthy (2007) experiments.....	10
Figure 3: McGorry (2005), grip force knife handle, (a) boning knife, (b) skinning blade. ....	11
Figure 4: Grip force sensor knife handle (A & B), McGorry (2003).....	12
Figure 5: CATRA knife sharpness tester.....	14
Figure 6: Anago KST machine. ....	15
Figure 7: US5571956 (1996) knife sharpness testing machine, 60 – load cell, 16 – test material, 50 – drive motor, 30 – material tensioner. ....	16
Figure 8: US5196800 (1993) Capacitance sensor probe, 13 - knife blade, 16 – capacitance probe point, 25 – probe body, 12 – sensor mount, 33a - knife guide.....	17
Figure 9: The knives used in the testing. Top to bottom, orange knife, box cutter razor, 900 grit, 600 grit, and 400 grit.....	18
Figure 10: Edge detection test rig with the controller. 1, the USB microscope, 2, the test rig frame, 3, the knife, 4, stepper motor to move the knife, 5, the stepper motor controller and 6, the Arduino controller.....	20
Figure 11: Edge detection in operation. 1 USB microscope, 2 test rig frame, 3 knife, 4 stepper motor, 5 lead screw.....	21
Figure 12: First concept of Capacitance probe test rig. 1 – Roller guides, 2 – Capacitance probe sensor, 3 – test rig frame.....	23
Figure 13: 5mW laser module .....	24
Figure 14: Laser in test rig top view. ....	25
Figure 15: Test rig for laser reflection experiment. (Top) .....	25
Figure 16: Test rig for laser reflection experiment. (Side).....	26
Figure 17: 900 grit – 11.2 is the standard deviation of the distribution of the data points. Top left: direct input from the edge detection. Top right: Is the direct input without the lines between the points removed. Bottom Left: graph shows the distribution around the mean position. Bottom right: is the normalised distribution points around the mean. ....	27
Figure 18: 400 grit – 32.6 is the standard deviation of the distribution of the data points. The four graphs are the same graphs as figure 17, but with the 900 grit honed knife.....	28
Figure 19: Standard deviation of the sum of the columns of pixels in the edge image, .....	29
Figure 20: sum of the brightness of all the pixels in the image.....	30
Figure 21: Normal distribution of pixel values of the columns summed. ....	30
Figure 22: Standard deviation of the brightness of laser, grouped by knife type .....	31
Figure 23: Standard deviation of the brightness of laser, grouped by laser angle.....	32
Figure 24: Total sum of the brightness of the reflected laser light. ....	33
Figure 25: Laser light reflecting concept. ....	41
Figure 26: razor edge.....	49
Figure 27: orange handle.....	49
Figure 28: green 900.....	49
Figure 29: green 400 grit .....	49
Figure 30: Green 600 grit.....	50
