The Art of Potential

A Design-Led Exploration of Developing Sustainable Modular Furniture Joints with a Desktop 3D Printer

By The Raque Kunz

An exegesis presented in partial fulfillment of the requirements for the degree of Masters of Design at Massey University, Wellington, New Zealand, 2014
## Table of Contents

1. Acknowledgements viii  
2. Introduction 10  
3. Social Change 20  
4. Sustainability 36  
5. Design 52  
6. Conclusion 72  
7. Bibliography 80  
8. Photo Credits 93  
9. Glossary 97  
10. Appendix 1: 3D Printing Primer 99  
11. Appendix 2: D3DP Comparison 104  
12. Appendix 3: Joint Case Studies 106  
13. Appendix 4: Design-Led Research 112  
14. Appendix 5: Joint Profiles 119  
15. Appendix 6: Limitations of D3DP 121  
16. Appendix 7: Print Log 122  
17. Appendix 8: Ethics Forms 140  
18. Final Exhibition Photos 146
Sketches and ideation for the Potential project
Acknowledgements

This project has been undertaken in collaboration with SCION, a New Zealand Crown research institute, Massey University, and the Wellington Fab Lab.

This project would not have been possible without the help and encouragement of many, many people. I would like to thank everyone who helped me find my way over the last year and successfully complete this programme. I would especially like to extend my gratitude to:

SCION for their generous support and funding for this project. To Grant Emms and Alan Fernyhough for your guidance and allowing me the opportunity to be a part of this material development process. To Marie Le Guen, thank you for your guidance, patience and insight into how to solve the many problems encountered – merci mille fois!

To the Master of Design Coordinator, Julieanna Preston, and my supervisors, Antony Pelosi and Stuart Foster, for their editing, guidance and encouragement through this adventure.

To the Wellington Fab Lab and especially Wendy Neale, its director, for her helpful suggestions and especially for her master’s project, An Embarrassment of Riches, which was an inspiration.

To my friends and ‘Flatmatos’ for their indulgence, patience, support and ideas over a late-night jar of wine.

To my family: Thank you, Heather, for editing, advising and always, always listening. To Brian and Blaine, for helping me laugh off the stress. To Mum, for your love and zucchini bread. And to Dad, for being the inspiration to attempt something like this.

And to Patricia Ford, for helping me get into my helicopter so I could get a better view.
‘Pallet Joint’ sketches
